- Organizer of wire & Tube

Main Exhibits

Standard fasteners and non-standard fasteners: bolts, nuts, screws, studs, threaded rods, pins, rivets, washers, retaining rings, assembly and connection, welding nails, stamping parts, lathe parts, hose clamps, innovative and non-standard products

Fasteners in various industries: fasteners in industries like automobiles, motorcycles, machinery, high-speed rail, buildings, steel structure, hardware, electronics and electrical appliances, aerospace, wind power, ships

Manufacturing skills of fasteners: cold headers, molding machines, heading machines, thread rolling machines, thread rollers, tapping machines, combination machines, grinding machines, milling machines, vibrating plates, heat treatment equipment, surface processing equipment, wire drawing equipment

Supporting facilities of fasteners: molds, surface treatment, raw materials, hardware tools, testing equipment and measuring equipment, screening machines, packaging units, computer software, and other factory equipment

Global industrial transfer brings huge business opportunities for the fastener industry

In the future, "China Manufacturing 2025" and "One Belt, One Road" development strategy will fuel the growth of the automobile, new energy, high-speed rail, urban transport, aerospace, petrochemical, infrastructure construction and other application industries, which will bring new opportunities for the fastener industry. Meanwhile, the upgrading of the fastener industry will also call for more advanced fastener technologies, so as to offer a broad market space for the growth of fastener manufacturing and its supporting facilities.

Global fastener market

Operation revenue (USD 100 million)

Growth rate (%)

Recent years have witnessed the increasing global demand for fasteners and the fastener industry's massive transfer to China, where fastener industry has seen an unprecedented development. China has already become the largest fastener producer in the world.

Data of fastener industry in China in 2014

The cooperation of giants in industries, making the upstream and downstream industry chain of fastener complete

Established in 1998, China Fastener Info has now grown into a three-dimensional media featuring "Website + Magazine + Trade Show", with the number of registered membership surpassing 100,000, including more than 3,000 international buyers. So far, China Fastener Info has successfully held 15 Fastener Trade Shows, with the number of exhibitors and visitors taking the lead across the globe in the same kind of exhibition. Through holding fastener exhibitions, China Fastener Info has achieved a seamless connection between the supplier and the purchaser of fastener online and off line.

Established in 1998, China Fastener Info has now grown into a three-dimensional media featuring "Website + Magazine + Trade Show", with the number of registered membership surpassing 100,000, including more than 3,000 international buyers. So far, China Fastener Info has successfully held 15 Fastener Trade Shows, with the number of exhibitors and visitors taking the lead across the globe in the same kind of exhibition. Through holding fastener exhibitions, China Fastener Info has achieved a seamless connection between the supplier and the purchaser of fastener online and off line.

All China - International Wire & Cable Industry Trade Fair (wire China for short) is a whole industrial chain display platform, which ranks first in Asia and second in the world and features wire manufacturing and finishing, metal processing tools, materials, special wires, measurement and control technology and automation equipments. wire China is a world's leading trade exhibition which puts technology in the first and integrates the most advanced and innovative technologies of the world. The professional buyers of wire China are mainly from industries like wire industry, iron and steel industry, nonferrous metals industry, automobile industry, construction industry, chemical industry, aerospace industry and other enterprises.

Fastener Special Zone, which serves as the extension of the downstream industry chain of wire and cable industry, will help professional buyers to do one-stop purchasing of raw materials of fasteners, its production equipment and the finished products, contributing to foreign export and the transformation and upgrading of domestic manufacturing industry.

Promote your products across the globe through Fastener Show

- Global publicity of overseas network of Messe Düsseldorf.
- Share the source of professional fastener media.

China Fastener Info has been in the industry for 17 years, holding the exhibition of fastener 15 times with the participation of 100,000 members. Making your search for targeted users fast and accurate.

- As the largest overseas exhibition of cable and wire show of wire Düsseldorf, the participation of a large number of international manufacturers of fasteners will make the exhibition more international, with new technology and high-tech products.
- 3 industrial giants join hands. You will get the opportunity to enjoy high-standard professional services and establish business contacts with professional buyers of wire China.

Focus on High-End Markets, Pursue Continuous Innovation

Shanghai Fast-Fix Rivet Corp.

As a Chinese leader in blind riveting systems, Shanghai Fast-Fix Rivet Corp. offers a comprehensive line of blind rivets, including open type blind rivets, close-end type rivets, multi-grip type blind rivets, grooved type blind rivets, peel type blind rivets, and structural rivets in various materials (aluminum, steel, stainless steel, copper, etc.), as well as blind rivet installation tools, including manual and pneumatic blind riveting systems, which are exported to more than 50 countries worldwide.

Here, reporter of China Fastener Info interviewed Jason WANG, general manager of Shanghai Fast-Fix Rivet Corp. to find out its latest developments and plans for the future.

HISTORY & DEVELOPMENT

To start with, could you please briefly introduce the history of Shanghai Fast-Fix?

Shanghai Fast-Fix Rivet Corp. has over 12 years experience in production &

export of blind rivets. Nowadays, we are one of the leading manufacturers of blind rivets in China, supplying over 4,000 different sizes of rivets per IFI standard, DIN7337 standard and ISO standard. The total manufacturing area is over 25,000 square meters, with annual production capability of around 2 billion pieces. We are ISO/TS16949 certified, as an OEM supplier for many European manufacturers.

What are your competitive products? Please give us some examples of their advantages.

Our competitive products are top quality structural rivets. For example, our CUP-FIX rivet has high shear strength and tensile strength, with multi-grip capability. One CUPFIX type can work to replace several standard grip fasteners which can simplify the stock control. It also has good hole filling and

sealing capability, providing strong vibration resistant joints with a visible lock. CUP-FIX is ideal for a variety of applications, such as automobiles, vehicles, ventilation, ladders and cabinets.

How about the sales performance in 2015? What is your sales target in 2016?

To our delight, our sales saw a remarkable increase in 2015, which was stimulated by new product development and global economic recovery. Especially for domestic market, our sales volume increased by over 40%, which was largely attributed to the automotive industry. As you know, China has become the largest global auto market. Our strict quality control and management system per ISO/TS16949 is essential to guarantee such an increase. This year we are expecting an increase of at least 30%.

What is the ratio of overseas to domestic sales? Who are your target customers?

The ratio is 9:1. Currently export market represents 90% of our total sales volume. We supply blind rivets to most famous manufacturers & leading distributors in Europe and North America. For domestic sales, we focus on high-end markets, such as automotive industry.

INNOVATION & STRICT QUALITY CONTROL

Nowadays, only those who keep innovating can firmly hold their market position. What measures have Shanghai Fast-Fix taken to ensure continuous innovation and improvement?

Our R&D department consists of highly skilled product designers and professional technicians. On average we require 5 to 7 weeks to bring a new product to the manufacturing stage. Due to our ability to keep up with and anticipate changes in the industry, we maintain our leading role in the fastening field.

As an innovator, Shanghai Fast-Fix must have launched many new types of rivets. Could you please introduce some significant innovations for us?

In 2006, we successfully developed a series of structural rivets, including CUP-FIX series, HEMFIX series and A-FIX series, driving China's rivet technology to a new level and breaking the domination of imported rivets in the Chinese market.

In 2008, we developed D-FIX series for use in automotive and railway systems, which filled the gap in domestic market and replaced the imported rivets.

In 2012, we developed some new products, including Stainless Steel SEAL-BULB Rivet, Plastic Tri-Fold type Rivet and Dia. 10mm Steel CUP-FIX Rivet. These new products have filled the domestic gaps. And recently a new optical sorting machine has arrived, which will enlarge our supply capability to automotive industry.

In addition to innovation, what makes Shanghai Fast-Fix stand out among industrial competitors?

We make sure that the quality of each size and every lot is under control, and conform to international standards & customer specifications. We keep subsistent samples of every lot for at least one year, to track the products in case of any problem. PPAP are also available for customers from automotive industry.

BRAND BUILDING

Today, Fast-Fix has gained recognition in both domestic and overseas markets. How do you implement brand building?

We build our brand by supplying perfect quality and professional service. More and more customers have nominated Fast-Fix as their sole supplier. We are also promoting our brand and new products by professional exhibitions and leading magazines.

It is learned that Shanghai Fast-Fix is the regular exhibitor of Fastener Trade Show. What is your goal for participation? What kinds of products do you display?

The Fastener Trade Show is a very professional exhibition, offering a good chance to meet domestic & international customers. We hope to show the customers our wide range of different products and our advantages like structural rivets.

COMPANY & INDUSTRY OUTLOOK

What is your target in the future?

Our target is to be the preferred supplier of fastening solutions to automotive industry worldwide in the near future.

In closing, as a fastener veteran, how do you consider the fastener industry in China?

China's fastener industry is developing very fast during the process of economic globalization. Meanwhile, the requirements of product quality and related technologies are also much higher than before. Simple imitation without innovation or new product development will not last long.◆

Sanwei Fasteners

Market-Oriented, Your One-Stop Supplier of Stainless Steel Fasteners

Dongtai Huawei Standard Component Corporation

Nowadays, Germany's "Industry 4.0" has become one of the hottest topics in manufacturing industry. Likewise, there is also a similar concept in China called "Made in China 2025". "Made in China 2025", as the Chinese version of "Industry 4.0" plan, mainly focuses on improving manufacturing innovation, integrating technology and industry, strengthening the industrial base, fostering Chinese brands, enforcing green manufacturing, promoting breakthroughs in key sectors.

So, for Dongtai Huawei Standard Component Corporation, a leading stainless steel fastener enterprise in China, what are its strategic plans in the wave of this industrial revolution? How will it seize the market opportunities in the next decade?

Focus on Market Development, Provide Fastest One-Stop Support Services

Established in 1992, Dongtai Huawei Standard Component Corporation takes the geographical advantage of Dongtai, a well-known stainless steel base in China. It has fixed assets of over 100 million yuan, covering an area of more than 80,000 square meters and employing more than 300 people. It provides a variety of technical services, such as cold heading, stamping, cold extrusion, automatic machining, precision casting, etc. Its main products include stainless steel fasteners, cold extruded parts, stampings, self-clinching parts, and CNC machining parts. In addition to the domestic market, over 40 percent of its products are exported to Europe, America, Japan, South Korea, Southeast Asia and many other countries and regions.

Spokesman of Dongtai Huawei said that previously the company gave priority to order production: the company set certain product specifications based on

customer demand. In the face of the increasingly fierce competition at home and abroad, Dongtai Huawei has taken four measures to better develop the market:

1. Calculate the fastener data by means of a variety of information tools, so as to get the latest market trends and provide strong support for production and storage.
2. Make good use of product display and store sales at all branches, and take full advantage of favorable conditions at each branch for market development.
3. Develop e-commerce platform construction and cooperate with B2B websites, as the integrated platform data will lay a solid foundation for brand building.
4. As Dongtai Huawei always adheres to the principle of quality first, it will launch multiple and comprehensive promotions.

By sharing inventory data, Dongtai Huawei achieves quick transfer of goods and abundant inventory, so that the customers' requirements can be responded immediately, which shows

Eyebolts

that Dongtai Huawei has become a one-stop supplier of stainless steel fasteners and provider of fastener solutions for customers.

Attach Great Importance to Quality and Innovation

“Huawei fasteners, good!” Foreign customers highly praised Dongtai Huawei when they visited the plant. Indeed, the high recognition should be contributed to its focus on details, quality and sincerity. “The quality control begins from the source to delivery inspection, which are strictly supervised by rigorous inspection standards, advanced inspection equipment, and professional inspection technicians.” Spokesman of Dongtai Huawei noted.

It is reported that Dongtai Huawei was the first company in Dongtai City that passed ISO 9001 international quality system certification in 1999. In December 2005, it obtained ISO14001 environmental certification. Its brand “FL” was awarded “Famous Trademark in Jiangsu Province” and “Well-Known Brand in Yancheng City”. Furthermore, it has been awarded “Top 10 China Fastener Prestigious Brand” and has been titled “Trustworthy Company in Jiangsu Province” for many years. In 2015, it was awarded “Famous Trademark of China”.

No innovation, no survival. In recent

years, Dongtai Huawei has established an R&D department to make the product development and technique process run on a “fast track”. On the one hand, it simplifies the process, so that the quotations can be sped up; on the other hand, it not only strengthens the quality and technique management, but also regulates the process operations as well.

Today, Dongtai Huawei is making every effort to enhance its R&D capability. Spokesman of Dongtai Huawei said, “In order to offer unique and competitive products, we introduced CNC processing center in 2015, providing precision machining parts for customers. To improve our inspection standards, we also replaced the old apparatus by the new precise quadratic elements video measuring instrument controlled by computers. In addition, the newly introduced dozens of automatic instrument lathes have substituted the previous manual controlled instrument lathes, so that the precision and efficiency are significantly increased. For example, one worker used to operate one machine, but now one worker can handle two or three machines with ease.”

Combination of Internet and Manufacture

During the past decade, the internet technology has been grown rapidly. It is an important change, an irreversible historical trend. Under such an impact, a

Non-standard Screws

series of traditional industries and business models are facing new challenges.

Since 2015, “Internet plus manufacture” has become a hot issue in the traditional manufacturing industries. In fact, for Dongtai Huawei started to launch online promotions on professional media (such as on www.chinaFastener.info) as early as 1998 and has established long-term business relations with buyers worldwide. In recent years, Dongtai Huawei has applied information technology in production, management, administration and R&D in order to improve production efficiency, reduce costs, improve product quality, and thereby enhance company competitiveness.

Looking to the future, Dongtai Huawei will further deepen market goals and increase customer satisfaction with excellent products. Moreover, with the spirit of continuous improvement, Dongtai Huawei will keep abreast of international standards and maintain its leading role in one-stop supplier of stainless steel fasteners! ♦

STL Ensures Security and Reliability of Locking Washers by Introducing State-of-the-Art Testing Equipment

Hello! I am Xiong Yejun, general manager of Dongguan STL Metal Products Co., Ltd. First of all, I would like to extend my sincere gratitude to *China Fastener Directory* for offering me a great opportunity to introduce my company periodically. In this issue, I will give my presentation of the testing equipment performance at STL.

The DIN65151 transverse vibration testing equipment, currently the world's most advanced vibration anti-loosening testing equipment, is effective for inspecting the anti-loosening characters of fasteners in the vibration condition. The machine simulates the continuous high frequency of strong vibration environment by applying the maximum load of reciprocating vibration impact on locking washers, so as to ensure that the locking washers meet the anti-loosening performance during installation.

JINYUANDA

Professional auto fastener manufacturer

Dongguan SHITELAO Metal Products Co., Ltd.

Dedicated to develop and study locking washers, and provide comprehensive solutions of locking washers skill.

Professionally manufacture and export DIN25201, DIN92550, S, VS, NFE2511, NFE-3L, 4L, SN60727, VSKD, VSK, etc; import washers of industry and fasteners of various import material special machine-slike SK5, SK7, SUS304, 316.

We can make the customized products which could meet the ROHS or SONY standard. Now we cooperate with many foreign trading companies, so our products are usually exported to Germany, Italy and other Europe countries, America as well. Welcome dealers and agents join us.

ISO9001/ISO14001/TS16949/IRIS2 Quality System Certified Factory!

As the saying goes, "A thing is valued in proportion to its rarity". The DIN65151 transverse vibration testing equipment has the state-of-the-art technology and is sold by only few companies. Therefore, its price will be more expensive accordingly. From the cost perspective, most of the companies cannot afford to buy it even though they are in want of it. STL is the first fastener manufacturer in China equipped with this transverse vibration testing equipment.

A qualified locking washer must have strict production process control and quality process control. From this aspect, the testing on product function is particularly important. If our products can merely meet the appearance requirement but go far from

the function, the risks are very likely to occur. As an influential locking washer brand manufacturer in the industry, we have obtained various quality control certificates. We have been strictly following the quality process by applying various quality control methods (including testing equipment, testing standards, testing procedures). Our business goal is to pursue the quality concept of zero defects, making the world believe in made-in-China products.

In terms of the goal of STL factory, we are committed to offering locking washer applications and solutions, and ensuring the security and reliability of locking washers with brand name "SZJYD-LOCK". We have been working on locking washers for ten year and we will always provide our users with safe and reliabe locking washers.◆

YuYao No. 2 Standard Fastener Factory

YuYao Biaoer Trading Co.,Ltd.

A Reliable Partner For Eyebolts

Established in 1973, Yuyao No.2 Standard Fastener Factory has been committed to supplying eyebolts for over 15 years. As the pioneer and leader in making and exporting eyebolts in China, Yuyao No.2 Standard Fastener Factory has built a strong reputation both in the national and international markets.

In order to provide better service to its customers, Yuyao No.2 Standard Fastener Factory established its subsidiary, Yuyao Biaoer Trading Co.,Ltd in 2006, which has the independent operating import and export right.

The main products of Yuyao Biaoer are eyebolts, dog bolts and hinges for industrial use which are made of various sizes, lengths and materials. The spherical surface is very smooth. The factory constantly introduces state-of-the-art making machines and testing equipment so as to ensure the product quality and performance.

Yuyao No.2 Standard Fastener Factory always carries out the policy of customer-orientation. Every product launched is to meet customers' different needs.

"We encourage all our customers to audit our operations so we can be fully assessed for

their quality systems and they can have first hand confidence in our capabilities. We also value their feedback in identifying possible areas of further potential improvement," Rory Ruan, general manager of Yuyao Biaoer says.

Thanks to decades of experience and cooperation with clients worldwide, Yuyao Biaoer has been one of the designated suppliers for SIEMENS and ABB. 60% of its products are sold to Germany, and the rest are to the US and other countries. 70% of its customers are end users while the remaining 30% are distributors. For its high quality, the eyebolts produced by Yuyao Biaoer are widely used in elevators, ships & machines, electric facilities, medical treatment, food processing device, and etc. Yuyao Biaoer also plans to reinforce its marketing strength in Europe and the US in the coming years.

In addition, Rory Ruan notes that, "The most

significant advantage of our company lies in the ability to accepting small-lot non-standard orders. For instance, we accepted a USD200 order from the logistics department of Malaysian Royal Air Force, which the cost of shipment was actually much higher than the cost of production. However, it can prove that many end users have confidence in and prefer submitting their order to factories directly."

The professional and rich experience of Yuyao Biaoer has helped the company experience an impressive development. Its commitment to quality and service has enabled itself as a reliable partner for eyebolts.

In the next five years, Yuyao Biaoer plans to make further investment in the factory automation and serve its customers with shorter productive cycle and higher product quality. ♦

Ningbo Economic & Technical Development Zone Yonggang Fasteners Co., Ltd.

Ningbo Economic & Technical Development Zone Yonggang Fasteners Co., Ltd. is specialized in the products of guardrail bolts, carriage bolts, hex bolts, hex wood screws. Furthermore, it produces ANSI Grade5 and DIN Grade8.8 + High Strength Bolts and flange bolts. We also customize various special-shaped parts according to the customers' requirements and specifications.

Product specifications: diameter 6mm – 24mm (1/4" – 3/4"), screw length 10mm – 450mm (1/2" – 18"). It is worthwhile to be noted that the Carriage bolts and Guardrail bolts had been rated as high-quality and famous products by China General Machine Components Industry Association and Fasteners Professional Association from 1998 to 2008. The annual production capacity is over 20,000 ton, 95% of which are exported to overseas markets including USA, Canada, Australia, Europe, Southeast Asia, Russia, South America, etc.

We received the ISO 9001: 2008 International Quality Management System Certification in May 2003 as well as the International Customer Guardrail bolts Product Quality Certification in 2007.

Main Products:

Pan head square neck carriage bolts in standards of DIN, BS, IFI, AS, hex bolts, guardrail bolts, flange bolts and other special bolts.

Handan Zhengxin Spends RMB1.2 Billion on

“High-End Fastener Production Project”

Benefiting from the introduction of a large number of high-end machines and the improvement of operational capacity, Handan Zhengxin Fasteners Co.,Ltd. has achieved steady growth in net profit in recent years. In the past five years, Handan Zhengxin, led by its CEO Anna Zhang, has stood out among many other fastener companies and made remarkable achievements with domestic sales of more than RMB 67 million in 2014.

Anna Zhang, enterprise legal person and CEO of Handan Zhengxin said in an interview, “At present, the competition of China’s fastener industry is becoming increasingly fierce. Only if our core competitiveness enhances can we secure an invincible position. Along with the implementation of brand strategy, we will adhere to the policy of diversified development, constantly optimize internal operation mechanism, improve production technique, control and save costs reasonably, and guarantee customers good quality products. It is expected that the sales performance in 2015 will maintain the growth rate of 2014.”

Established in May 2012, Handan Zhengxin Fasteners Co.,Ltd. is a

modern large-scale enterprise specializing in fastener production, steel distribution, warehousing and logistics. Covering an area of more than 50,000 m², the company has four departments, namely Domestic Sales Department, Foreign Trade Department, Manufacturing Department and Overseas Marketing Department. Handan Zhengxin can provide a wide range of products with full specifications, including lock nuts, countersunk bolts, hex bolts, round head hex socket screws, self tapping screws, hex nuts, etc., which are made according to the standards of GB, DIN, BS, JIS, etc. Meanwhile, it can also customize non-standard products and special-shaped parts as per drawings.

In order to adapt to the rapid development of the company, Handan Zhengxin has started to adjust its product structure gradually and transfer to the high-end fastener market, which echoes its development concept of “creating something new”. This transition drives the company to get rid of the previous pattern dominated by low-end products and enables it to seize the high-end market. According to Anna Zhang, Handan Zhengxin is planning to spend RMB 1.2 billion on “high-end fastener production project”. After the completion of the project, the annual output of high strength fasteners and stainless steel fasteners for used in automobiles, electric appliance, furniture and electric power is projected to reach 125,000 tons. Moreover, the new plant is expected to provide more employment opportunities for talents. By then, the tangible assets (the new plant) will be invigorated by the intangible assets (talents).

In terms of company strength, Anna Zhang pointed out, "Quality is the lifeline of enterprise development. Since the inception, Handan Zhengxin has been insisting on the principle of quality first and quality efficiency, and implementing the ISO9001 quality assurance system during every process of production and sales. We attach great importance to every aspect of production, and do not allow any errors occurred in each step."

zenith 获得 巅峰 赞誉 THE BEST QUALITY AND SERVICE CHOICE

"Our company has introduced several state-of-the-art production machines, including precision high speed thread rolling machines from JIANCAI, multi-stage cold heading machines from SHANGHAI BIAULI, cranes from HENAN MINE, cold heading machines from GUANGAN, oil extracting machines from DONGGUAN ZHENGXIONG, forklifts from TAIWAN HONGFU, etc. Excellent quality management, together with advanced inspection devices and methods, will satisfy users' needs as much as possible and protect consumers' interests." Anna Zhang added.

By virtue of refined products, excellent packaging and good service, Handan Zhengxin is well recognized by customers at home and abroad. Its products are widely used in automotive, engineering machinery, general machinery, and municipal infrastructure industries, and are exported to North America, South America, Australia, Europe, South Africa, the Middle East and other regions. It should be highlighted that Handan Zhengxin won the award of "Quality and Recommended Products of

Yongnian Fastener Industry" in 2014.

Anna Zhang is confident about the company's future. She told reporter of China Fastener Info, "Policies such as 'One Belt and One Road' and Yongnian government laying great emphasis on high-end fastener development have a positive effect on us. Additionally, a number of favorable policies, that are good for railway, construction, shipbuilding and other industries, will directly benefit our company, for we provide the supporting basic parts for those industries. With the expansion of market capacity in the future, we will actively expand our market share in related areas. Meanwhile, aiming to make Handan Zhengxin gradually known and recognized by the world, we will also further promote our product and brand in the international market by joining some large B2B platforms such as China Fastener Info which help stimulate business process reengineering and integrate global resources." ♦

Since 1995

Haiyan Shengda Metalware Co.,Ltd.

Haiyan Shengda Metalware Co.,Ltd. is an earliest professional external processing phosphating enterprise, located in Jiaxing. Apart from drywall screw phosphating processing, we added pure Manganese phosphating processing in these years. Salt spray test can reach 90 hours and above. Matching with heat treatment, it's mainly phosphating surface treatment of automobile fasteners, motors and bearing wear-resistant parts.

Asia Industrial Fasteners Market Analysis and Forecasts To 2020

Asia Industrial Fastener Market By Product (Externally Threaded, Aerospace Grade, Other Standard), By Application (Automotive OEM, Machinery OEM, Construction, MRO) Is Expected To Reach USD 44.12 billion By 2020.

Growing automotive demand in light of increasing disposable income of consumers is expected to propel demand for industrial fasteners over the next five years. China dominated the Asia fasteners market in 2013 and the trend is anticipated to continue over the forecast period on account of rapid expansion of domestic manufacturing base. India is expected to witness the fastest growth over the projected period as a result of increasing automotive production. In addition, infrastructure improvement in emerging economies is likely to propel demand for screws, bolts and rivets. Economic growth and rapid industrialization in China, India, Vietnam, Malaysia and Thailand is anticipated to stimulate investments for construction which in turn is likely to augment industrial

fastener market over the projected period.

Increasing use of fasteners in the manufacturing of automotive parts including engine, body, molding, suspension system, frame, body assembling and wheels is expected to drive market growth.

Growing production of aircraft parts in China on account of “The 2011 State Council Policy” for aerospace sector is expected to spur market growth. Increasing number of regional manufacturers in China including Shanghai, Chengdu, Xi’an, Jiangxi and Shenyang is further anticipated to boost industrial fastener market over the forecast period. However, rising market share of substitutes such as PU adhesives is anticipated to restrain industrial faster market in the automotive and construction sector over the forecast period.

Further key findings from the study suggest:

Asia industrial fastener market demand in construction applications accounted for less than 10% of revenue share in 2013 and is expected to witness the fastest growth on account of rising government expenditure on infrastructure development in China, India and Japan. The commencement of 12th Five Year Plan of Civil Aviation

Administration of China (CAAC) resulted in construction of 56 new airports and expansion of 16 airports with a total investment of USD 68.5 billion, thereby boosting construction sector in the country. This in turn is anticipated to boost industrial fastener demand over the projected period.

China was the largest industrial fastener market, accounting for more than 40% of revenue in 2013. Growing domestic demand for vehicles due to improving infrastructure conditions coupled with rising disposable income have been key factors responsible for automobile production growth in China. This in turn is expected to boost industrial fastener market over the projected period.

Japan is expected to witness growth on account of high penetration of industrial fastener manufacturers in the country and their strategic partnerships with OEM and MRO companies.

Asian market for industrial fasteners was highly fragmented due to the presence of numerous companies especially in Japan, India and China. Product innovation and formation of strategic alliances with application users are expected to be critical success factors for the market. New product innovation and advanced processing techniques are likely to open new market opportunities over the forecast period. ♦

Fastener Demand in China Continue to Grow at 7% by 2024

China's demand for fasteners has grown at a fast pace in the past decade. In the next decade, both production and demand will continue to grow.

The Chinese economy maintains a high speed growth which has been stimulated by the consecutive increases of industrial output, imports & exports, consumer consumption and capital investment for over two decades.

Demand for fasteners in China is projected to continue growing at 7% CAGR by 2024. ♦

China's Fastener Imports and Exports for Jan.-Nov. 2015

China's fastener exports totaled 2,472,347.80 tons with the value of \$4,449,591,498 during January to November of 2015. The top five fastener export destinations for China Mainland were U.S., Japan, Russia, Chinese Hongkong and Vietnam.

China Fastener Exports for Jan.-Nov.2015

China Launches Antidumping Duty Review Investigation on Carbon Steel Fasteners from EU

China's Ministry of Commerce (MOC) announced on Jun. 29 it decided to launch antidumping duty review investigation on carbon steel fasteners imported from the European Union.

The period of the dumping investigation on carbon steel fasteners imported from EU was from 1st April 2014 to 31st March 2015, and industry injured investigation period were from 1st January 2011 to 31st March 2015.

The review investigation started from 29th June 2015 to 28th June 2016.◆

China November Car Sales Hit Record High

Auto sales in China, the world's largest car market, jumped to a record high as a vehicle purchase tax cut by the government boosted demand. A total of 2.51 million vehicles were sold in November, up 20.0 percent from a year ago.

Despite the strong growth, auto sales in January-November rose just 3.3 percent year-on-year to 21.79 million vehicles, much weaker than the increase of 6.1 percent in the same period of 2014.

China's auto industry has felt the pinch of the country's slowing economic growth, with producers scaling back output and media reports of unusually long holidays at factories, decreased bonuses and overtime pay for workers.

China's new energy vehicle output surges 600%. China's production of new energy vehicles surged by 600 percent year on year in November thanks to government support. Total production in November stood at 72,300 units.

During the month, output of pure electric passenger vehicles soared 700 percent from a year earlier to 30,000 units and that for plug-in hybrid passenger vehicles tripled to 7,509.

In the first 11 months, China produced 279,200 new energy vehicles, up by four times from the same period in 2014.◆

Losses Rise for Chinese Steelmakers as Demand Continues to Wane

Losses continued to mount for steelmakers in China during October, as the sector, once the mainstay of economic growth, reeled from overcapacity and waning demand.

Large and medium-sized iron and steel smelters posted combined losses of 14.8 billion yuan (\$2.3 billion) in October, down 27.8 percent from the levels in September, according to a report in the Beijing-based Economic Information Daily.

According to industry data, during the first 10 months, large and medium-sized iron and steel smelters posted losses of 72 billion yuan. Among the 101 large and medium-iron and steel smelters, 48, or 47.5 percent, are in the red.◆

Sundram Fasteners Devises Plan to Grow Faster

Sundaram Fasteners Ltd. (SFL) is in the process of devising a plan to grow faster and iron out variations in its performance arising out of economic cycles, said its Chairman and Managing Director, Suresh Krishna on 1st September.

Addressing the 52 AGM of SFL, he said they have set aside Rs.150 crore for 2015-16 against Rs.600 crore invested in the last five years.

“Over the past five years, on a standalone basis, total revenues have increased from Rs.1,339 crore to Rs.2,409 crore. Export turnover increased from Rs.332 crore to Rs.900 crore. These performances have been achieved despite downtrend in domestic market due to uncertain political and economic conditions and economic downturn in developed markets of the world. SFL recognises the need to grow faster and iron out variations in its performance arising out of economic cycles. SFL is in the process of devising plans to increase its revenues,” he said.

Mr. Krishna said that they extended implementation of total quality management (TQM) practices across major divisions more vigorously to improve its all-round efficiency of operations.◆

Bagla Group, Italy's Fontana Gruppo Tie-up for Fastener Business in India

Auto components maker Bagla Group has inked a strategic pact with Italy's Fontana Gruppo to scale up fasteners business in the country. Italy's Fontana Gruppo and Bagla Group have signed definitive agreements to enter into a strategic partnership for the fasteners business in India, Aurangabad-based Bagla Group said in a statement.

“The partnership with Fontana Gruppo would enable the fasteners business of Bagla Group to acquire necessary technological expertise, size and scale, to become the largest fasteners manufacturer in India,” the company's chairman Rishi Kumar Bagla said.◆

WTO Faults EU in Nuts and Bolts Dispute with China

The World Trade Organization in January ruled against the European Union in a dispute that has been raging since 2009 between the bloc and China over import duties on nuts and bolts.

The world trade body's fourth and final verdict against the EU in the dispute opens the way for China to request compensation.

China had first brought the case to the WTO in July 2009 after the EU imposed hefty tariffs on imports of some Chinese steel and iron fasteners.

Arguing that dumping was taking place, the EU had in January that year levied tariffs ranging from 26.5 percent to 85 percent on Chinese screws, nuts, bolts and washers.

The Chinese ministry of commerce said in a statement Monday that the measures had since then had “negative effect on exports from China (of) around \$1.0 billion” (918 million euros) and had resulted in some 100,000 people losing their jobs with thousands of fastener producers across the country.

“It has resulted in huge economic losses to the Chinese industry,” the statement said.

The WTO has repeatedly found that the EU measures violate global trade rules.

In 2010, a WTO panel ruled that Brussels acted inconsistently in its anti-dumping calculations, and the decision was upheld on appeal in 2011.

But the case did not end there. China did not agree with the EU's claim in October 2012 that it had adjusted its measures to comply with the WTO ruling.

That panel ruled last August in China's favour, finding that the EU had failed to make amends, and in January a WTO appeals

body rejected an EU appeal of that ruling.

The WTO among other things faulted Brussels for imposing anti-dumping duties on all Chinese firms, instead of imposing differentiated duties depending on each company's practice.

The Chinese commerce ministry statement hailed the ruling, insisting it showed that "discriminative practice and anti-dumping measures taken by certain trade partners against the Chinese products and exporters lack multilateral legal basis under the WTO trade laws."

It urged the EU quickly comply with the latest WTO ruling "and withdraw the illegal anti-dumping measures on fastener from China as soon as possible."

The statement warned that China otherwise "reserves its rights to take further steps under the WTO dispute settlement mechanism," likely referring to its right to request compensation.

It said it hoped the fastener dispute could now be "settled as soon as possible, so as to restore normal bilateral trade for the products concerned."

Beijing and Brussels have locked horns over a string of trade issues at the WTO, which seeks to set a level playing field for commerce between its members. ♦

EU Extends Tariff on Chinese Wire Rod

Following an expiry review, the European Union decided to continue antidumping measures applied to imports of certain wire rod from China. The extended measure applies duty at 24%.

The review determined that China currently has some 50 million tonnes spare capacity (50% more than actual output) in wire rod production and according to the Chinese export database shipped some 9 million tonnes worldwide in the year to 30th June 2014.

The average cost per ton of exported wire rod fell by between 14% and 19% from 2012 to 2014, depending on the geographic market. ♦

Bossard Quarter 3 Sales Slightly Stronger than First two

Thanks to the investment policy Bossard's sales for the first nine months increased 5.9% to CHF 498.4 million (approximately 458 million euros). Growth through acquisition offset the impact of the Swiss franc appreciation earlier in the year. Excluding acquisitions, sales were down 1.2% in local currency, translating to a 4.5% reduction in Swiss francs.

For the first nine months Bossard's European business grew 4.8% in local currency, translating to CHF 294.7 million and a 3.1% year-on-year decline. Bossard said the figures reflected the difficult and inconsistent demand situation in some European markets, especially Switzerland where customers had been hit by the currency depreciation.

As a result of the acquisition of Aero-Space Southwest Inc, at the beginning of the year, American sales grew 36.4% to CHF 126.4 million. Underlying sales fell 3.2% in local currency but grew 2.6% in Swiss francs. In the third Quarter Bossard benefited from increased volume from the largest US electric vehicle manufacturer but continued to be confronted with lower demand from its second major customer, operating in the agricultural technology sector.

Bossard saw 'pleasing growth' from most Asian markets but this was dampened by business conditions in China.

Bossard projects its full year sales at around CHF 660 million, with an operating margin on par with the first half of the year. It expects business in Europe to continue to be uneven, with Swiss demand down on the previous year. ♦

Würth Group Adds Des Moines Bolt

Germany-based Würth Group announced that it has completed its acquisition of Des Moines Bolt, a Des Moines, Iowa-based distributor of fasteners and supplies. Terms were not disclosed.

Würth Des Moines Bolt is now part of the Industry Division as a member company of Würth Industry of North America (WINA), for which the company is projecting sales of \$700 million in 2016.

In a release, Würth said that with locations in Iowa, Missouri and

Nebraska, Des Moines Bolt has more than 35 years of experience supplying a vast array of industrial fastener products, and variety of services including EDI, bar coding, kitting and packaging, inventory management, delivery services, and more.

"The addition of Würth Des Moines Bolt allows WINA to aggressively continue our strategy of expanding business west of the Mississippi River, as well as acquiring high quality, profitable companies," said Marc Strandquist, Würth executive vice president. "Acquiring companies like Würth Des Moines Bolt supports this kind of growth as we seek to triple our 2013 sales and reach sales of \$1 billion by 2020." ♦

FAA Fastener Fines Hit Boeing and Southwest Airlines

The Federal Aviation Administration recently handed down two significant fines related to aerospace fasteners.

Boeing agreed to pay \$2 million to solve issues involving Boeing's delay in addressing incorrectly shaped fasteners used on airliners, the FAA said.

"In September 2008, Boeing discovered that it had been installing the incorrect fasteners in 777 airliners," writes Joan Lowy of the Associated Press.

Boeing implemented a plan to address the fastener issue in November 2010, more than two years after the company first learned of the problem.

The FAA first proposed fining Boeing \$2.7 million for the fastener problem in 2013.

In related news, Southwest Airlines agreed to pay a \$2.8 million civil penalty to settle a lawsuit over maintenance of dozens of its Boeing 737 aircraft.

The case involved "fasteners and supporting equipment that ensure that plane fuselages withstand the forces of flying at different altitudes and temperatures," according to Bart Jansen of USA Today.

In the lawsuit, the government alleged that Southwest's maintenance contractor, Aviation Technical Services of Everett, WA, "improperly installed fasteners and sealant between the patchwork of fuselage skin on 44 planes from 2006 through 2009."

During the same time frame, the lawsuit also said that shoring to reinforce the plane's structural integrity wasn't maintained properly on the 44 planes.

Each violation could have been assessed a fine of \$25,000. ♦

G.L. Huyett Acquires Precision Specialties LLC.

On October 19, 2015, G.L. Huyett announced its acquisition of Collierville, TN, based Precision Specialties, LLC., a privately held fastener distributor.

G.L. Huyett's CEO, Tim O'Keeffe, explained "This acquisition compliments G.L. Huyett's strategy to grow our business exponentially through the addition of a broader customer base that includes Original Equipment Manufacturers (OEMs), an increased number of product lines and suppliers, and an extended footprint with a larger talent pool." ♦

PennEngineering License Agreement with EJOT GmbH & Co. KG for PT and Delta PT Screws for Plastics

PennEngineering (Danboro, PA, USA) has entered into a license agreement with EJOT GmbH & Co. KG, Industrial Fastener Division (Bad Laasphe, Germany) covering EJOT PT and Delta PT screws for plastic applications. The agreement allows PennEngineering to use EJOT technical information, patent rights, and trademarks in connection with the manufacture and sale of PT and Delta PT screw products.

PT screws feature a high thread profile and recessed thread root providing increased thread engagement with minimal stress. Delta PT screws are engineered for maximized performance with an enhanced design creating a stronger joint and optimal material flow during installation. They further enable higher performance, better clamp loads, and increased joint

life in service compared with standard screws for plastics. Both families of screws ideally suit thermoplastic applications.◆

Berkshire Hathaway Buying Precision Castparts for About \$32B

Warren Buffett is making the biggest bet of his long investment career, a \$32.36 billion buyout of Precision Castparts in a deal that will continue to reshape his Berkshire Hathaway conglomerate.

The acquisition of the aerospace and industrial company would top Buffett's \$26.7 billion deal for BNSF railroad in 2010. It also follows several huge deals outside of the core insurance companies Buffett built his investment empire, including manufacturers, railroads, utilities and food companies.

Berkshire said that it will pay \$235 per share in cash for Precision Castparts' outstanding stock. The deal is valued at about \$37.2 billion, including debt.◆

Fastenal Reports Decline in Fastener Sales

Fastenal Co. reported fastener sales declined 4.1% in November. Overall sales increased 4% to \$298.2 million during the month, with daily sales down 1.1% to \$14.9 million.

Sales to manufacturing customers dipped 1.6% during November, while sales to non-residential construction customers fell 5.1%.

At the end of November, Fastenal's total store count was 2,626.

During the month, Fastenal's overall workforce increased 12.5% to 20,784, including an 11% gain in store personnel to 11,579; an 11.6% gain in selling personnel to 13,102; a 7% increase in distribution personnel to 2,368; and a 3.6% gain in manufacturing personnel to 633.◆

Fastener Customers Reject 3D Printers for Future Supplies, Says FMW Fasteners

According to the latest business survey from FMW Fasteners, customers are fairly clear they do not see 3D printers as a viable option to produce their future supplies.

Nearly 60 percent of those surveyed said they were unlikely or very unlikely to turn to 3D printing as an alternative to purchasing fasteners from specialists. With 30 percent unsure, only 10 percent were likely or very likely to see 3D printing as a viable option.

"These results surprised us," says Steve Baker, Marketing Director, FMW Fasteners. "There's a lot of noise around 3D printers so we thought it was prudent to gauge what our customers thought about them – whether they could foresee a future where they could create their own fasteners with their 3D printer. About 60 percent of our customers run their own business or are self-employed with 40 percent of purchases coming from DIY enthusiasts.

"Our results are a pretty definite 'no' from all our customers. Fasteners have got to be strong – they've got to be able to be robust enough to not fail under stress. Is plastic that strong and robust? Until we can see genuine strength from a fastener produced from a 3D printer, the trust will not be there to go ahead and mass produce.

"Our suppliers are the best in the business – trusted and quality assured. We think 3D printing is innovative and has immense potential in the medical and engineering fields, but with something as intricate as a fastener, the 3D printing market still has work to do."

*The survey was undertaken between February 24 and March 15 with 302 people choosing to participate..♦

Global Aerospace Fasteners Market 2016-2020 - Growing Demand for Air Travel Worldwide

Research and Markets has announced the report of the "Global Aerospace Fasteners Market 2016-2020". The report expects the global aerospace fasteners market to steadily grow during the forecast period, posting a CAGR of more than 7%. Aerospace fasteners are widely used in commercial and military aircraft, ballistic missiles and rockets, and they are also offered in aftermarket service. The aerospace industry makes use of a wide range of fasteners such as bolts, nuts, screws, rivets, pins, and hi-locks.

The growing demand for air travel worldwide has resulted in an increased demand for commercial aircraft fleet, which is a major driver stimulating the growth of the aerospace fasteners market globally. Many countries are investing in the acquisition of military planes, helicopters, and transport aircraft.

The aerospace fastener manufacturers are increasingly focusing on emerging regions like Mexico, Brazil, India, and North

Africa because of their high demand for aircraft. This offers opportunities for third-party companies to collaborate with OEMs and open MRO service centers in these regions.

With a market share of more than 59%, the commercial aerospace segment holds the largest share of the global aerospace fasteners market in 2015. The commercial aerospace market is predicted to reach approximately \$5 billion in revenue and will continue its dominance until 2020.

At present, the Americas dominates the aerospace fasteners market with many attractive investments contributing to its growth. The mergers of major airlines in the US is one of the main reasons driving the growth of the market as these airlines are investing in advanced technology and upgrading fasteners to enhance their flight safety and operations, thus having a positive impact on the market.◆

Mexico Launches a Sunset Review on Carbon Steel Nuts from China

On June 21, 2015, the General Office of International Trade Practice under the Mexican Ministry of Economic Affairs issued an announcement that it decided to launch the sunset review on carbon steel nuts from China. Products fall within CN code 73181603 and 73181604.

The original determination was set on August 2, 2010 with the antidumping duty of 64% against the involved products. On June 9, 2015, the local Mexican industries requested the Ministry of Economic Affairs of Mexico to launch an expiry review on this case.

The investigative period is from April 1, 2014 to March 30, 2015, and the period of analyzing injury is from April 1, 2014 to March 30, 2015 as well. Any interested party should submit the completed questionnaire and related evidence before 14:00 on August 28, 2015. An objection to the complaint should be lodged with related information before 14:00 on September 9, 2015.◆

China Fastener Info and Düsseldorf (Shanghai) Jointly Organize Fastener Special Zone of wire China

Fastener Special Zone

26-29.09.2016

Shanghai New International Expo Centre

China Fastener Info and Messe Düsseldorf (Shanghai) jointly organize "**Fastener Special Zone**", helping trade buyers to make one-stop purchasing of fastener products, production equipment and raw materials.

Organizers:

Messe Düsseldorf (Shanghai) Co., Ltd.

SHINE FASTENER SHINE CHINA
The China's Fastener Info Center
Since 1995

Shanghai Electric Cable Research Institute

China Fastener Info (CFI), Messe Düsseldorf (Shanghai) and Shanghai Electric Cable Research Institute has recently agreed to jointly organize Fastener Special Zone (September 26-29, 2016, Shanghai New International Expo Center), which will be concurrently held with wire & Tube China 2016. It is expected that the exhibition will attract over 1,600 exhibitors and the exhibiting space will cover 64,000 square meters.

Messe Düsseldorf (Shanghai) and Shanghai Electric Cable Research Institute, is a whole industrial chain display platform, which ranks first in Asia and second in the world and features wire manufacturing and finishing, metal processing tools, materials, special wires, measurement and control technology and automation equipment. wire China is a world's leading trade exhibition

which puts technology in the first and integrates the most advanced and innovative technologies of the world.

Fastener Special Zone, which serves as the extension of the downstream industry chain of wire and cable industry, will help professional buyers to do one-stop purchasing of raw materials of fasteners, its production equipment and the finished products, contributing to foreign export and the transformation and upgrading of domestic manufacturing industry.

For further information, please visit www.fastenertradeshow.info and <http://www.wirechina.net/en/>. ♦

The 15th Fastener Trade Show Suzhou Ended with Great Success!

The 15th Fastener Trade Show Suzhou was successfully held on 21-23 October 2015 at Suzhou International Expo Center, China.

The exhibition consisted of two halls—fastener hall and supporting product hall. The three-day event attracted a large number of famous fastener brands, such as Shengdiwei Hardware, Guan hong Hardware, Meishan CSR, Handan Zhengxin, Anhui Karry, Shanghai FQC, Jinan Star, Wenzhou Fengding, Dongguan Chaojun, Suzhou Linqun, Zhejiang Sansega, Zhongsheng Metal, Dongtai Huawei, Wenzhou Oulier, microGleit, Quanyou Standard Parts, Dongguan STL, Dongguan Ruishun, Suzhou Yongyong, Jiangsu Washen, Hengfeng Rivet, Suzhou Aozhan, Flybear Hardware, Haiyan Jiansheng, LenMain Metal, etc. Meanwhile, fastener supporting companies also showcased their fastener related products onsite.

In addition, the show included regional pavilions from Jiashan, Pinghu and Hebei, presenting their regional brand images to the visitors from home and abroad.

From 2016, Fastener Trade Show will be held in Shanghai for even years and in Suzhou for odd years. ♦

Discover Sheet Metal Processing, Metalcutting and Metalforming Technologies

Eurasia's leading industry event- WIN EURASIA Metalworking will be held on February 11-14, 2016 at Tüyap Fair Convention and Congress Center, Istanbul, Turkey.

Turkey is at the center of an economic and political area known as 'Eurasia', where three continents of the world, Europe, Asia and North Africa meet. The proximity to the Balkans and the rest of Europe as well as to the growing emerging markets in Central Asia, the Middle East, and North Africa creates unique business opportunities. The experience of numerous global firms confirms Turkey as a predominant investment location and export platform.

The machine manufacturing industry holds strategic significance in the development process of countries creating a multiplier effect on economic development by defining the manufacturing skills of other sectors through investment, intermediate goods and the services it offers. A developed machine manufacturing industry provides a critical competitive power over other countries in the manufacturing industry.

Turkey and WIN Eurasia Metal Working are interesting not just for mechanical engineers, but also for subcontractors, as mechanical engineering in Turkey has grown by more than 20 percent annually since 1990. Currently, mechanical engineering represents around 10 percent of Turkish exports, but is expected to grow to 20 percent by 2023. According to the mechanical engineering association MAIB, this will equate to some 100 billion dollars, making Turkey to one of the world's five biggest machinery exporters – and adding up to great potential for subcontractors.

Staged from February 11 to 14 in Tüyap Fair Convention and Congress Center, WIN EURASIA Metalworking unites two

separate trade fairs – Metalworking and Surface Treatment – under a single umbrella. During the event where the leading manufacturers of the industry showcase their innovations, visitors will get a chance to reach the entire sheet metal working and surface treatment technology chain.

Product Groups

Metal Working:

Raw material, material handling, forming and separation technology, combined machines, wire, tube and section processing, joining, welding, fastening, measurement, process and quality control repair and machine shop equipment, safe@work, services, consultancy, education.

Surface Treatment:

Surface cleaning and pre-treatment, paint and plastics coating system, galvanization systems, special surface coating technologies, paint, varnish and coating materials.

According to the statistics, 622 companies from Austria, Bulgaria, China, Denmark, France, Hungary, Italy, Germany, South Korea, The Netherlands, U.A.E, UK and Turkey exhibited their products at WIN EURASIA Metal Working 2015. Germany, Italy and South Korea were presented as country pavilion. The show was visited by 29.106 professional visitors from various sectors and countries.

For further show information, please go to www.win-metalworking.com/en . ♦

A Door to Witness Latest Trend of Metal Industry in South Korea

Korea Metal Week 2015 Report

On October 28-31, 2015, "Korea Metal Week 2015" was grandly held in Korea International Exhibition Center (KINTEX). China Fastener Info started its 83th global trip by participating in this exhibition as media partner (Booth#2c204) to distribute a large number of CFDs (*China Fastener Directory*), aiming to help Chinese fastener companies to explore the potential of Korean market and find business opportunities.

According to the organizer Korea Trade Fairs Ltd. and Korea Federation of Fasteners Industry Cooperatives, the event was comprised of 9 specialized parts, which were "16th Fastener & Wire Korea", "11th Die Casting & Foundry Korea", "9th Automobile & Machine Parts Korea", "15th Press & Forging Korea", "16th Tube & Pipe Korea", "3rd Metal Surface Treatment and Painting Korea", "2nd 3D Printing Technology Show", "1st Aluminium Korea", and "SAMPE Korea 2015 & KOREA Composite Show".

Korea Metal Week 2015 had attracted 350 exhibitors from 25 countries

and regions with 765 booths (14,706 sq.m), which represented a 25% increase than last show in 2014. The concurrent shows also included "KOMAF", "TOOLTECH", and "ROBOTWORLD".

For "16th Fastener & Wire Korea", there were 90 exhibiting companies, most of which were Korean exhibitors. Exhibitors from mainland China and India exhibited in regional pavilions.

Korea Metal Week, already established itself as the biggest metal industry and machinery fair in Korea, ensures your success by many chances to

meet buyers around the world as well as to exchange the information of technology. The next show is scheduled to be held on October 19-22, 2016.

METALEX Vietnam 2015:

The Absolute Platform for Production Upgrades

13,777 Industrialists Discovered the Right Technologies & Solutions!

The “Business Alliance for Supporting Industry 2015”, “METALEX Vietnam 2015” “Electronics Assembly 2015 (EA)”, and “Industrial Components & Subcontracting Vietnam 2015 (ICSV)” have finally ended with business connections beyond boundaries while prompting metalworking and supporting industries in Vietnam to be fully armed with the right technologies to venture into the new age of ASEAN Economic Community (AEC). From 8 – 10 October 2015, all the delegates engaged in business discussions,

exchanging contacts, catching up with new solutions and learnt new trends that could elevate their manufacturing processes to the next step of productivity.

All visitors enjoyed solid contents ranging from innovative machineries and networked with business partners they desired. There are 13,777 industrialists and 267 group visits from local and other 33 countries around the world including Australia, Cambodia, China, Colombia, Denmark, Egypt, Finland, France, Germany, Hong Kong, India, Indonesia, Iran, Italy, Japan, Korea, Lao P.D.R., Lebanon, Malaysia, Myanmar, Netherlands, New

Zealand, Philippines, Portugal, Russia, Singapore, South Africa, South Korea, Switzerland, Taiwan, Thailand, United Kingdom, and United States.

Over the course of three days of business, thousands of industrial manufacturers engaged in face-to-face business connection and discovered extensive networking opportunities.

Next year, METALEX Vietnam 2016, Vietnam’s international exhibition on machine tools and metalworking solutions for production upgrade, will return with more and more modern technologies and rich contents alongside with NEPCON Vietnam 2016 during 6 – 8 October, 2016 in Ho Chi Minh City.

For more information, please visit www.metalexvietnam.com ♦

18th M-Tech Osaka Ended

with Huge Success - 1,063 Exhibitors and 42,216 Visitors

On October 7-9, 2015, 18th M-Tech Osaka was grandly held at INTEX Osaka, Japan. China Fastener Info participated the show once again as an exhibitor and media partner (Booth#16-47), aiming to help Chinese fastener enterprises explore the Japanese market. As usual, China Fastener Info distributed *China Fastener Directory* onsite.

According to the organizer Reed Exhibitions Japan Ltd., M-Tech Osaka is Western Japan's largest exhibition gathering all kinds of mechanical parts such as bearings, fasteners, mechanical springs and metal and plastic processing technology.

M-Tech Osaka attracts a significant number of professionals from design, development, manufacturing, production engineering, procurement and quality control departments, who are looking to buy solutions for their businesses.

18th M-Tech Osaka and 18th DMS OSAKA were two major themes of Manufacturing World Osaka 2015, concurrently held with 2nd METAL OSAKA, 3rd PLASTIC OSAKA and 3rd FilmTech OSAKA. Organizer said that the 3-day show ended with huge success with 1,063 exhibitors and 42,216 visitors.

In addition to the Japanese exhibitors, the show also attracted international exhibitors from Thailand, South Korea, Mainland China, Taiwan, etc.

M-Tech Osaka 2016 will be held during October 5-7, 2016.

INDOFASTENER

2015 Post-Show Report

INDOFASTENER 2015, a dedicated trade fair for the fastener and fixing industry, took place on September 17-19, 2015 at Jakarta International Expo Kemayoran, Indonesia.

Organized by PT Wahana Kemalaniaga Makmur (WAKENI), INDOFASTENER 2015 offered a business opportunity for raw material suppliers, manufacturers of fastener production machinery and equipment, and product manufacturers to come into closer contact with buyers, specifiers, distributors and industry professionals from across Indonesia and the neighbouring countries of Southeast Asia who are constantly sourcing for the latest and cutting-edge fastener and fixing technologies.

INDOFASTENER 2015 also provided the perfect platform for the industry to explore the latest trends on the fastener market, new products, technologies and solutions in a conducive location.

According to the statistics, there were about 208 exhibitors for INDOFASTENER and INDOAUTOMOTIVE, 61 of which were from China mainland, including Dongguan Boito, Ganzhou Heying, Haiyan Booming, Ningbo Boye, Ruian Xintai, Siluk Hardware, Shandong Tengda, Shanghai Jingyang, Wuxi Anshida, Jiashan Zhongsheng, etc.

VIETNAM MANUFACTURING EXPO 2016

"Vietnam Manufacturing Expo" will make a grander return in 2016 with more defined focuses on mold & die and plastics manufacturing to better serve the core sectors such as electronics and motorcycle parts and components. This edition is ready to offer you and other 200 brands from 20 countries the exclusive platform to drive your business growth with over 10,000 quality buyers eager to capture the success at the right moment, especially after the realization of the ASEAN Economic Community (AEC) which will trigger a country in transition like Vietnam to glide with golden opportunities.

Exhibit space is open for reservation.

UPSCALE YOUR SHEET METAL PRODUCTIVITY

Launched exclusively for the sheet metal industry in Vietnam, SHEET METALEX Vietnam 2016 will attract over 10,000 production specialists, buyers, designers and quality controllers from key industries and emerging sectors such as construction, electronics and motorcycle parts. Its exhibition profile encompasses all core sectors of the sheet metal working process presented by over 200 brands from 20 countries.

Come forge out new possibilities and opportunities in ASEAN's most dynamic and vibrant market at this exclusive and marketing platform.

wire and Tube Southeast ASIA 2015

Vision, Innovation, Technology

wire and Tube Southeast ASIA 2015 take place at a time where strong industrial, manufacturing, construction, aerospace, automotive and telecommunication developments are expected in the Southeast Asian region which will see strong demand for the wire and tube industries.

Trade visitors from across a broad range of sectors such as building and construction, automotive, chemicals and petrochemicals, technical specialist retailers, educational institutions and technical colleges, wire manufacturers and more were present.

Various group visits from numerous local factories including Bangkok Steel Wire, Bangkok Cable, Kulthorn Materials & Control, and others, arrived over the three days.

For more information, please visit www.wire-southeastasia.com. ♦

The 11th International Wire & Cable Trade Fair for Southeast Asia and the 10th International Tube and Pipe Trade Fair for Southeast Asia, was officially opened on September 16 by Mr. Arthit Wuthikaro, Director-General, Ministry of Industry.

The co-located exhibitions held at Bangkok Trade & Exhibition Centre (BITEC) presented an impressive line-up of machinery, innovative products and solutions from the synergistic sectors of wire, cable, tube and pipes.

Over three days, 400 international companies from 30 countries, including 8 National Pavilions and country groups from Austria, China, France, Germany, Italy, Taiwan, the UK and USA, came together in a single staging- making wire and Tube Southeast ASIA 2015, the region's leading specialist exhibitions for these sectors.

Sino-Thailand Fastener Exchange Conference

Grandly Held in Bangkok

On September 15, the Sino-Thailand Fastener Exchange Conference was grandly held at the meeting room of Ibis Bangkok Riverside Hotel, Thailand.

Jointly organized by China Fastener Info and JiraNatee Associates Co.,Ltd., the Sino-Thailand Fastener Exchange Conference focused on strengthening the trading and cooperation between China and Thailand in the fields of bolts, nuts, screws, fasteners, molds, bearings, machinery, etc.

The conference had attracted more than 20 fastener and related companies from China and Thailand. The Chinese delegation included Aozhan Industrial Co.,Ltd., Ningbo Henghui Thread Tools Co.,Ltd., Jinqi Industrial Co., Ltd., etc. While the Thai delegation was consisted of Thailand fastener companies such as TPC, Teo Lang Heng, General Trade, etc..

After the conference, the company representatives expressed that China and Thailand are friendly neighbors

and it is significant to organize such an exchange in the fastener field. Especially under the backdrop of "the belt and road", it is necessary for both sides to strengthen industrial exchange and cooperation. With the help of organizer, most of the participants said that they had found their business partners, and some had reached preliminary cooperation intentions. ♦

19th M-Tech Tokyo Breaks its records! - 2,253 Exhibitors & 81,469 Visitors

26th Manufacturing World Japan 2015" is one of the world's largest trade shows for manufacturing industry held at Tokyo Big Sight (Japan) from June 24th to 26th, 2015.

The number of exhibitors and visitors recorded the largest number in its history with 2,253 exhibitors from 20 countries and 81,469 visitors from all round the world. In fact, according to the huge number of exhibit requests, Show Management had prepared 10% larger exhibit space than 2014 show. However the show ground was completely full occupied by exhibit booth (sold out all exhibit spaces) and the show was completely packed by exciting atmosphere.

Since this show is recognized as a must attend show for manufacturing industry in Japan and Asia, most of key industry players exhibited and visited 26th Manufacturing World Japan 2015, and their business meetings were seen everywhere in the show venue.

■ International business expands

Various foreign associations, governmental bodies participated in the show in order to invest deeper into the Japanese/Asian market and also held various official meetings. A number of countries held national pavilions to illustrate their devotion towards the Japanese market and gathered technologies representing their country.

This year Thailand, Taiwan, China, Korea, Singapore and Malaysia had pavilions.

■ **The number of international exhibitors: 47% increasing from last year!**

Overall the international participation of both exhibitors and visitors have been continually expanding, this year marking a 47% growth in exhibit space covered by international firms.

Japan 2016 will be held in June 2016 at Tokyo again. According to big satisfaction from exhibitors, remaining exhibit spaces has been already very limited.

Please contact Show Management in order to secure your booth. Web: www.mtech-tokyo.jp/en/ ♦

Deep into Southeast Asia's Automotive Manufacturing Hub

CFD2015 Plus Distributed in Automotive Manufacturing 2015

Sawadeeka! Automotive Manufacturing 2015 opened on 24-27 June, 2015 at BITEC, Bangkok, Thailand. As the only one supporting media from Mainland China, China Fastener Info (CFI), attended the exhibition with the latest *China Fastener Directory 2015Plus* (CFD2015Plus), setting off the 78th stop of its global trip (**Booth: L24**).

It was to be noted here that the latest CFD2015Plus debuted on 19th M-Tech Tokyo and Automotive Manufacturing 2015 on June 24 at the same time, aiming to help Chinese companies to explore the Asian market.

According to the organizer, Reed Tradex, the Manufacturing Expo 2015 attracted around 2,425 brands from 46 countries. Exhibitors from Mainland China, Chinese Taiwan, Japan, Korea, Singapore and Vietnam built their pavilions onsite. There were around 13 exhibitors from Mainland China and 43 from Taiwan.

technology, mold making technology, electronics manufacturing technology, and surface and coating solutions.

The 2016 edition will be held on June 22-25, 2016. For more information, please visit www.automanexpo.com ♦

Being part of the Manufacturing Expo 2015, Thailand's largest manufacturing and supporting industries event, meant participants of the Automotive Manufacturing 2015 were offered with the widest array of automation

Handan Ruiqiang Fasteners

Manufacturing Co., Ltd.

Our main products are hexagon bolts. Meanwhile, we also offer customized products including bolts with reduced shank, tower bolts, carriage bolts, threaded rods, studs, galvanized bolts, HDG bolts, DIN (931, 933, 934), and matched nuts, which can meet DIN, BS, ANSI, JIS standards. We can also produce a variety of special-shaped bolts.

USEFUL FASTENER ABBREVIATIONS

by Mike McGuire, American Fastener Source Guide

18-8	Stainless steel with 18% chrome and 8% nickel, also known as 304 stainless steel 2, 5 or 8 Strength grade of hex head cap-screws and nuts	A307	ASTM spec for carbon steel bolts and studs	Bind	Binding head
2, 5 or 8	Strength grade of hex head cap screws and nuts	A325	ASTM spec for structural bolts	Bl Ox	Black oxide
2A (3A)	Class of thread fit for inch screws	A490	ASTM spec for structural bolts	BR	Brass material
2B (3B)	Class of thread fit for inch nuts	A563	ASTM spec for carbon and alloy steel nuts	BRZ	Bronze material
2H	Nut strength level designation (ASTM A194 Grade 2H Heavy Hex Nuts)	A	Type "A" tapping screw	BS	British Standard
17	Type 17 screw point	AB	Type "AB" tapping screw	BSF	British Standard fine thread
17-4 PH	Martensitic stainless steel alloy	ABS	Class of plastic material – based on acrylonitrile-butadiene-styrene copolymers	BSW	British Standard Whitworth thread
2024 – T4	Aluminum alloy used on fasteners	AISI	American Iron and Steel Institute, specifies chemical composition of steel	BT	Bolt (on drawings)
302 – 304	Common grades of stainless steel fasteners	ALU	Aluminum material, specify type (ex: 6061-T6)		
316	Grade of stainless steel used for fasteners	AN	Precedes a dimensional specification for aircraft fasteners developed by ASG	C	When followed by a number (ex: C-35) hardness measured on the Rockwell C Scale, or an abbreviation for carbon steel, stands for national coarse thread and Type C Screw T/F
410	Grade of stainless steel used for fasteners	ANSI	American National Standards Institute	CB	Carriage bolt
6g	Class of thread fit for metric screws	AS	Alloy steel	CH	Case hardened (type of heat treatment)
6H	Class of thread fit for metric nuts	ASME	American Society of Mechanical Engineers	CL	Class(metric material/strength specifications)
6061 – T6	Aluminum alloy used on fasteners	ASTM	American Society of Testing and Materials	CP	Cotter pin
6262 – T9	Aluminum alloy used on fasteners			C/R	Cross recess drive (i.e., Phillips drive) or chamfer/radius
7075 – T73	Aluminum alloy used on Fasteners	B	When followed by a number (ex: B-90) hardness measured on the Rockwell B Scale, or an abbreviation for Type "B" tapping screws, or an abbreviation for boron	Cad	Cadmium plating
		Bake	Heat treat process used in plating to prevent hydrogen embrittlement	CAD	Computer-aided design/drafting
A193	ASTM spec for alloy steel and stainless for bolts, high pressure and high temperature	BF	Type BF thread former/cutter	Cad/Wax	Cadmium plating with a topcoat of wax
A194	ASTM spec for carbon and alloy steel for nuts, high pressure and high temperature	BHN	Hardness measured with a Brinell Hardness Tester	CARR	Carriage bolt(s)
A286	Incoloy® Alloy	BHSC	Button head socket cap screw	COO	Country of origin
		BHT	Button head Torx® socket cap screw	CPR	Copper material
				CR	Chrome
				CRS	Cold rolled/drawn / finished steel, 1008-1020 unless specified
				CRES	Corrosion resistant steel

	(usually refers to 18-8 or 316 stainless steel)	G	Grade		chanical and material requirements for steel nuts
CS	Countersunk screw or carbon steel	Galv (Galvi)	Galvanized, typically hot dipped galvanized	JMNT	Jam nut
CSL	Castle hex nuts	Gr.	Grade, refers to strength level of hex head screws and/or nuts (i.e., Gr. 5, Gr. 8)	K	Short hand for the number 1,000 (see M)
CT	Coarse thread			ksi	1,000 pounds per square inch
D	Type D or Type 1 thread former/cutter	Hardened	A product that has been heat treated	lbs	Pounds
DAC (Dac320)	Dacromet coating	HB	Hex bolt, or hardness reading measured on the Brinell Scale	LB	Body length of screws or lag bolt
D/C	Double chamfered nut (distinguished from a washer face)	HD	Head	LCS	Low carbon steel
D/E	Double end stud	H.T.	Heat treated	LG	Grip length (distance from head to full threads) on screws
Dia.	Diameter	HCS	Hex head cap screw	LH	Left hand thread
Dich	Di-Chromate	H.D.G.	Hot dipped galvanized	L/W	Lock washer
DIN	German Standards Organization	HHCS	Hex head cap screws	M	Metric or short hand for the number 1,000 (see K)
Driseal	Pipe thread	HHMB	Hex head machine bolt	MAFDA	Mid-Atlantic Fastener Distributors Association
ET	External thread	HRB	Hardness measured on the Rockwell B Scale	MB	Machine bolt
EXT	External tooth lock washers	HRC	Hardness measured on the Rockwell C Scale	Mfg	Manufacturer
F	Type F thread former/cutter	HVHX	Heavy hex head bolt	MFDA	Metropolitan Fastener Distributors Association
F436	Hardened flat washer with dimensions per ASTM F436	HWH	Hex washer head	mm	Millimeter
F844	Unhardened, general purpose flatwashers	HWHS	Hex washer head, slotted	Mod.	Modified
FB	Flange bolt	HX	Hex	MS	Machine screw
FBS	Floorboard screws	IFI	Industrial Fastener Institute	MSNT	Machine screw nut
FH	Flat head	IH; Hex)	(Ind)Indented hex Inch	MTR	Material test report
FHCS	Flat head cap screw	In.	Internal tooth lock washer	MWFA	Mid-West Fastener Association
FHSC	Flat head socket cap screw	INT	Internal tooth and external tooth lock washer	NC	United National coarse thread
Fil	Fillister head	Int/Ext	International Standards Organization	NCFA	North Coast Fastener Association
FIng	Hex flange bolt or nut	ISO	Initial sample inspection report	NE (NU, NTE, NTU)	Designations that define the thickness of nylon insert lock nuts
Fndr	Fender washer	ISIR	Internal thread	NEFDA	New England Fastener Distributors Association
FT	Fine thread	IT		NF	United National fine thread
FTI	Fastener Training Institute	J429	SAE Standard that specifies mechanical and material requirements for externally threaded fasteners		
F/T	Fully threaded (i.e., stud)	J995	SAE Standard that specifies me-		
FWG	Flat washer				

NFDA	National Fastener Distributors Association	SEFA	Southeastern Fastener Association	UNF	United National fine thread
Nom	Nominal reference to dimensions	SHCS	Socket head cap screws	UNFR	United National fine thread with radius root (standard rolled thread form)
NPT	National tapered pipe thread	Skt	Socket	UNJ	United National thread with large radius root (special fatigue resistant thread)
NT; (& NT)	Nut; or the fastener must include a nut	SL; (Slot)	Slotted drive recess	UNR	United National thread with radius root
		SMS	Sheet metal screws	USS	United States Standard; used on "large" OD washers
OH; (OV)	Oval head	SPL	"Special"	UTS	Ultimate tensile strength
		Sq	Square, can refer to head or nut		
		Std	Standard		
P	Thread pitch	STRIP	Stripper bolt (socket shoulder screw)		
Pac-West	Pacific-West Fastener Association	SS; S/S	Stainless steel	WAC	Width across flats, measurement used on nuts, bolts and screw heads
P/B	Plow bolt	SSS	Socket set screws	WAF	Width across corners, measurement used on nuts, bolts and screw heads
PH	Phillips head (drive recess)	STFDA	Specialty Tools & Fastener Distributors Association	W/F	Washer face (often refers to hex head cap screws and hex nuts)
Phil	Phillips drive	STL; (st)	Steel	W/N	With nuts
PI	Plain finish	SWFA	Southwestern Fastener Association	Wng	Wing nuts or screws
PN	Pan head			W/O	Without, i.e., nuts or washers
P/N	Part number			WS	Wood screws
Phos (P & O)	Phosphate and oil coating (typically zinc phosphate and oil)	TB	Tab bolt		
Pozi-Drive®	Special cross recess drive (registered trademark of Camcar Textron)	T/C	Thread cutter	YS	Yield Strength
PPAP	Production part approval process	T/F	Thread former		
psi	Pounds per square inch	T.H.	Through hardened (type of heat treatment)	Zn	Zinc, usually referring to zinc plating (assumed to be zinc with clear chromate)
PT	Partial thread or point	Ti	Titanium	Zn/C (ZC)	Zinc plating with clear chromate topcoat
PZ	Pozi-Drive® style of cross recess (registered trademark of Camcar Textron)	TIR	Total indicator reading	Zn Phos	Zinc phosphate and oil (same as Phos, P & O)
		T/S	Tapping screws	Zn/Wax	Zinc plating with a topcoat of wax
		TPI	Threads per Inch	ZN/Y (ZY)	Zinc plating with yellow chromate topcoat
		TT; (TR)	Taptite® thread (Reminc), tri-roundular or truss head		
R	Radius	TTH	Threaded to the head		
RD	Round head or right hand thread	Type 1 (23, 25)	Thread cutting or thread forming screws		
RT	Rolled threads	Type AB (F, T)	Thread cutting or thread forming screws		
S	Slotted	U	Type U thread former/cutter		
SAE	Society of Automotive Engineers; used for "small" OD on washers; and fine thread	U/C FL	Undercut flat head		
SBR	Silicon bronze	UNC	United National coarse thread		
Sc	Screw	UNRC	United National coarse thread with radius root (standard rolled thread form)		
SD	Square drive
