China Worldbest Holding: Embracing Dream, Seeking Growth

He Qi, General Manager of China Worldbest Holding

China Worldbest Holding Ltd. is a professional fastener trading company which obtains the rights of self-managed import and export. It is mainly engaged in machinery, industrial equipment, and general hardware, with abundant categories of more than one hundred sorts.

Guided by the spirits of “excellence, development, cooperation and enterprise”, China Worldbest Holding takes initiatives in exploring both domestic and international markets, whose customers cover more than 30 countries and regions in Europe, America, Africa, and Asia.

It is reported that China Worldbest Holding has achieved extraordinary development during seven years, turning from an unknown company to an excellent one with an annual export value of 20 million US dollars, being a legend in China fastener industry for its rapid growth. Today, Mr. He Qi, general manager of China Worldbest Holding Ltd., shares his story on how to embrace dream and seek growth in a fast changing global economy.

Where the Dream Took off

In 1989, He Qi was assigned to a state-owned screw factory after graduation. It was an old state-owned factory with more than 1,000 workers and it was an influential one both at home and abroad. Majoring in industrial electrical automation, he was assigned to the equipment department where he learned fastener making processes, such as wire drawing, cold heading, thread rolling, heat treatment, surface treatment, packaging, etc. and began to get familiar with fastener industry. He had worked at this job for 10 years.

However, the 10-year stable work never ceased his passion: He wanted to go outside for the wonderful world. Therefore, he made an important decision: I wanted to start my own business.

In 2005, He Qi established China Worldbest Holding Ltd. with registered capital of 1.08 million yuan, which marked the beginning of his business career.

The beginning is always difficult. The first few months went so uneasy that none orders were received. He Qi had to work around the clock to find business opportunities on the internet. Hard work really paid off. His sincerity finally touched an Indonesian customer, from whom he received his first order.

When mentioning this order, He Qi recalled, “I remember quite well that the Indonesia customer ordered soft black iron wire and prepaid 80,000 US dollars. He bought several batches, 200 tons for each batch. After I first inquired about the price from a wire factory in Zhangjiagang, the customer

accepted the price. And then when I inquired about the price from another factory in Tianjin, to my surprise the unit price in Tianjin was 200 yuan lower than that in Zhangjiagang. Therefore, I got my first pot of gold. First customer + hard work = opportunities for success.”

The Way to Embrace Dream

Soon afterwards, He Qi led his excellent team to a well-managed company. After seven years of endeavor, China Worldbest Holding grew strong and made great achievements: Its annual sales increased from 2-3 million US dollars at the beginning to 20 million US dollars in recent years. Today, China Worldbest Holding has cooperated with more than 100 factories, being an all-round fastener supplier. Its products, such as bolts, nuts, washers

and screws, are popular in the international markets. It has extended its product ranges to riggings, wire ropes, iron chains, which are well received by foreign customers.

He Qi concluded, "It is trust that makes us survive in the fierce competition." Also, his trust has won many long-term customers. He Qi recalled that he was not able to receive payment from his customer who went bankrupt in the financial crisis in 2008. In spite of this, He Qi paid full amount to the factories. If trust makes He Qi stand up in fastener industry, his considerate attitude enables China Worldbest to go popular in foreign market. He Qi noted, "It is very important to offer the best service to customers, so we attach great importance to enhance professionalism of our staff in order to satisfy customers' requirements. Only if we are considerate to our customers can we achieve long-term development."

Face Challenge and Seek Growth

When talking about the current market situation, He Qi analyzed, "At present, our challenges mainly focus on rising costs in labor force and raw materials, heavy taxation, fluctuation of RMB exchange rate, and political turmoil in some countries. To cope with these problems, we are now emphasizing on internal improvement, training and recruitment. Although some trade frictions in North America and EU still exist, we will not give up these traditional markets. At the same time, driven by the "one belt and one road" policy, we are now developing the ASEAN markets. To increase our global exposure, we choose to participate in the international exhibitions and launch advertisement campaigns on B2B websites. To our delight, we kept steady growth in the first half of 2017, and we are optimistic to the fastener export market ahead."

Great expectation, trust and considerate service drive the amazing speed of China Worldbest Holding. In the future, He Qi will make great efforts to build China Worldbest Holding a well-known, professional and reputable fastener exporter.

A new round of challenge begins. China Worldbest Holding keeps growing and He Qi's harvest dream never ends.◆

To provide customers with one-stop purchase service, Donglong Company mainly operate projects as follow:

1. Designing and manufacturing screw tooling: Main Die, Punch Die, Case, Nut-forming Die, Folder Die, 6 Segments Die, Cut-off Blade, Shear Die, Punch, Injector Pin, Sleeve, Washer, Thread Rolling Die and Multi-stroke Die, etc.,
2. General agent of heading machines of Taiwan YiTeng.
3. Selling various Taiwan famous brand screw machines.

東 隆

Donglong Metal Mold Machinery:

Focus on Quality, Talents and Brand

Dongguan Donglong Metal Mold Machinery Co., Ltd. (hereinafter referred to Donglong) was founded in 1998. In 2003, its branch factory, Suzhou Donglong Metal Mould Machinery Co., Ltd was established. Under the leadership of Mr. Zhuo Hedong, president of the company, Donglong has achieved an annual sales of 15% growth and has earned an enviably high recognition for quality molds both in Chinese and international markets. How can Donglong stand out in the field with a history of less than 20 years?

First, Donglong focuses on quality. Donglong is mainly engaged in developing and manufacturing molds for high-end screws, and non-standard nuts used in autos, electrical appliances and other high-end industries. Mr. Zhuo emphasized, “The molds of our company for producing screws and nuts are manufactured by high-end precise machines with high-quality raw materials. What’s more, we have a professional team of technicians and are armed with advanced processing technologies. In addition, Donglong is certified according to ISO 9001 for quality management and adopts ERP Management System. For the high precision, stability and durability, molds produced by Donglong find ready markets both at home and abroad. Donglong has got high reputations among its clients.

Second, Donglong values talents. The company regularly provides internal and external trainings for the staff in skills, quality and services. Mr. Zhuo stated, “The achievement

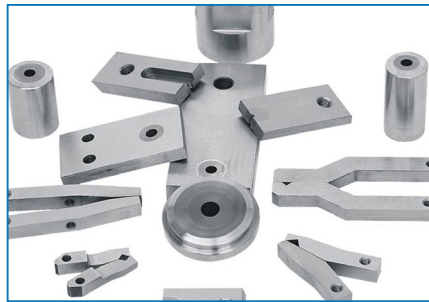

of our company in the past 20 years can't be obtained without the effort and dedication of our staff. In the annual dinner in 2016, in token of our gratitude for their hard work, we commended excellent staff and awarded certificates of honor and prizes to them. What's more, we also gave prizes to those who have been working in our company for 5 years, 10 years and 15 years. Thanks to their dedication and commitment, Donglong has experienced a fast development ."

Third, Donglong attaches importance to brand building. "We have done business with international clients for more than 10 years. Over 40% of our products are exported to Southeast

Asian markets and European markets. By virtue of our high quality and advanced techniques, we have earned trust from clients and built our own brand in European markets. However, we are not satisfied with the current situation. Now we are putting much efforts in brand building. On the one hand, we put more punch into quality control and technology innovation so as to offer our customers more valued-added services. On the other hand, we are stepping up efforts to promote our brands through participating in exhibitions and advertisements in order to further strengthen our presence in the international markets as well as Chinese market."

Mr. Zhuo holds firm confidence in Chinese fastener industry, "The competition of the fastener industry in China is fierce. However, as one of the leading manufacturer of molds for screws and nuts in China, Donglong has the strong ability to provide outstanding quality and service to clients at home and abroad. The potential is huge in the future, and we are always prepared for the chances as well as challenges."◆

In Pursuit of Excellence in Quality

ZHEJIANG CHAOBOER HARDWARE CO.,LTD.

Established in 2001, Zhejiang Chaoboer Hardware Co.,Ltd. is a professional manufacturer of various kinds of standard and non-standard bolts and screws. Located near the Hangzhou Bay Bridge, Zhejiang Chaoboer enjoys a convenient transportation, which is only 100 kilometers from Shanghai and Hangzhou. Covering an area of more than 10,000 square meters, it has over 120 employees and its monthly production capacity exceeds 1,000 tons.

At present, Zhejiang Chaoboer has more than 15 production lines of multi-stage cold forming, 4 production lines of heat treatment, 2 production lines of spheroidizing annealing, and 3 production lines of hot dip galvanizing.

Main products include hex bolts, hex socket bolts, hex flange bolts, carriage bolts, square head bolts, T-bolts and all kinds of non-standard bolts, etc. in accordance with the standards of DIN, IFI, ASME, ASTM, BSW, JIS and GB.

Product grade ranges from 4.8 to 12.9 in DIN or from 2 to 8 in American

standard, diameter from 5 mm to 24 mm in DIN (from 1/4 inch to 1 inch in American standard).

Zhejiang Chaoboer has passed GB/T19001-2008 and ISO9001:2008 quality certification systems and is CE certified. Its products are mainly exported to the United States, Europe, Canada, Australia, Japan, Korea and other countries and regions.

SHINE FASTENER SHINE CHINA

The China's Fastener info Center!

Since 1998

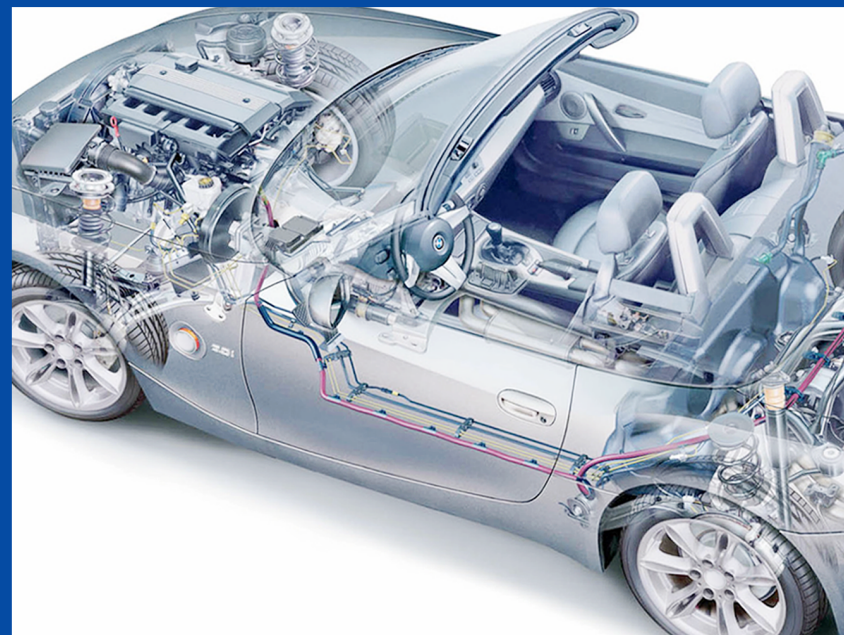

Thread Coating Machine, which is also called Fastener Coating Machine. It's exclusively used in gluing and coating for all kinds of thread in screw. The machines are homogeneous, fast and repeatable for coating, they are widely applied in fasteners, such as threaded rods, screws, studs, etc. And the size is from M5-M30 for all kinds of fasteners.

The advantages of Coating Machine is obvious, it can inhibit the products' corrosion situation and restrain vibration, enhance the screws' reliability and pneumatic components during using period, because the machine makes the products to be anaerobic.

The advantages:

- 1.The machine could apply in all sizes of screws.
- 2.The glue of the machine could spread on the thread sides regularly.
- 3.The position of coating glue on thread could be adjustable.
- 4.The glue point is flexible.
- 5.Coating is homogeneous, fast and repeatable.
- 6.The machine is high precision and long service life.
- 7.The machine is easy to operate.
- 8.The fixture is simple to replace.
- 9.It saves time because of big supply device.

Thread Locking Glue Dispensing Machine

Established in 2011, D-create (Suzhou) Automation Equipment Co., Ltd. is well located in Xiangcheng, Suzhou, China. We are a professional manufacturer & service provider of Auto Dispersion Glue Machine, such as Multiaxial Coating Manipulator, Thread Coating Machine, Silica Gel Coating Machine and Two-component Glue-Pouring Machine, which are our own R&D equipment. The machines are widely applied in auto parts, electric appliance, electronic, fasteners, LED, solar energy, elevators and other industries.

Our company is a R&D enterprise of Auto Dispersion Glue Machine, we could customize relevant auto machines in addition to the standard products because of accumulated coating experience. So D-create has become an automation equipment manufacturer with good reputation and core competence.

Adhering to the principle of "Quality creates the future, service creates the brand", D-create has formed a perfect sales and after-sales system, promoting actively the industry's development.

宁波经济技术开发区甬港紧固件有限公司

Ningbo Economic & Technical Development Zone Yonggang Fasteners Co., Ltd.

Ningbo Economic & Technical Development Zone Yonggang Fasteners Co., Ltd. is specialized in the products of guardrail bolts, carriage bolts, hex bolts, hex wood screws. Furthermore, it produces ANSI Grade5 and DIN Grade8.8 + High Strength Bolts and flange bolts. We also customize various special-shaped parts according to the customers' requirements and specifications.

Product specifications: diameter 6mm – 24mm (1/4" – 3/4"), screw length 10mm – 450mm (1/2" – 18"). It is worthwhile to be noted that the Carriage bolts and Guardrail bolts had been rated as high-quality and famous products by China General Machine Components Industry Association and Fasteners Professional Association from 1998 to 2008. The annual production capacity is over 20,000 ton, 95% of which are exported to overseas markets including USA, Canada, Australia, Europe, Southeast Asia, Russia, South America, etc.

We received the ISO 9001: 2008 International Quality Management System Certification in May 2003 as well as the International Customer Guardrail bolts Product Quality Certification in 2007.

Main Products:

Pan head square neck carriage bolts in standards of DIN, BS, IFI, AS, hex bolts, guardrail bolts, flange bolts and other special bolts.

China launches new round of environmental inspections

China has launched a new round of central environmental inspections covering eight provincial-level areas, as the country finishes nationwide investigations into local environmental protection efforts since June.

A total of eight inspection teams start month-long on-site investigations into local government work, including Jilin, Zhejiang and Shandong provinces.

Inspectors will monitor key environmental issues, oversee local improvements and push local government accountability.

China launched a series of central environmental inspections in 2016 after decades of growth left the country saddled with problems such as smog and contaminated soil.

During the last round of inspections into seven provincial areas, China held over 4,660 officials accountable for poor environmental protection work.

The teams have found common problems, including illegal projects in nature reserves and a lack of eco-friendly facilities.

Last year, inspectors looked into 33,000 cases, imposing fines totalling 440 million yuan (65.4 million U.S. dollars). A total of 720 people were detained and almost 6,500 people held accountable.◆

China's steel prices pick up, but big rises unlikely

China's steel prices have begun to rise, but an industry group tried to calm the market, saying the increase will be limited as new production capacity is set to ease supply.

The steel price index climbed to this year's peak of 106.49 at the end of July, lifted by higher iron ore costs, improved demand as well as lower supply due to government policies to cut steel overcapacity and enhance environmental protection, China Iron and Steel Association (CISA) said on its website.

The country's crude steel output rose 5.1 percent year on year to 492 million tons in the first seven months this year, while apparent consumption of crude steel increased 10.9 percent to 450 million tons, according to CISA data.

Although production restrictions amid tighter enforcement of environmental rules during the winter heating season will cap supply in the coming months, expanding competitive capacity will help contain large price rises, the CISA said.

China has been striving to close small mills that churn out low-quality steel made from scrap metal, this year, leading to decreased supply.

The crackdown on the small low-end furnaces, accounting for 4 percent of total steel output, came as Beijing aims to cut excess capacity, tackle pollution and improve safety measures at these mills.◆

China auto sales rise 6.2% in July

Manufacturers (CAAM).

China's auto sales continued to increase in July, evidence of the steady growth of the world's largest car market, data from China Association of Automobile

Some 1.97 million vehicles were sold last month, up 6.2 percent year on year, extending the momentum in June that saw sales rise 4.5 percent.

Meanwhile, 2.06 million vehicles were produced in July, up 4.8 percent from the same period last year, according to the CAAM.

In the first seven months, total auto output and sales in-

creased by 4.7 percent and 4.1 percent year on year to 15.59 million and 15.33 million vehicles, respectively.

Sales and production of new energy vehicles maintained fast growth, and the market share of domestic brands went up in July, said the CAAM without giving further details.

Earlier data from China Passenger Car Association showed China sold 43,117 new energy passenger cars last month, surging 46 percent year on year.

The robust growth came as China has intensified efforts to encourage the use of new energy vehicles to ease pressure on the environment, by offering tax exemptions and discounts for car purchases, and ordering government organizations to buy more new energy cars.

China has been the world's largest car market for eight consecutive years.◆

Construction of first phase of Thailand-China railway project to start in October

China and Thailand are working together to sign two contracts of the first phase of Thailand-China railway project in September to begin the construction work of the first section in October, Chinese Embassy in Bangkok said in a statement on August 19.

According to the statement, the two countries concluded negotiations of the contract of design work of the first phase of Thailand-China railway project and agreed on the price in the supervision contract during the 20th meeting of Joint Committee on Railway Cooperation between Thailand and China.

It also mentioned that both sides had been required to accelerate their work to make it possible for the two sides to sign the two contracts in September and to begin the construction work of the first section in October.

The construction of first phase, or the 253 kilometers railway from Bangkok to Nakhon Ratchasima, will start gradually from the first 3.5 km section, the second 11 km section, the third 119 km section and finally the fourth 119 km section.

The railway project will also be further extended from Nakhon Ratchasima to Nong Khai on Thai-Lao border, which is called the second phase.

Once finished, the project will be the first standard gauge high speed railway of the Thailand and the railway, according to the statement, "will improve Thailand's transport system, enforce its role as the transport hub in the region, boost economic growth in the country, especially its northeastern part, contribute to the Eastern Economic Corridor project and benefit other countries along the railway."◆

China's machinery sector improves despite challenges

China's machinery sector reported better-than-expected performance in the first half of 2017 although high costs and financing difficulties continue to weigh on profits.

Profits of machinery manufacturers amounted to 857.6 billion yuan (about \$127.6 billion) during January-June, up 14.69 percent year on year, according to the China Machinery Industry Federation (CMIF).

The main business revenue came in at 12.51 trillion yuan, rising 11.6 percent from the same period last year, with that in agricultural machinery, combustion engines, construction machinery and instruments all seeing double-digit growth. Chen Bin, deputy head of CMIF, attributed the improvement

to business innovation and transformation, as well as a low comparison base last year.

But high labor and logistics costs, and financing difficulties were still a trouble for the industry, Chen added.

He predicted both business revenue and profits in the sector to expand 8 percent, with exports in 2017 to end two years of negative growth.

The sector's recovery came as China's economy has gained a steadier footing in recent months, with growth expanding 6.9 percent for the first half of 2017, better than market expectations. ♦

China Steel Corp says prices to rise in fourth quarter

China Steel Corp, Taiwan's largest steelmaker, on Aug 25 said it is raising the prices of steel products for delivery in the fourth quarter by an average of 5.6 percent to reflect soaring raw material costs.

The company said in a statement that it would raise the prices for all products by an average of NT\$1,144 (US\$37.8) per tonne, with hot-rolled steel items increasing by NT\$1,195 per tonne and hot-dipped galvanized steel products climbing by NT\$962 per tonne.

Prices for cold-rolled sheets and coils — which are used in the automotive industry — are to increase by NT\$1,054 per tonne, and those for steel plates are to be raised by NT\$807 per tonne, the statement showed.

Prior to the increase, the steelmaker had lowered prices by an average of 5.28 percent for shipments this quarter in response to fluctuations in major steel markets. ♦

Chin Well warns of lower FY17 earnings

Penang-based Chin Well Holdings Bhd, a carbon fastener and wire rod producer, has warned that it is expecting a lower pre-tax profit for the financial year ended June 30, 2017 (FY17).

The first of four reasons it listed for the expected earnings decline was the global increase in the price of raw materials, particularly wire rod.

The imposition of safeguard duty by the Malaysian

government on wire rod imported from China and shortages of direct labor in the manufacturing industries were two other reasons, according to its Bursa Malaysia filing.

Lastly, it said its cumulative profit before tax in the first nine months of FY17 came in 10.2% lower at RM51.03 million, compared with the RM56.81 million it recorded in the corresponding period of FY16. Its cumulative nine-month net profit was 12% lower at RM41.74 million compared with RM47.68 million last year.

Chin Well is due to release its fourth quarter result before end-August. “However, despite the expected drop in profits, the company (Chin Well) assures it is not likely to go into the red,” read the report, quoting Chin Well’s executive director Tsai Chi Yun. ♦

KYOCERA has acquired 100% ownership of SENCO, a U.S.-based manufacturer of fastening tools and fasteners

Kyocera Corporation announced that it has acquired 100% ownership of fastener and tool manufacturer SENCO Holdings, Inc., based in Cincinnati, Ohio, as of August 7. The enterprise has been renamed KYOCERA SENCO Industrial Tools, Inc.

SENCO is renowned for its excellent product quality and diverse line, which includes pneumatic and electric nailers, staplers, screw systems and compressors, as well as nails, staples, screws and specialty fasteners. SENCO’s manufacturing and marketing are concentrated in the U.S. and Europe, with products sold in more than 40 countries worldwide.

SENCO, established in 1948, is a leader in creating fasteners and power fastening tools for residential, commercial, manufacturing and construction applications. ♦

Japan to impose tax on steel screws imported from China

Japan Ministry of Finance reevaluated its Generalized System of Preferences (GSP), and excluded China’s steel screws from the target of 2018 preferential tariff. China’s steel screws have been entitled to zero tariff so far, but recently they were partially excluded and will be subject to tax starting April 2018, effective for a year. Because China is expected to be considered for 3 consecutive years as a “country of high income” just like the G7 countries, China’s steel screws may become completely excluded regarding the period after April 2019.

The affected products are steel screws under the HS code 7318, and the steel springs under the HS code 7320. ♦

Würth sales increase by 7.8% to EUR 6.4 billion in the first six months of 2017

The Würth Group, global market leader for trading in assembly and fastening materials, generated sales of EUR 6,391 million in the first half of 2017, which corresponds to an increase of 7.8 percent on last year. In local currency terms, this translates into growth of 7.1 percent. The development in Southern and Eastern Europe is especially pleasing. The German group reports 5.2 percent growth.

The development of the operating result is also pleasing. Thanks to growth of 21.8 percent, the Würth Group reports an operating result of EUR 335 million in the first half of 2017.

In the first half of 2017, the number of employees worldwide increased by 2.5 percent to 73,172 (December 2016: 71,391). The Würth Group employs 32,034 people in the sales force worldwide. The German group has 22,223 employees on the payroll. ♦

Bossard U.S. sales grew 32% in the first half of 2017

Switzerland-based Bossard reported its fiscal results for the first half of 2017, led by major year-over-year growth in Europe and in the U.S.

The group posted total first half consolidated sales of \$408.7 million, up 15 percent year-over-year, while profit rose 44.7 percent to \$46.9 million. Organic sales increased 9.5 percent.

“Soaring sales and profits in the first half of the year is yet another confirmation of our profit-oriented growth strategy,” the company said. “Bossard made gains in all market regions, most of all in the America business.” In Europe, where Bossard does nearly 57 percent of its business, sales of \$231.0 million increased 7.5 percent overall and 8.6 percent in local currency.

In the U.S., sales of \$118.2 million jumped 32.3 percent. Half of that growth is attributable to Bossard’s Q4 2016 acquisition of Canton, MA-based Arnold Industries. Excluding that acquisition, first-half U.S. sales rose by 17.4 percent. Bossard said that the U.S. growth reflects its cooperation with the largest U.S. electric vehicle manufacturer, as well as its second major U.S. customer — which is in the agricultural technology sector — profiting from a more favorable economic climate. “After a long slump, this business is bouncing back,” Bossard said about that customer.

In Asia, Bossard sales grew by 16.2 percent. ♦

Anixter Q2 fiscal results show a modest increase

Electrical and wire products distributor Anixter International reported its 2017 second quarter fiscal results, led by a modest increase in total and organic sales that was powered its Utility Power Solutions segment.

The company posted Q2 sales of \$2.0 billion, up 2.3 percent year-over-year, while organic sales increased 2.6 percent. Total

profit of \$40.1 million was nearly double that of \$20.8 million in 2016, while adjusted profit of \$46.2 million was a 4.3 percent increase from a year ago.

Geographically, total sales grew 8.3 percent in Asia Pacific, 2.5 percent in Latin America/Canada, and 0.5 percent in the U.S.; Total sales declined 3.6 percent in EMEA (Europe, Middle East and Africa). Organic local-currency sales increased 10.0 percent in Asia Pacific, 3.7 percent in Latin America/Canada and 1.9 percent in the U.S.; organic local-currency sales declined 1.6 percent in EMEA..◆

Swiss Hatebur develops Coldmatic CM725 7-station forming machine

Hatebur has developed the highly flexible “Coldmatic CM725” 7-station forming machine.

It is designed to pursue super high precision and the highest level of productivity to satisfy the stringent requirement of automotive parts. It can produce parts in diameters up to 30mm and produces 180 pieces of parts per minute. Its seven-station technology is ideal for the manufacturing of demanding and complex part geometries.

Thanks to this, flat parts as well as those that have an extremely thin collar or parts that are difficult to transport can be precisely formed. The forming can take place both on the punch-side and die-side.

Based in Reinach, Hatebur Umformmaschinen AG is joining forces with Carlo Salvi from April 1, 2016. The Swiss company is acquiring all shares in the Italian company and taking on all employees. The current locations and successful Carlo Salvi brand will remain unchanged. Carlo Salvi is a worldwide developer, manufacturer and distributor of cold forming machines. The company was founded in 1939 and currently employs about 92 employees at its offices in Italy, China, the US and UK.◆

Nedschroef acquires CP Tech to broaden high-end engineering know-how

Koninklijke Nedschroef Holding B.V. (Nedschroef), one of the world’s largest fasteners manufacturers, has signed an agreement to acquire CP Tech GmbH, a leading component manufacturer and engineering service provider. CP Tech, established in 2006 and located in Büren, Germany, employs 175 experts in advanced engineering offering complete solutions to many of the world’s most prestigious car manufacturers.

With the acquisition, Nedschroef intends to further develop from a specialist manufacturer of fasteners to a high-end engineering company capable of engaging in the development of early-stage automotive projects working jointly with OEMs.◆

NORMA Group successfully completes acquisition of Fengfan

NORMA Group, a has successfully completed the acquisition of Fengfan Fastener Co., Ltd. ("Fengfan"). Fengfan, headquartered in Shaoxing City, China, produces joining products made of stainless steel and plastic as well as specialty textiles. Following NORMA Group's signing of the purchase agreement on March 28, 2017, for 80 percent of Fengfan's shares, the authorities have now approved the acquisition.

"We are consistently advancing our international expansion. After having acquired and successfully integrated companies in Malaysia and Australia, we are now strengthening our presence in the important growth market of China with the

majority stake in Fengfan," says Werner Deggim, CEO of NORMA Group.

Fengfan was consolidated in the second quarter of 2017. Fengfan markets its products in the Chinese market and exports to other countries. Their approximately 190 employees produce cable ties, fastening elements and specially coated, fire-resistant textiles. Many of Fengfan's customers come from shipbuilding and heavy industry.◆

Bulten signs strategically important contract with vehicle manufacturer in USA

Bulten has, through its joint venture Ram-Bul in USA, signed a contract to

supply fasteners to a major vehicle manufacturer. The annual order value is of approximately USD 5.5 million, with a delivery value of USD 5 million to Bulten and USD 0.5 million to Ramco. Deliveries will continue over a number of years, with start and ramp up during 2018. Full volumes are expected to be reached in 2019/2020.

"With this contract, we have made a significant breakthrough on the north American market and further strengthened our position as manufacturer of high quality fasteners. We see good opportunities to continue to grow the business and increase our market share", says Tommy Andersson, President and CEO of Bulten.◆

CITT amends order concerning steel fasteners from China & Taiwan

The Canadian International Trade Tribunal, pursuant to subsection 76.01(1) of the Special Import Measures Act, has conducted an interim review of its order concerning certain steel fasteners originating in or exported from the People's Republic of China and Chinese Taipei (the subject goods) made on January 5, 2015, in the five-year Expiry Review No. RR-2014-001, continuing, with amendment, its order made on January 6, 2010, in the first five-year Expiry Review No. RR-2009-001, continuing, with amendment, its findings made on January 7, 2005, in Inquiry No. NQ.2004-005 in respect of the subject goods.

Pursuant to paragraph 76.01(5)(b) of the Special Import Measures Act, the Canadian International Trade Tribunal hereby amends its order made on January 5, 2015, to exclude, effective the date of this order, the following goods: Squeeeeeek No More® square-drive wood screws, manufactured by or on behalf of O'Berry Enterprises Inc. under U.S. patent Nos. 5,371,992, 5,372,466 or 6,250,186, for use in wood flooring, with scoring above the threaded portion of the screw that allows the upper portion of the screw and head to be easily broken off, 3" or 3.5" in length, of a #8 or #9 diameter, threaded in part with 8 threads per inch and in part with 9 threads per inch, with the remainder unthreaded, and covered in a Gleitmo 615 lubricant coating (or equivalent coating) and imported in packages of 500 screws or less.♦

Fastenal sales up 10.6% in Q2

Fastenal Co.,
reported
sales for the

second quarter of \$1.1 billion, a 10.6 percent increase over the same period in 2016. Profit increased 13.2 percent to \$148.9 million.

Sales for the first six-month period increased 8.4 percent to \$2.2 billion. Year-to-date profit increased 9.8 percent to \$283.1 million. The company reported sales for June of \$394.3 million, a 13 percent increase year-over-year. Daily

sales also increased 13 percent to an average of \$17.9 million.

During the month, sales to manufacturing customers improved 13 percent, while sales to nonresidential construction customers increased 7.1 percent.

Store count was 2,451, compared to 2,605 a year ago. Employee headcount decreased 0.7 percent year-over-year to 20,174.♦

MW Industries announces the acquisition of Tri-Star Industries

MW Industries, a leading provider of highly engineered springs, specialty fasteners, machined parts, and other precision components, announced on July 13 the acquisition of Tri-Star Industries, an industry-leading manufacturer of precision threaded inserts for plastics.

Located in Berlin, Connecticut, Tri-Star was established in 1991. The company manufactures a complete line of standard and custom-designed threaded inserts and compression limiters in brass, steel, aluminum and stainless steel for plastic applications. Tri-Star also produces

high-volume screw machine products and CNC Swiss precision turned components. The company has machining capabilities to produce metal parts with complex designs, tight tolerances, unique features and high-quality surface finishes.

MW has completed a number of acquisitions to strengthen its product offerings and customer base and is currently evaluating a strong pipeline of possible transactions.♦

The Watermill Group acquires Cooper & Turner in significant cross-border deal

The Watermill Group, a strategy-driven private investment firm, has completed the cross-border acquisition of Andaray (Holdings) Limited and its direct and indirect subsidiaries ("Cooper & Turner"), a UK-based global manufacturer and distributor of high-strength, large diameter industrial fastener systems.

Headquartered in Sheffield, England, Cooper & Turner serves a global customer base with strategically positioned manufacturing and distribution operations across the European Union, China and the US. This global network enables Cooper & Turner to offer a seamless, one-stop shop solution for the manufacture and distribution of industrial fasteners that meet the highest levels of quality. The company will continue to deliver the same trusted and high-quality experience across existing product lines, manufacturing sites and distribution operations as the business also pursues new product, service and market opportunities around the world.

Ronald M. Krisanda, Watermill Advisor and former President and COO at Milacron Holdings Corporation, will serve as the Chairman of the Board of Advisors for the organization.

Tony Brown, Group CEO of Cooper & Turner. and his brother, David Brown, will retain a significant shareholding in the Company.♦

Handan Ruiqiang Fasteners Manufacturing Co., Ltd.

Our main products are hexagon bolts. Meanwhile, we also offer customized products including bolts with reduced shank, tower bolts, carriage bolts, threaded rods, studs, galvanized bolts, HDG bolts, DIN (931, 933, 934), and matched nuts, which can meet DIN, BS, ANSI, JIS standards. We can also produce a variety of special-shaped bolts.

South Africa ITAC urged to remove increased duty on stainless steel fasteners

Cape Town-based fastener supplier Fastenright is appealing for the removal of the customs duty that was implemented on stainless steel fasteners on April 1. The duty was imposed as part of protection measures for the local fastener manufacturing industry through the implementation of a hot-rolled coil safeguard duty, which was approved by Trade and Industry Minister Dr Rob Davies in June.

The International Trade Administration Commission of South Africa (ITAC) reviewed the customs duty imposed on a number of downstream steel industry products following requests from a number of domestic fastener manufacturers to increase the customs duty applicable to stainless steel fasteners to their respective World Trade Organization-bound rates of 15% and 30%.

Fastenright MD Rainer Lutz pointed out that there are no local manufacturers that can produce stainless steel fasteners in the range of sizes, standard of quality or volumes required by customers. Fastenright, in common with many fastener suppliers, imports its stainless steel fasteners from approved suppliers mainly from Asia and Europe, with material excellence certificates confirming quality.

“These products always used to be, and should continue to be, duty-free but all stainless steel fastener importers in South Africa, are now casualties of what seem to be oversight in applying this customs duty to stainless steel fasteners..”

In his opinion, Lutz believes that for the very few local stainless steel fastener manufacturers, the customs duty offers little protection or incentive as they cannot compete on availability, quality or price with well-established and respected international manufacturers. Lutz fears that more unscrupulous suppliers may attempt to import goods under the wrong tariff heading – giving them an unfair advantage.

To support its application to ITAC, Fastenright has submitted proof of its research confirming that there are no viable stainless steel bolt and nut manufacturers in South Africa.

In response to Fastenright’s enquiry, the South African Fasteners Manufacturers Association has confirmed that all the stainless steel fasteners that the company is importing are not made by any South African manufacturers, except for screw studs and screw studding of stainless steel, more commonly known as threaded rods, which Fastenright acknowledges must be subjected to the customs duty to protect local manufacturers.

Exporters of products which include its fasteners will also not be able to increase their selling prices to recover these higher duties, as this would put them in an uncompetitive situation. Stifling growth Lutz notes that local demand for stainless steel fasteners has been growing, as customers realize the advantages of the product over other inferior materials. Imposing a hefty and unnecessary customs duty will stunt the growth of the industry, believes Lutz.

ITAC urged to remove increased duty on stainless steel fasteners The South African financial services sector is undergoing major changes as the industry prepares for the introduction of the Financial Services Board’s Retail Distribution Review (RDR). However, many consumers – the primary intended beneficiaries of the regulatory overhaul – remain largely unaware of what RDR is and how it will impact them once implemented. ♦

Adhering to the business philosophy of "customer first, enterprise focused", we always provide products with good quality for our customers.

Not only our factory can manufacture a wide range fastener products of GB879 spring-type straight pins, stainless steel elastic spring-type straight pins and spring-type straight pins, coiled, but also customize all kinds of non-standard fastener products according to customers' requirements.

Welcome to visit our factory!

CFD Kicks off its 96th Stop of Global Trips at Fastener Fair Stuttgart 2017

Stuttgart, is the capital and largest city of the German state of Baden-Württemberg. Stuttgart's urban area has a population of 609,219, making it the sixth largest city in Germany. 2.7 million people live in the city's administrative region and another 5.3 million people in its metropolitan area, making it the fourth largest metropolitan area in Germany.

The automobile and motorcycle were purported to have been invented in Stuttgart (by Karl Benz and subsequently industrialized in 1887 by Gottlieb Daimler and Wilhelm Maybach at the Daimler Motoren Gesellschaft). As a result, it is considered to be the starting point of the worldwide automotive industry and is sometimes referred to as the 'cradle of the automobile'. Today, Mercedes-Benz and Porsche

both have their headquarters in Stuttgart, as well as automotive parts giants Bosch and Mahle.

For such a "high-tech" city, we really want to visit and learn more from it. The 7th Fastener Fair Stuttgart, the International Exhibition for the Fastener and Fixing Industry, opened from 28-30 March, 2017 at Messe Stuttgart, Germany. China Fastener

Info (CFI) with its latest *China Fastener Directory (CFD)* magazines attended the exhibition, kicking off its 96th stop of the global trips.

According to the organizer, Fastener Fair Stuttgart 2017, with a total of 895 exhibitors from 46 countries, was therefore bigger than ever before, with an increase in exhibition space of 11%. The range of exhibits included industrial fasteners and fixings, construction fixings, assembly and installation systems, fastener manufacturing technology, storage, distribution and factory equipment as well as information, communication and services.

The event was once again characterized by the internationality and diversity of its visitors. Germany was the biggest visitor country followed by Italy and Great Britain. Other major European visitor countries were France, Poland, the Netherlands and Spain. Asian visitors mainly came from Chinese Taiwan and Mainland China. The most important industries which visitors came from were the construction industry, the automotive industry, distribution, mechanical engineering, hardware/ DIY retailing and electrical products/ domestic appliances. The majority of visitors were fastener and fixing wholesalers, manufacturers as well as distributors and suppliers. There was a large increase of visitors from the construction industry compared to the previous event.

The next Fastener Fair Stuttgart, will be held from 19-21 March 2019 at the Trade Fair Center in Stuttgart. ♦

INAFASTENER, the Marketplace for Fastener and Fixing Industries in Indonesia

INAFASTENER, the trade show exclusively dedicated to fastener and fixing technologies, opened on 29 March – 01 April 2017 at JIExpo Kemayoran, Jakarta, Indonesia.

China Fastener Info (CFI), as the media partner, with our popular fastener magazines, *China Fastener Directory (CFD)*, attended the show.

According to the organizer, the exhibition attracted 250 exhibitors and 15,000 professional visitors from 25 countries with exhibition size area of 5,000 sqm. The exhibition featured a full spectrum for assembly & installation systems, auxiliary equipment, construction fixings, equipment & technology, fastener moulds and consumables.

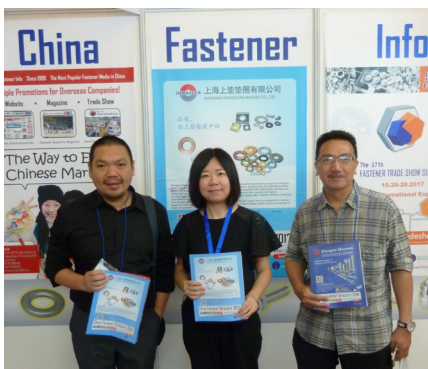

The exhibition was held in conjunction with “The 9th Indonesia International Auto Parts, Accessories and Equip Exhibition 2017”, “The 7th Indonesia International Bike, Parts & Accessories Exhibition 2017”, “The 6th Indonesia International Tyre and Rubber Industry Exhibition 2017”, “The 8th Indonesia International Bus, Truck & Component Exhibition 2017”, “The Indonesia International Automotive Manufacturing & Technology Exhibition 2017”, “The Premier

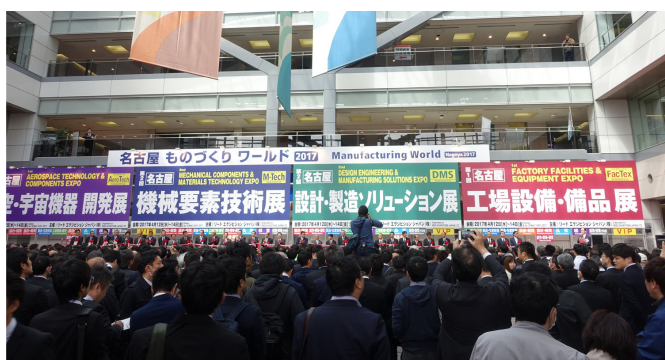

Indonesia International Hardware & Auto Tools Exhibition 2017”.

Many visitors showed great interest in our magazines and inquired about Chinese fastener market and suppliers, in the hope of recommending some suitable suppliers to them.

We also sincerely invited them to our upcoming Fastener Trade Show Suzhou 2017 (26-28 October, 2017, Suzhou International Expo Center, Suzhou, China). ♦

The 2nd Manufacturing World Nagoya Sees a Great Success

The 2nd Manufacturing World Nagoya saw its grand opening on April 12-14, 2017 at Portmesse Nagoya, Japan.

According to organizer, Reed Exhibition Japan Ltd., the exhibition attracted 1,020 exhibiting companies and 34,573 professional visitors gathering under one roof.

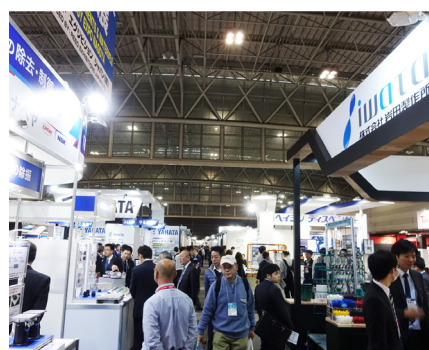

China Fastener Info(CFI) as the media partner attended M-Tech Nagoya, with the popular magazines *China Fastener Directory (CFD)*, unveiling its 98th stop of global trips.

The concurrent shows: 2nd Design Engineering & Manufacturing Solutions Expo (DMS Nagoya) and 1st Factory Facilities & Equipment Expo (FacTex Nagoya).

The 2nd M-Tech attracted 560 exhibitors from all round the world. The main exhibits included motion technology/motor, fluid power transmission/tube components, mechanical parts & related products, fasteners/mechanical springs, material fabrication technology/surface treatment, deburring & industrial cleaning, testing /measuring/sensor.

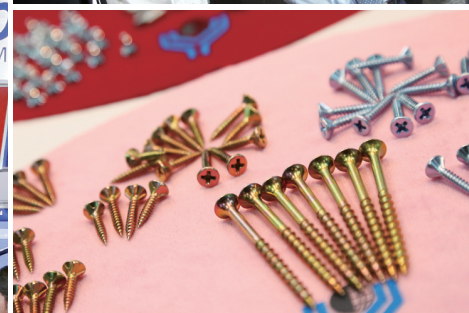

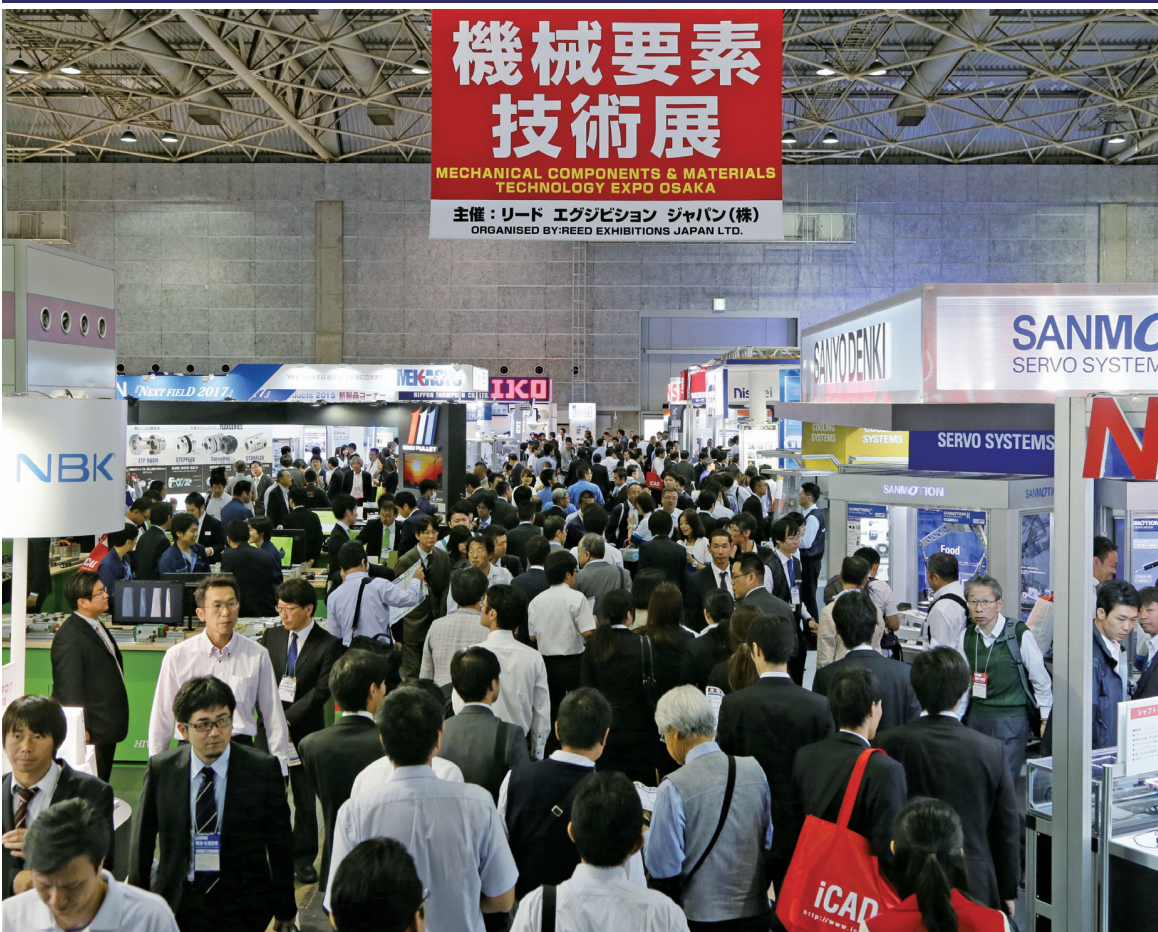

Manufacturing World Nagoya is a purely business to business trade show in Nagoya, specializing in the products, technologies and solution for manufacturing industry. All kinds of mechanical parts/subcontracting services (fasteners, springs, tube components, etc.), IT services (CAD, CAM, production management system, etc.), products/equipment for factory maintenance (factory facilities/equipment, energy saving products, etc.) and technologies/components for aerospace manufacturing (ultra-precision materials processing, mechanical parts, etc.) are exhibited under one roof. It is held in Nagoya which is one of the central areas of the Japanese manufacturing industry.

The next edition will be held from April 11-13, 2018 at Portmesse Nagoya, Japan. ◆

Manufacturing Expo 2017, a Vehicle to Drive Industrialists towards Industry 4.0 with Confidence

“Manufacturing Expo 2017” which was held during 21st – 24th June 2017 at BITEC, Bangkok, is a vehicle to drive industrialists towards Industry 4.0 with confidence. This is a trusted technology launch pad for industrialists from all over Thailand and ASEAN to discover endless options in mold making, automotive parts, surface and coatings, automation system, plastics, electronics, as well as business matchmaking and fascinating activities throughout the four show days.

Thailand's Largest Manufacturing and Supporting Industries Event

Manufacturing Expo consists of five shows:

- **Automotive Manufacturing**, for Automotive Parts Manufacturing
- **Assembly and Automation Technology**, for Automation and Assembly Technology
- **InterMold Thailand**, for mold and die manufacturing
- **InterPlas Thailand**, for plastics parts production
- **Surface & Coatings**, for Surface Treatment, Paints, Coatings

And co-located with 2 shows related to auto-parts and electronics sectors:

- **NEPCON Thailand**, Assembly, Measurement and Testing Technologies for Electronics Manufacturing
- **Mfair**, Business Matching Platform for Manufactures' Network in Asia

Special Zones & Activities

Space Elevator

Be amazed by the demonstration of space elevator project from The Japan Space Elevator Association (JSEA), a global pioneer team. Learn about the revolutionary concept behind the robot that can climb up to the Space station, a project to advance technology development for the future of humanity.

Smart 4.0 Zone

Meet latest innovation for industrialists in all sectors. Experience advanced robots and industrial automation that you can adopt to increase your production efficiency and enhance the potential of your production lines.

Metrology & Testing Zone

See how metrology and testing technology can make a difference to quality control process and create maximum advantage and efficiency for manufacturers. Leading metrology brands will bring a troop of technology to show you how.

Chemical & Raw Material Zone

Discover the suppliers for chemicals and raw materials for plastic production such as resins, colors, composites and others at this special zone.

Surface & Coating Showcase

Thailand's only community platform to follow the latest development in surface & coating technologies.

Coating Zone

Find out more about the chemicals and machines related to color & coating process for metal and non-metal treatment.

3D Technology Zone

The special featured zone for 3D technology, software, scanner, and applications

There are **79,904 attendants** including conference delegates and business delegation from across Thailand and regional countries visited the events. Please stay tuned for the post-event report which will be feature a full analysis of visitor demography, products interest and other useful information.

You may note that the next edition of Manufacturing Expo 2018 is due to take place on 20th – 23rd June, 2018 at BITEC.

For more information, please visit www.manufacturing-expo.com. ♦

M-Tech Osaka 2017, Western Japan's Largest Exhibition to be Held from October 4 to 6 at INTEX Osaka

Exhibition Title: 20th Mechanical Components & Materials Technology Expo (M-Tech Osaka)

Organized by: Reed Exhibitions Japan Ltd.

Dates: October 4 (Wed)–6 (Fri), 2017
10:00-18:00 (last day until 17:00)

Venue: INTEX Osaka

M-Tech Osaka is Western Japan's largest exhibition gathering all kinds of mechanical parts such as bearings, fasteners, mechanical springs and metal and plastic processing technology. M-Tech Osaka attracts a significant number of professionals from design, development, manufacturing, production engineering, procurement and quality control departments, who are looking to buy solutions for their businesses.

Exhibit Profile

The show is categorized in 18 special fairs by each product group.

- Lightweight Technology Fair
- Processing Technology & Materials Fair
- Mechanical Parts Fair
- Ultraprecision Processing/Microfabrication Fair
- Motion Technology Fair
- Motor Fair
- Compressor/Fluid Power Transmission Fair
- Industrial Coating Fair
- Tube Components Fair
- Friction/Abrasion Solution Fair
- Fasteners & Fastening Technology Fair
- Mechanical Spring Fair
- Surface Treatment & Modification Fair
- Deburring & Surface Finishing Fair

- Industrial Cleaning Fair
- Processing Machines & Machine Tools Fair
- Testing, Measuring, Sensor Fair
- Investment Promotion Fair

Visitor Profile

Design & Development Engineers, R&D Personnel, Production Engineers, Manufacturing Engineers, Maintenance Engineers, Procurement Managers, Quality Control Professionals and Management Executives in the Manufacturing Industry.

Concurrent Exhibitions

Manufacturing World Osaka

Western Japan's largest IT solutions exhibition for the manufacturing industry!

FacTex Osaka is a long-awaited trade show covering all kinds of products/equipment for factory maintenance!

WIN EURASIA Metalworking Becomes Meeting Point for Eurasian Buyers

On February 9, 2017, only a few days after the Chinese new year holiday, China Fastener Info brought the latest issue of *China Fastener Directory (CFD 2017)* and set off for Istanbul, the only city in the world that is situated on Asian and European continents, to participate in WIN EURASIA Metalworking (Booth No. Hall 3, B191), aiming to helping China's fastener and related companies to explore the potential of Turkish market.

Organized by Hannover Fairs Turkey, WIN EURASIA is the most important manufacturing industry meeting in the Eurasia. Every year, WIN EURASIA includes two exhibitions, respectively WIN EURASIA Metalworking and WIN EURASIA Automation. China Fastener Info exhibited at WIN EURASIA

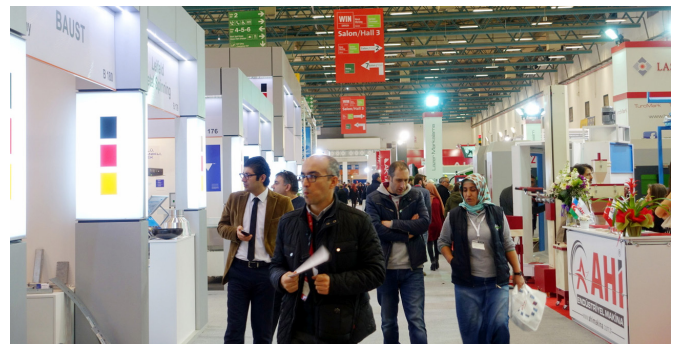

Metalworking this time, which was composed of 3 shows, including Metalworking, Welding and Surface Treatment.

After 4 successful days, WIN EURASIA Metalworking consolidated its position as Eurasia's most important industrial trade fairs which bring all sheet metalworking, surface treatment and welding technology together. A total of 368 exhibitors from 9 countries showcased their smart solutions at the WIN EURASIA Metalworking 2017, once again impressively highlighting the innovative technological developments of the manufacturing industry. The show placed major emphasis on the digitization of manufacturing as well as on human-machine collaboration. Fastener exhibitors included BERDAN CIVATA, PROMSIS, etc.

The future of manufacturing industry showcased

Technological developments including automation, digitalization, Internet of Things, and augmented reality lead to major changes in the world of industry and lay the foundations of the new era of "Industry 4.0". With the attendance of the industry-leading companies, WIN EURASIA Metalworking 2017 pointed out these important trends in the modern industry in addition to traditional methods.

Moreover, visitors got the opportunity to see the latest robotic technologies in the manufacturing processes at Robotics Area. 18 companies met with the professional visitor at this special display and forum area organized with the support of ENOSAD (Industrial Automation Industrialists Association).

Delegations from 22 countries hosted

Keeping the pulse of the industry with the products displayed and industrial activities held, WIN EURASIA Metalworking came to prominence as the major meeting of the industry for the entire Eurasian economic area once again. It created an fertile platform with 2-days B2B meetings which met exhibitors with buyers from their target countries especially from Morocco, Tunis, Algeria, Oman and Sudan. It enabled new business contacts and deals more than ever.

As a result of the cooperation between Hannover Fairs Turkey Fuarçılık and Ministry of Economy buyers delegations from 22 countries including Algeria, Bosnia, Bulgaria, Egypt, Georgia, Greece, India, Iraq, Israel, Jordan, Kosovo, Lebanon, Moldova, Morocco, Oman, Pakistan, Palestine, Saudi Arabia, South Africa, Sudan, Tunisia, UAE were hosted. As well, in the scope of invited editor group, journalists from UK and Slovenia visited the fair.

In addition to international visitors, 40 Anatolian delegations from 25 destinations across Turkey were in the exhibition as a result of collaboration with Chambers of Industry and Commerce, Trade Associations, Federations and other institutions. A delegation consisting of 150 members of Kayseri Chamber of Industry (KAYSO) visited WIN EURASIA Metalworking as well. ♦

WIN EURASIA Fairs Merged Their Power to Make You WIN More

WIN EURASIA Metalworking and WIN EURASIA Automation fairs will be coming together under the same roof between **15-18 March 2018** in **Tüyap, Istanbul**. Inline with the demands of the sector, the leading trade fairs of Eurasia region will merge their power for 2018 edition.

WIN EURASIA 2018: **“Manufacturing Industry 360° @WIN EURASIA”**

As 6 trade fairs will be coming together within the scope of WIN EURASIA, exhibitors and visitors will have unique opportunity to showcase and experience the 360° Manufacturing Industry. From sheet metal processing to metal forming technologies; automation services to electric and electronic equipments, hydraulic & pneumatic services to intralogistics; WIN EURASIA 2018 will be bringing all the ecosystem needed for the future's factories.

Main Topics:

- CeMAT EURASIA

Metalworking EURASIA: International Sheet Metal Processing, Metal Cutting and Metal Forming Technologies Fair

According to the sectoral report of the IGEME (Export Promotion Center of Turkey), Turkey's exported machineries tools are mainly metal-forming types, which take a 77% share of machinery exports, whereas the rest are metal cutting types. Don't miss the fair where whole metalworking industry products will be displayed.

Take your place for being part of metalforming, metalcutting and metalworking sector!

Product Groups

- Forming and Separation Technology
- Processing Technology
- Joining and Fastening Technology
- Machine Elements and Components
- Tube / Section Working
- Additive Manufacturing
- Ball Bearing
- Motor-Reducer
- Hardware
- Hand Tools and Accessories
- Workshop Furniture / Cabinets
- Safe@Work
- Handling Technology
- Repair and Machine Shop Equipment
- Process Control and Quality Assurance

Vietnam Manufacturing Expo 2017 Wraps Up 8,974 Visitors, Laid the Foundation for Industrial Development

On 26 – 28 April 2017 at Hanoi International Center For Exhibition (I.C.E., Hanoi), "VME" Vietnam Manufacturing Expo 2017 continued to exemplify the technology and creativity that drive the manufacturing industry by garnering over 8,974 industrialists from many sectors across Vietnam.

Co-located events with "VME" Vietnam Manufacturing Expo 2017 are "ICSV" Industrial Components & Subcontracting Vietnam (ICSV) and "VSM" Vietnam Sheet Metal which were combined into one comprehensive event to further upgrade and empower production efficiency and business connection. The increased number of visitors at 8,974 and 347 group visits came from 37 countries. The business match making program successfully matched 312 Key Buyers, increased 30% from 2016.

This year, "KOMA TAISEN in Hanoi 2017" has returned as an opportunity for Vietnamese SMEs manufacturers to show and promote their high professional skills. The competition was concluded with the announcement of the new winner, Hanoi College For Electro and Mechanics team 2 which has the best

spin top in Hanoi crafted from powerful CNC machine. They again have chance to join the competition in Ho Chi Minh.

Another activity was created for the purpose of encouraging welders and manufacturers to improve their competitiveness; "Welding Competition" was jointly organized by Vietnam-German Technology Transfer and Training Center (HWC) and Reed Tradex Co., Ltd. during the show days. All participated candidates have taken the first round of theory parts, second round of 3G and 6G welding practical exams to finally discover the best welder of the year- Mr. Trinh Van Son.

"Vietnam has had a great turn recently, providing many opportunities for foreign companies to grab with. And, Vietnam Manufacturing Expo 2017 is one of the effective tools to help me capitalize that opportunities", Mr. Takeshi Tamura, Managing Director of Tsubakimoto Vietnam Co., LTD, one of the exhibitor, shared his opinion. Besides of the demonstration of technology and machinery which focuses on metrology and assembly automation, the organizer has also proposed and boldly introduced the concept of "Industry

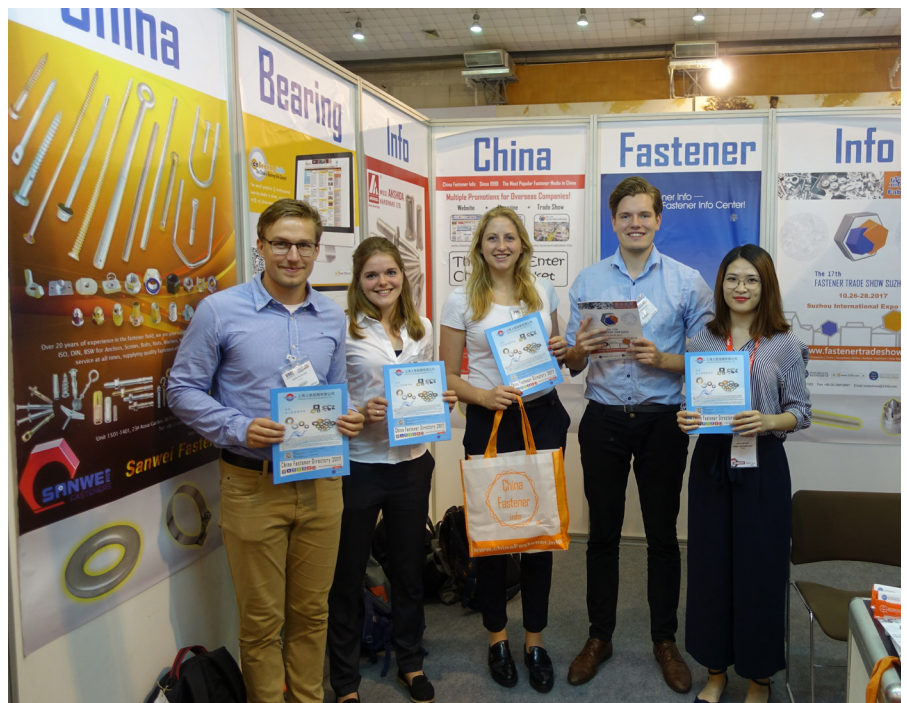

4.0" into the exhibition through enrich content seminar program.

"VME" Vietnam Manufacturing Expo 2017 ended on a successful note after three days of extreme business activities including networking, negotiations and closing deals. It proved to be a fruitful platform especially for visitors, who came to satisfy their thirst for innovation in manufacturing industry. Next year, this dynamic exhibition will take the return from 8 – 10 August, 2018, again at Hanoi International Center For Exhibition (I.C.E).

Exhibitors and visitors can find news and regularly updated details about the event on the show website at: <http://www.vietnammanufacturingexpo.com>. ♦

Jiaxing Fastener Exports Increase in H1 of 2017

Jiaxing's fastener exports increased by 20.48% year-on-year to USD 479 million in the first half of 2017, while fastener imports grew by 15.83% year-on-year to USD 16 million.

Jiaxing Fastener Export Highlights in H1

Major export destinations saw significant growth in value.

U.S., EU and Russia remained the Top 3 export markets for Jiaxing fasteners, accounting for 62.7% of the total fastener exports. The fastener exports to those three countries reached USD 290 million, up 36.47% year-on-year. Since EU fastener repealed anti-dumping duty imposed on Chinese fasteners, Jiaxing companies has resumed fastener exports to the EU gradually. In the first half of 2017, exports of fasteners to EU, U.S. and Russia were USD 105 million, USD 129 million and USD 56 million respectively, up 46.21%, 17.19% and 55.35% year-on-year respectively.

The export value increased year-on-year for most lead-

ing exporters. In the first half of 2017, 483 Jiaxing fastener companies had export performance, an increase of 114 companies year-on-year. There were 9 companies with an export value of more than USD 10 million, compared with 6 companies in the same period of 2016.

The general trade was still the main trading method. The export value by general trade in the first half achieved USD 439 million, accounting for 94.95 % of Jiaxing's fastener exports, up 1.71% compared with the same period of 2016.

The export price of major fasteners surged. In the first half of 2017, the average export price for the iron or steel fasteners increased by 11.16% to USD 1,145/ton; the average export price for the copper fasteners climbed 2.27% to USD 8,466/ton; the average export price for the aluminum fasteners decreased 34.9% to USD 2,958/ton.

North American Fastener Distributor Index for July 2017

Written by R.W. Baird analyst David J. Manthey

Key Takeaway:

The seasonally-adjusted FDI for July 2017 was 55.1 – decelerating slightly from June’s strong 60.8 reading but remaining well in expansionary territory. Similarly, sales momentum cooled off somewhat from a record reading in June, with a still very strong seasonally-adjusted sales index of 69.8 coming down vs. a record 86.6 last month. Commentary on market conditions was a bit more mixed this month, with some respondents continuing to see growth accelerating, while others noted a slight leveling off of activity. The FDI Forward-Looking Indicator also remains well in expansionary territory, registering a seasonally adjusted 62.9, but saw a modest deceleration vs. June (64.0).

Key Points:

About the Fastener Distributor Index (FDI). The FDI is a monthly survey of North American fastener distributors, conducted with the FCH Sourcing Network and the National Fastener Distributors Association. It offers insights into current industry trends/outlooks. As a diffusion index, values above 50.0 signal strength, while readings below 50.0 signal weakness. Over time, results should be directly relevant to Fastenal (FAST) and broadly relevant to other industrial distributors such as W.W. Grainger (GWW), and MSC Industrial (MSM).

July FDI decelerates slightly from June. The seasonally-adjusted July FDI (55.1) ticked down from June’s strong 60.8 reading, mainly driven by a slight moderation in sales momentum relative to a record June. In the July survey, 47% of respondents indicated sales were “better” relative to seasonal expectations, down slightly vs. June (64%). Relative to historical seasonal readings in the month of July, this month’s seasonally-adjusted sales index of 69.8 suggests selling conditions still remain very strong overall. Encouragingly, pricing was higher on a y/y basis for a majority of respondents (53%) – driving the FDI y/y pricing index to the highest level since August 2014. As it relates to customer inventory levels, most respondents believe inventories are relatively in line with expectations (70% of responses), while 30% indicated inventory levels are too low. This compares to June results of 48% and 44%, respectively, as well as 8% who viewed customer inventories as too high in June.

FDI Forwarding-Looking Indicator remains solidly in growth mode. The FDI Forward-Looking Indicator is based on a weighted average of four forward-looking inputs from the FDI survey. This indicator is designed to provide directional perspective on future expectations for fastener market conditions. July’s seasonally-adjusted Forward-Looking Indicator ticked down slightly to 62.9 vs. 64.0 in June. The Forward Looking Indicator averaged 49.7 during 2016, but has averaged 61.0 year-to-date in 2017. Given a solidly expansionary Forward-Looking Indicator and FDI, market conditions appear likely to remain in growth mode in the months ahead.

Manufacturing employment remains stable. Following a notably more bullish turn in hiring sentiment in May, respondents have indicated relatively stable hiring conditions for two straight months. 73% of distributors indicated hiring levels were unchanged relative to seasonal expectations, while 17% saw hiring pick up (vs. 21% in April, 47% in May, and 36% in June). This result in a FDI Employment Index reading of 53.3, down vs. June’s strong 68.0 reading but still coming in above the 2016 average (48.9). July’s US jobs report, meanwhile, came in solidly above expectations (+209,000 adds vs. +180,000 consensus). Domestic manufacturing employment was up slightly at +16,000 m/m, while average hours per work week for manufactur-

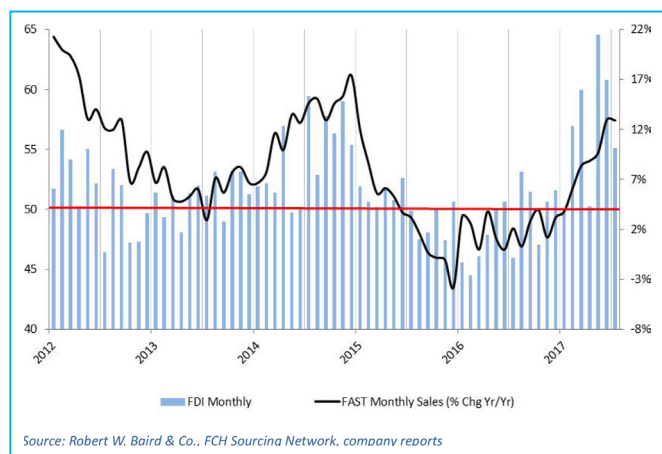

ing employees was flat vs. June (40.9 hours).

July sentiment somewhat mixed. Commentary on current market conditions was more mixed this month vs. recent bullish commentary. Some noted continued strong trends, while others are seeing a possible leveling off of activity levels after several strong months (although nevertheless still solidly higher y/y). As one distributor put it, “The last couple of months things have evened out... not the huge growth of the first several months, but absolutely higher sales than last year.” Another respondent characterized July as “slow compared to June,” while some attributed a loss of momentum to “more people [taking] time off” in July. Others continue to see consistently strong trends, noting “Sales are picking up and deliveries from some US companies are moving out!” The outlook for the remainder of the year remains largely positive, as 57% of respondents expect higher activity levels over the next six months vs. today, while just 3% expect lower.

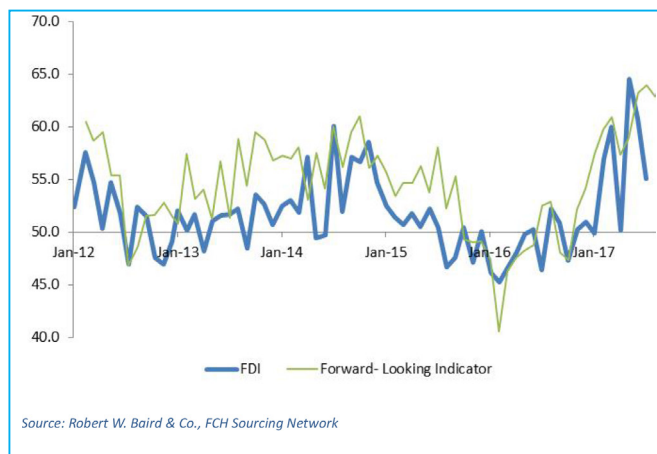

Fastener Distribution Trends: July 2017

FASTENER DISTRIBUTION AT A GLANCE										
July 2017										
	----- Index Values -----								Directiōn	Rate of Change
	Jul	Jun	May	Apr	Mar	Feb	Jan
