Dongtai Huawei Standard Component Corporation

One-Stop Supplier of Stainless Steel Fasteners

Established in 1992, Dongtai Huawei Standard Component Corporation is specialized in producing and exporting stainless steel fasteners, taking the geographical advantage of Dongtai, a well-known stainless steel base in China. It has fixed assets of over 100 million yuan, covering an area of more than 80,000 square meters and employing more than 300 people.

Dongtai Huawei's fasteners of "FL" brand is manufactured by stainless steel from the leading steel mills in China and tested by advanced automatic equipment. The company strictly sticks to the ISO international quality management system and the products can be produced according to the standards of GB, ISO, DIN, ANSI, BS and JIS in materials of stainless steel and carbon steel. In addition to the standard fasteners, it also can provide special fasteners, CNC precision parts, and precision castings according to customers' requirements.

Over the past 26 years, Dongtai Huawei has developed the corporate culture of "responsible, aggressive, progressive and innovative" under the leadership of its President Mr. Liu Fulin. Armed with the market-oriented management philosophy, practical and efficient management, state-of-the-art equipment, advanced technology and scientific quality assurance system, Dongtai Huawei has built a high reputation among customers at home and abroad for its quality products and best services. Over 40 percent of its products are exported to Europe, America, Japan, South Korea, Southeast Asia and many other countries and regions.

Nowadays, the fasteners produced by Dongtai Huawei have been widely used in fields of electronic communication, electrical power, construction, ships and yachts, railway, machinery, automobiles, etc.

Focus on Market Development, Provide Fastest One-Stop Support Services

It is learned that previously Dongtai Huawei gave priority to order production: the company set certain product specifications based on customer demand. In the face of the increasingly fierce competition at home and abroad, Dongtai Huawei has taken four measures to better develop the global markets:

1. Participate in diversified international fastener and related exhibitions, so as to develop the potential of emerging markets.
2. Calculate the fastener data by means of a variety of information tools, so as to get the latest market trends and provide strong support for production and storage.
3. Develop e-commerce platform construction and

cooperate with B2B websites, as the integrated platform data will lay a solid foundation for brand building.

4. Dongtai Huawei always adheres to the principle of quality first, and will continue to launch multiple and comprehensive promotions.

By sharing inventory data, Dongtai Huawei achieves quick transfer of goods and abundant inventory, so that the customers' requirements can be responded immediately, which implies that Dongtai Huawei has become a one-stop supplier of stainless steel fasteners and provider of fastener solutions for customers.

Attach Great Importance to Quality and Innovation

"Huawei fasteners, good!" Foreign customers highly praised Dongtai Huawei when they visited the plant.

Indeed, the high recognition should be contributed to its focus on details, quality and sincerity. The quality control begins from the source to delivery inspection, which is strictly supervised by rigorous inspection standards, advanced inspection equipment, and professional inspection technicians.

In 1999, Dongtai Huawei was the first company in Dongtai City that passed ISO 9001 international quality system certification. In December 2005, it obtained ISO14001 environmental certification. Its brand "FL" was awarded "Famous Trademark in Jiangsu Province" and "Well-Known Brand in Yancheng City". Furthermore, it has been awarded "Top 10 China Fastener Prestigious Brand" and has been titled "Trustworthy Company in Jiangsu Province" for many years. In 2015, it was awarded "Famous Trademark of China".

No innovation, no survival. In recent years, Dongtai Huawei has established an R&D department to make the product development and technique process run on a "fast track". On the one hand, it simplifies the process, so that the quotations can be sped up; on the other hand, it not only strengthens the quality and technique management, but also regulates the process operations as well.

Today, Dongtai Huawei is making every effort to enhance its R&D capability. In order to offer unique and competitive products for international customers, Dongtai Huawei introduced CNC processing center in 2015, providing

precision machining parts for customers. To improve its inspection standards, the company also replaced the old apparatus by the new precise quadratic elements video measuring instrument controlled by computers. In addition, the newly introduced dozens of automatic instrument lathes have substituted the previous manual controlled instrument lathes, so that the precision and efficiency are significantly increased. For example, one worker used to operate one machine, but now one worker can handle two or three machines with ease.

Combination of Internet and Manufacture

"Internet plus manufacture" has become a hot issue in the traditional manufacturing industries. In fact, for Dongtai Huawei started to launch online promotions on professional media (such as on www.chinaFastenerinfo.net) as early as 1998 and has established long-term business relations with buyers worldwide. In recent years, Dongtai Huawei has applied information technology in production, management, administration and R&D in order to improve production efficiency, reduce costs, improve product quality, and thereby enhance company competitiveness.

Looking to the future, Dongtai Huawei will further develop the global markets and increase customer satisfaction with excellent products. Moreover, with the spirit of continuous improvement, Dongtai Huawei will keep abreast of international standards and maintain its leading role in one-stop supplier of stainless steel fasteners! ♦

Shanghai Fast-Fix: To Be the Preferred Supplier of Fastening Solutions to Automotive Industry Worldwide

Shanghai Fast-Fix Rivet Corp. has 20 years of experience in production and export of blind rivets. Nowadays, it is one of the leading manufacturers of blind rivets in China, supplying over 4,000 different sizes rivets per IFI standard, DIN7337 standard and ISO standard. Covering an area of over 25,000 square meters, Fast-Fix has an annual production capability of around 2 billion pieces. The company is also ISO/TS16949 certified, as an OEM supplier for many European manufacturers.

Currently, export market represents 80% of Fast-Fix's total sales volume. Its blind rivets are exported to the well-known manufacturers and leading distributors in Europe and North America. For domestic sales, it focuses on high-end markets, like automotive industry.

Here China Fastener Info interviews Jason Wang, general manager of Fast-Fix to learn more about the rivet innovator and the company's plans for the future.

It is innovation that makes us stand out!

The competitive products of Fast-Fix are top quality structural rivets. For example, CUP-FIX rivet has high shear strength and tensile strength, with multi-grip capability. One CUP-FIX type can work to replace several standard grip fasteners and simplify the stock control. It also has good hole filling and sealing capability, providing strong vibration resistant joints with a visible lock. CUP-FIX is ideal for applications such as automobiles, vehicles, ventilation, ladders and cabinets.

Previously, Fast-Fix developed some new products, including

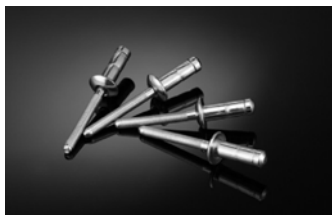

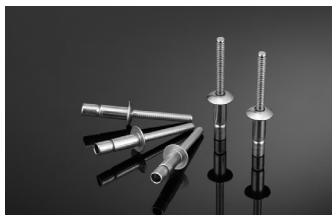

Stainless Steel SEAL-BULB Rivets, Plastic Tri-Fold type Rivets and Dia.10mm Steel CUP-FIX Rivets. These new products have filled the domestic gaps. And recently a new optical sorting machine has arrived, which will enlarge Fast-Fix's supply capability to automotive industry.

"Innovation is the driving force of our sustainable development," Jason said, "Our R&D department consists of highly skilled product designers and professional technicians. On average, we require 5 to 7 weeks to bring a new product to the manufacturing stage. Due to our ability to keep up with and anticipate changes in the industry, we maintain our leading role in the fastening field."

Nowadays, China's fastener industry is developing very fast during the process of economic globalization. Meanwhile, the requirement of products quality and related technologies are also much higher than before. "Simple imitation without innovation or new products development will not last long. It is innovation that makes us stand out from our competitors!" Jason noted.

It is perfect quality and professional service that allow us to be customers' sole supplier!

In addition to innovation, Fast-Fix also attaches great importance to quality, making sure that the quality of each size and every lot is under control, and all the products

are conformed to international standards and customer specifications. According to Jason, Fast-Fix keeps subsistent samples of every lot for at least one year, to track the products in case of any problem. PPAP is also available for customers from automotive industry. During communication with customers, Fast-Fix always does its utmost to provide prompt feedback. The employees can always send reply to customers within 24 hours.

When asked the tactics on customer maintenance, Jason was proud to say, "Many of our customers have a long-term partnership with Fast-Fix, including those which have worked with us for over 15 years. Stable high quality and smooth communication are the foundations of our long-term cooperation. One of our customers shifted from manufacturer to design provider. They nominated us as sole supplier of rivets for their design, and have introduced over 20 customers from different countries."

By supplying perfect quality and professional service, Fast-Fix is considered as one of the best manufacturers in China, especially in the field of high strength structural rivets. Today, more and more customers have nominated Fast-Fix as their sole supplier.

It is dream that leads us to go further!

"You have a dream, you got to protect it." Jason cannot agree with it any more. He said, "For it is dream that leads Fast-Fix to go further. Our mission is to provide professional blind fastening solutions to our customers with continuous innovation and improvement, and maximize our customers' value by supplying quality with on-time delivery and expertise. Our target is to be the preferred supplier of fastening solutions to automotive industry worldwide in the near future. I believe that if we protect our dream, we will embrace the future!" ♦

YuYao No. 2 Standard Fastener Factory YuYao Biaoer Trading Co.,Ltd.

A Reliable Partner For Eyebolts

Established in 1973, Yuyao No.2 Standard Fastener Factory has been committed to supplying eyebolts for over

15 years. As the pioneer and leader in making and exporting eyebolts in China, Yuyao No.2 Standard Fastener Factory has built a strong reputation both in the national and international markets.

The main products of Yuyao Biaoer are eyebolts, dog bolts and hinges for industrial use which are made of various sizes, lengths and materials. The spherical surface is very smooth. The factory constantly introduces state-of-the-art making machines and testing equipment so as to ensure the product quality and performance.

Yuyao No.2 Standard Fastener Factory always carries out the policy of customer-orientation. Every product launched is to meet customers' different needs.

"We encourage all our customers to audit our operations so we can be fully assessed for their quality systems and they can have first hand confidence in our capabilities. We also value their feedback in identifying possible areas of further potential improvement," Rory Ruan, general manager of Yuyao Biaoer says.

Thanks to decades of experience and cooperation with clients worldwide, Yuyao Biaoer has been one of the designated suppliers for SIEMENS and ABB. 60% of its products are sold to Germany, and the rest are to the US and other countries. 70% of its customers are end users while the remaining 30% are distributors. For its high quality, the eyebolts produced by Yuyao Biaoer are widely used in elevators, ships & machines, electric facilities, medical treatment, food processing device, and etc. Yuyao

Biaoer also plans to reinforce its marketing strength in Europe and the US in the coming years.

In addition, Rory Ruan notes that, "The most significant advantage of our company lies in the ability to accepting small-lot non-standard orders. For instance, we accepted a USD200 order from the logistics department of Malaysian Royal Air Force, which the cost of shipment was actually much higher than the cost of production. However, it can prove that many end users have confidence in and prefer submitting their order to factories directly."

The professional and rich experience of Yuyao Biaoer has helped the company experience an impressive development. Its commitment to quality and service has enabled itself as a reliable partner for eyebolts. In the next five years, Yuyao Biaoer plans to make further investment in the factory automation and serve its customers with shorter productive cycle and higher product quality. ♦

China plans tariffs on \$60bn of US goods, including fasteners

China is ready to levy differentiated additional tariffs on about \$60 billion of imports from the United States, if the latter further escalates trade frictions, the Customs Tariff Commission of the State Council announced late on August 3.

China plans to slap additional tariffs on 5,207 categories of US products with four levels of tariff rates, namely 25%, 20%, 10% and 5%.

These tariffs will become effective if the US further hinders the bilateral trade by renewing tariffs on more Chinese products, the commission said in a statement.

The commission stressed that China will adopt the above countermeasures to defend its lawful rights and interests, and curb the escalation of trade friction, as well as minimize the impact on its domestic production and people's living.

The announcement came after the Office of US Trade Representative announced on August 2 to consider increasing the proposed additional duty on \$200 billion of Chinese products from 10 percent to 25 percent.

Fasteners are on the list, including:

HS codes and products

Tariff rate of 25%:

73181200 Other wood screws

Tariff rate of 20%:

73160000 Anchors, grapnels and parts thereof, of iron or steel

- 73181400 Self-tapping screws
- 73181590 Other screws and bolts (whether with or without nuts or washers, not for civil aircraft maintenance and repair)
- 73182100 Spring washers and other lock washers
- 73182300 Rivets
- 73201090 Other leaf springs and leaves for springs, of iron or steel
- 73202010 Helical springs, of iron or steel, for railway locomotives and rollingstock
- 73209090 Other springs of iron or steel
- 74152100 Washers (including spring washers), of copper
- 74152900 Other articles, not threaded, of copper
- 74153390 Other screws, bolts and nuts, of copper or of iron or steel with heads of copper
- 74199110 Other articles of copper, for technical, cast, moulded, stamped, but not further worked
- 74199991 Other articles of copper, for technical use
- 74199999 Other articles of copper, not for technical use

Tariff rate of 10%:

- 73170000 Nails, tacks, drawing pins, corrugated nails, staples (other than those of heading No.83.05) and similar articles, of iron or steel, whether or not with heads of other material, but excluding such articles with heads of copper
- 73181100 Coach screws
- 73181300 Screw hooks and screw rings
- 73181510 Screws and bolts with tensile strength 800MPa or more (whether or not with their nuts or washers)
- 73181600 Nuts
- 73181900 Other threaded articles, not elsewhere specified or included
- 73182200 Other washers
- 73182400 Cotters and cotter pins
- 73182900 Other non-threaded articles
- 73194010 Safety pins of iron or steel
- 73199000 Other sewing needles, knitting needles, bodkins, crochet hooks, embroidery stilettos and similar articles, of iron or steel; not elsewhere specified or included
- 73202090 Other helical springs, of iron or steel ♦

China to raise export tax rebates on fasteners

China will raise export tax rebates for 397 products ranging from electronic items and some steel products to books, the finance ministry announced on September 7.

The move comes as a word is widely awaited on whether US President Donald Trump will impose tariffs on another 200 billion US dollars of imports from China.

To date, the US has imposed tariffs on 50 billion US dollars of Chinese products, and China has reciprocated.

On September 7, China's finance ministry said that the tax rebate rates, effective from September 15, for light-emitting diodes (LEDs), lithium batteries, multi-component semiconductors, machinery products, books and newspapers will be increased to 16 percent.

According to the statement, China will increase rebates for fasteners to 9 percent.

Adjustment of fastener export tax rebates

HS Code	Products	Rates
73181100	Coach screws	9%
73181200	Other wood screws	9%
73181300	Screw hooks and screw rings	9%
73181400	Self tapping screws	9%
73181510	Screws and bolts, with tensile strength 800MPa or more, whether or not with their nuts or washers	9%
73181590	Other screws and bolts	9%
73181600	Nuts	9%
73181900	Other threaded articles, not elsewhere specified or include	9%
73182100	Spring washers and other lock washers	9%
73182200	Other washers	9%
73182300	Rivets	9%
73182400	Cotters and cotter pins	9%
73182900	Other non-threaded articles	9%

Previously, the export tax rebates for fasteners were cut by 8 percent from 13 percent to 5 percent effective on July 1, 2007.

“This is in effect to negate the impact from US tariffs,” said Mei Xinyu, a researcher at a think tank affiliated with the Commerce Ministry.

China's export growth has exceeded analysts' expectations for the past five months, with some analysts believing Chinese exporters are rushing out shipments to beat fresh US tariffs. ♦

China's automobile imports surge in July

China's automobile and chassis imports witnessed strong growth in July thanks to government moves to lower tariffs for autos and auto parts.

The value of vehicle and chassis imports rose 66.1 percent to 48.46 billion yuan (about 7 billion U.S. dollars) in July, according to the General Administration of Customs.

China imported 165,000 vehicles and chassis in July, surging 266.7 percent from June and up 50 percent year on year.

In the first seven months of 2018, the total value of vehicle and chassis imports edged up 2.2 percent, while the amount was down by 3.1 percent year on year.

Automobile and chassis export value rose 35.3 percent in July and 17.9 percent in the first seven months.

China cuts the import duty on passenger cars to 15%, further opening a market that has been a chief target of the U.S. in its trade fight with the world's second-largest economy. The levy is lowered effective July 1 from the current 25% that has been in place for more than a decade, boosting shares of automakers from India to Europe. Bloomberg News reported last month that China was weighing proposals to reduce the car import levy to 10% or 15%.

A reduction in the import duty follows a truce between the Trump administration and Chinese officials as they seek to defuse tensions and avert an all-out trade war. While the levy reduction could be claimed in some quarters as a concession to President Trump and will be a boon to U.S.

carmakers such as Tesla Inc. and Ford Motor Co., the move also will benefit European and Asian manufacturers from Daimler AG to Toyota Motor Corp.

The import duty on car parts will be reduced to 6%, China's Finance Ministry said. The shift is significant more for its optics than its potential impact given imported cars made up only about 4.2% of the country's \$28.9 million in automobile sales last year. ♦

China sees fast growth in industrial robots production

The industry scale of China's domestically made robots has seen 20 percent annual growth in five years.

According to the China Robot Industry Alliance (CRIA), 131,000 industrial robots were domestically made in 2017. By the end of 2017, there were more than 6,500 enterprises engaged in robot production.

China also has employed the largest amount of industrial robots since 2013, said CRIA. The market shares of domestically made industrial robots fell for the first time in five years, shrinking to below 27 percent in 2017.

With the development and integration of information technology and artificial intelligence (AI), robots could be used both in the manufacturing industry and people's daily lives, president of Siasun Robot Qu Daokui said.

Wen Zhongmeng, president of Asage Robots, said visual and audio technologies could make robots useful in the education and medical industries. ♦

Steel sector makes headway in capacity reduction

China's steel sector made considerable progress in the reduction and elimination of excess industrial capacity during the first six months of the year, while its ongoing efforts to curb pollution continued to bear fruit, experts said.

During the first six months of this year, the nation produced 373 million metric tons of iron, 451 million tons of crude steel and 5.31 million tons of finished steel, up 0.5 percent, 6 percent, and 6 percent respectively on an annualized basis, according to data published by the China Iron and Steel Association (CISA).

CISA said that during the six month period, its members saw sales revenue surge by 15.33 percent year-on-year to 1.97 trillion yuan (\$290.6 billion), while net profit rose 151.5 percent to 139.3 billion yuan. The industry has also been able to lower the overall debt levels. ♦

China's new energy power generation sees faster growth

China reported faster growth in new energy power generation in June.

"The growth of electricity generated by new energy accelerated markedly, while thermal and hydro power saw slower growth," said Yan Pengcheng, spokesperson for the National Development and Reform Commission (NDRC), at a press conference.

In June, nuclear power generation increased 19.3 percent year-on-year, compared with 15.1 percent in May, according to NDRC data.

Electricity generated by wind and solar rose 11.4 percent and 21.1 percent, respectively, compared with 6.7 percent and 14.8 percent in May.

Thermal and hydro power output climbed 6.3 percent and 3.7 percent, respectively, down by 4 percentage points and 3.2 percentage points from May, Yan told reporters.

China is promoting new energy to cope with pollution and boost growth quality.

In the first half of the year, power generation increased 8.3 percent year-on-year, slower than the 8.5 percent growth in the first five months. ♦

Investment boost for car, aircraft makers

China's aim to further open up its aircraft and car manufacturing sectors will be beneficial for both local and foreign companies planning to increase their investments, said industry experts.

As part of the country's broader opening-up push, China will phase out the 50 percent equity cap for foreign aircraft and car manufacturers in joint ventures in China, effective on July 28, according to a statement jointly released by the National Development and Reform Commission and the Ministry of Commerce.

"This is significant positive news. It will be beneficial for the local manufacturing industry and high-tech aviation companies to expand their investments in China. It will

surely help to deepen the collaboration between foreign manufacturers and their Chinese counterparts," said George Xu, CEO of Airbus China. ♦

Taiwan fastener industry strengthens its position in the global automotive fastener supply

Taiwan fastener industry has been very active in recent years in business transformation to the development of products with higher added value. In terms of screws in particular, though the total export volume was lower than that of Chinese mainland, the percentage of automotive fasteners in the total export is expected to increase by 5%. The current quote for automotive fasteners per kg in Taiwan is USD 3.8, 35% higher than the average price of general parts and 164% higher than the average price of similar articles in Chinese mainland.

The total export volume and value of Taiwan's fasteners last year both reached a new high. The export volume in particular climbed to nearly 1.6 million tons and the export value reached nearly USD 4.3 billion. This year, with the recovery of the global economy, it is expected that the record will be broken again. The percentage of automotive fasteners in Taiwan's total fastener export is expected to increase from 30% to 35% and the price per kg is expected to reach USD 3.8 (higher than China's USD 1.7). ♦

EU applies retaliatory tariffs on US fastener imports

The European Union applies 25% “rebalancing” tariffs on a wide range of products imported from the United States, including seven categories of fasteners, effective from Friday 22nd June 2018.

The tariffs are in response to the Section 232 tariffs applied by President Donald Trump to steel and aluminium from the EU. Commissioner for Trade Cecilia Malmström said: “We did not want to be in this position. However, the unilateral and unjustified decision of the US to impose steel and aluminium tariffs on the EU means that we are left with no other choice. The rules of international trade, which we have developed over the years hand in hand with our American partners, cannot be violated without a reaction from our side. Our response is measured, proportionate and fully in line with WTO rules. Needless to say, if the US removes its tariffs, our measures will also be removed.”

The EU will rebalance bilateral trade with the US taking as a basis the value of its steel and aluminium exports affected by the US measures. Those are worth €6.4 billion. Of this amount, the EU will rebalance on €2.8 billion worth of exports immediately. The remaining rebalancing on trade valued at €3.6 billion will take place at a later stage – in three years’ time or after a positive finding in WTO dispute settlement if that should come sooner.

The EU rebalancing measures will be effective for as long as the US measures are in place, in line with the WTO Safeguards Agreement and EU legislation.

The list of products on which 25% tariffs will apply from Friday 22nd June include seven fastener CN codes. They are:

- 73181410- self tapping screws, of stainless steel
- 73181491- Spaced-thread screws of iron or steel, other than stainless
- 73181499- Other Self tapping screws of iron or steel
- 73181640- Blind rivet nuts of iron or steel, other than stainless
- 73181660- Self-locking nuts of iron or steel other than stainless
- 73181699- Nuts of iron or steel, other than stainless, with inside diameter ≤12mm
- 73181699- Nuts of iron or steel, other than stainless, with inside diameter >12mm ♦

Germany's billionaire 'screw king' tightens the screws on the U.S.: no more investment until Trump goes

One of the world's biggest suppliers of assembly and fastening materials, Germany's Würth Group, will not invest any more in the United States while President Donald Trump is in power, the patriarch of the Würth family has said.

Reinhold Würth, popularly known in Germany as the "Screw King," told the Sunday newspaper Bild am Sonntag that he had "made sure we are no longer investing in the U.S. at the moment."

"We make 14% of our annual sales there—€1.8 billion [\$2.1 billion]—but I do not want to increase our engagement in America any further," he said, explaining how he still made his presence felt at the privately-held company at the age of 83.

Würth said his reticence about further investment was based on the "general, uncertain political situation" in the U.S. "I said, we'll wait and see if President Trump is re-elected in four years," he told the paper. "Würth returns when he goes."

The billionaire's comments came just after President Trump imposed hefty tariffs on steel and aluminum imports from the EU, Canada and Mexico. According to U.S. figures, Germany is the source of 4% of American steel imports. Just over 2% of U.S. aluminum imports come from Germany.

Trump is also pushing for 25% tariffs on car imports, and seems particularly angry about German luxury cars having a place on American roads. Germany is Europe's biggest exporter of automobiles to the U.S.

Last November, the group bought Weinstock Bros, a venerable New York maker of supplies for the construction industry—the fifth transaction in three years for Würth Industry North America. A Würth spokesperson told Fortune that no additional acquisitions are currently planned in the U.S.

Würth Group closes first half of 2018 with sales of EUR 6.8 billion

Würth Group reported sales for the first half of 2018 of €6.8 billion (US\$7.9 billion), up 6.5 percent from the same period a year ago. Adjusted for exchange rates, sales growth even stands at 9.0 percent. The operating result increases to EUR 400 million.

Adjusted for foreign currency effects, growth comes to 9 percent. The companies in Germany achieved sales growth of 7.9 percent and total sales of €2.9 billion (US\$3.4 billion), while sales growth abroad amounted to 5.4 percent. The Würth Group's companies in Eastern and Southern Europe are still developing very well, reporting sales growth rates in the double digits.

"We still expect that we will be able to report sales and operating result records again in 2018, even if the ifo Business Climate Index has dropped slightly in June and economic forecasts are only cautiously optimistic," Robert Friedmann, chairman of the Central Managing Board of the Würth Group. ♦

Bossard sales grew 13% in 2018 first half

The Bossard Group continues its high-level growth. In the second quarter, the Group posted an impressive 15.1 percent sales growth to CHF 225.9 million after 10.9 percent in the first quarter.

Sales in the first half of 2018 rose by 13.0 percent to CHF 446.3 million. This boost in performance reflects the high growth in sales across all three market regions: Europe, America and Asia.

The results for the first half of 2018 also underscore once more the profitability-oriented growth strategy that Bossard is following: Excluding last year's extraordinary income of CHF 4,5 million net from a real-estate sale, net income in the first half of 2018 rose an impressive 20.4 percent to a new record high of CHF 49.0 million.

Business in Europe accounted for about 58 percent of total sales in the first half of the year and contributed substantially to the above-average performance. In Europe, the Bossard Group boosted sales by 16.7 percent to CHF 260.5 million (+10.4 percent in local currency).

The America business posted strong gains in the first half of the year as well. Sales rose by 4.5 percent to CHF 119.5 million, which translated into an even higher 7.7 percent in local currency.

In Asia, the investments made in past years to expand the distribution network continue to pay off. Sales in the first half of the year grew by a healthy 15.3 percent to CHF 66.3 million (+11.8 percent in local currency). China, the most important market in Asia, was a major contributor to this substantial increase.

The Bossard Group's high sales growth overall drove yet another marked increase in net income. The results, excluding last year's extraordinary income of CHF 4,5 million net from a real-estate sale, once again demonstrate that Bossard's profitability-oriented strategy is on the right track. On a comparable basis, net income rose by 20,4 percent to a new record high of CHF 49.0 million. ♦

NORMA Group to acquire water management company in India

NORMA Group signed an agreement to acquire equity of Kimplas Piping Systems Limited on 6th April, 2018. Kimplas is a leading manufacturer in India of world class electrofusion (EF), and compression fittings valves, and proprietary equipment for Micro-irrigation Industry. It was promoted by Mr. Krishen Khanna in 1996, and its revenues for FY 18 is INR 175 crores.

NORMA Group started operations in India in 2008 with a plant in Pune focusing on fluid handling and joining technology mainly for the automotive industry in India. NORMA Group has been expanding into the water management business since 2012 by making select acquisitions in Malaysia, Australia and the US. "It is of existential importance to provide people with resources such as water and gas," said Bernd Kleinhens, Chairman of the Management Board of NORMA Group. "We are expanding our expertise in water management solutions in the fast growing Indian market by adding Kimplas' leading products to our portfolio. ♦

Russia launches tariffs on U.S. as Kremlin calls Trump's move "protectionist"

Russia has raised tariffs on a handful of U.S. imports after the Kremlin condemned President Donald Trump's tariffs on foreign steel and aluminum as protectionist.

Speaking as Moscow approved new restrictions on U.S. road construction equipment, oil and gas equipment, metal processing and rock-drilling tools, as well as optic fiber, Russian Economic Development Minister Maxim Oreshkin said the move was a response to U.S. tariffs.

The U.S. move stems from a decision by Trump in March to charge Russia, and also Canada, the European Union, Mexico and others, more money to import steel and aluminum into the U.S. for "national security" reasons.

"The compensatory measures are applied in the form of additional increased rates of import duties in the amount of 25 to 40 percent of the value of the imported goods," Oreshkin said on Friday, according to Russian business newspaper Vedomosti. ♦

"Better Quality, Better Credit, Better Price"

Products

US hikes Section 301 tariff on Chinese goods to 25%, including fasteners

The Office of the U.S. Trade Representative announced that the Section 301 duty to be imposed on \$200 billion worth of Chinese goods, including fasteners, will be 25% instead of 10% announced on July 10.

The tariffs will not go into effect immediately but will undergo a review process till Sept.5.

Fasteners are on the list, including:

HTS US subheadings and product description

7316.00.00 Iron or steel, anchors, grapnels and parts thereof

7318.11.00 Iron or steel, coach screws

7318.12.00 Iron or steel, wood screws

(o/than coach screws)

7318.13.00 Iron or steel, screw hooks and screw rings

7318.14.10 Iron or steel, self-tapping screws, w/shanks or threads less than 6 mm in diameter

7318.14.50 Iron or steel, self-tapping screws, w/shanks or threads 6 mm or more in diameter

7318.15.20 Iron or steel, bolts and bolts & their nuts or washers, imported in the same shipment

7318.15.40 Iron or steel, machine screws (o/than cap screws), 9.5 mm or more in length and 3.2mm in diameter

7318.15.50 Iron or steel, threaded studs

7318.15.60 Iron or steel, screws and bolts, nesoi, having
shanks or threads less than 6 mm in diameter

7318.15.80 Iron or steel, screws and bolts, nesoi, having
shanks or threads 6 mm or more in diameter

7318.19.00 Iron or steel, threaded articles similar to screws, bolts, nuts, coach screws & screw hooks, nesoi

7318.21.00 Iron or steel, spring washers and other lock washers

7318.22.00 Iron or steel, washers (o/than spring washers
and other lock washers)

7318.23.00 Iron or steel, rivets

or holes o/6 mm in diameter

7616.10.90 Aluminum, screws, bolts, nuts, screw hooks,
washers and similar articles w/shanks, threads
or holes 6 mm or less in diameter ♦

Us ports fear tariffs could reduce ship traffic and jobs

Ports and ground terminals in nearly every state handle goods that are now or will likely soon be covered by import tariffs. Port executives worry that this could mean a slowdown in shipping that would have ripple effects on truckers and others whose jobs depend on trade.

The Associated Press analyzed government data and found that from the West Coast to the Great Lakes and the Gulf of Mexico, at least 10 percent of imports at many ports could face new tariffs if President Donald Trump's proposals take full effect.

Since March, the U.S. has applied new tariffs of up to 25 percent on nearly \$85 billion worth of steel and aluminum and various Chinese products, mostly goods used in manufacturing.

In New Orleans, port officials say a tariff-related drop in shipments is real, not merely a forecast. Steel imports there have declined more than 25 percent from a year ago, according to the port's chief commercial officer, Robert Landry.

The port is scouting for other commodities it can import. But expectations appear to be low.

"In our business, steel is the ideal commodity," Landry said. "It's big, it's heavy, we charge by the ton so it pays well. You

never find anything that pays as well as steel does."

The port of Milwaukee officials continue to worry, though, that Trump will make good on a plan to expand tariffs to an additional \$200 billion in Chinese imports — a list that includes fasteners, fish and other foods, furniture, carpets, tires, rain jackets and hundreds of additional items. Tariffs would make those items costlier in the United States. And if Americans buy fewer of those goods, it would likely lead to fewer container ships steaming into U.S. ports.

The impact will be felt keenly at West Coast ports like Los Angeles and Long Beach.

Los Angeles Mayor Eric Garcetti, relying on information from his port officials, said his port — the biggest in the United States — could suffer a 20 percent drop in volume if the additional \$200 billion in tariffs are imposed against Chinese goods. ♦

July marked Fastenal's 14th-straight month with at least 12% daily sales growth

Fastenal shared its July 2018 sales information on Tuesday, showing another strong month for the company.

The Winona, MN-based fastener and vending solutions provider had July sales of \$411.6 million, up 17.6 percent year-over-year (YoY) overall, with daily sales up 12.0 percent. June had sales of \$427.2 million.

It was the company's 14th-straight month with at least a 12.0 percent YoY increase in daily sales.

Fastenal plans to build new Mississippi Distribution Center By 2019. ♦

PennEngineering wins \$14m judgment against patent and trademark infringer

PennEngineering has obtained a \$14,000,000 judgment and permanent injunction against Dongguan Fenggang Pinconn Hardware Factory trading as “Pinconn,” based on Pinconn’s counterfeiting and infringement of more than 12 PennEngineering patents and trademarks.

In addition to being permanently restrained from selling the infringing products and being ordered to remove the infringing content from its website, Pinconn was ordered to pay PennEngineering \$14,000,000 for statutory damages. The final order has been recorded with Customs to prevent importation to the U.S. of Pinconn products.

The original complaint was filed against Pinconn on October 13, 2017, in response to Pinconn’s scheduled appearance at the Las Vegas International Fasteners Expo, where PennEngineering enforced against Pinconn a Preliminary Injunction Order issued by the U.S. District Court for the Eastern District of Pennsylvania, resulting in the removal of all of Pinconn’s signage, advertising materials, and infringing product at its trade show booth. The Preliminary Injunction also forced Pinconn to abandon its booth at the 2017 Design & Manufacturing Expo in Minneapolis.

As in the past, PennEngineering will continue to enforce its intellectual property rights worldwide. ♦

US July Fastener Distributor Index surges further, but indicates looming slowdown

R.W. Baird and FCH Sourcing Network released their monthly Fastener Distributor Index (FDI) for July, showing a second-straight month-over-month surge, while distributor commentary indicates concern over a looming market slowdown in the wake of tariffs.

The seasonally-adjusted July FDI showed a mark of 69.2, up 6.9 percentage points from June and up a whopping 14.1 points year-over-year. The index has jumped 12.8 points from the start of May following declines in five of the previous seven months. FDI’s seasonally-adjusted sales index soared 15.4 points from June to a July mark of 89.6, topping July 2017’s 86.6 as a new record.

According to the FDI, 68 percent of respondents indicated sales were better relative to seasonal expectations, compared to 59 percent in June and 54 percent in May.

Looking at other FDI metrics in July:

Employment index decreased to 64.7 from 68.5 in June
 Supplier Deliveries index increased to 83.8 from 77.8 in June
 Month-to-Month Pricing index dipped to 82.4 from 83.3 in June
 Year-to-Year Pricing index dipped to 89.7 from 90.7 in June
 Respondent Inventories index increased to 55.9 from 50.0 in June
 Customer Inventories index increased to 39.7 from 33.3 in June ♦

Largest US nail manufacturer ‘on the brink of extinction’ because of the steel tariffs

Steel tariffs could force the nation’s largest nail manufacturer to close or move to Mexico.

The Mid-Continent Nail plant in Poplar Bluff, Missouri, laid off 60 of its 500 workers last week because of increased steel costs. The company blames the 25% tariff on imported steel. Orders for nails plunged 50% after the company raised its prices to deal with higher steel costs.

The company is in danger of shutting production by Labor Day unless the Commerce Department grants it an exclusion from paying the tariffs, company spokesman James Glassman told CNN’s Poppy Harlow.

Mid-Continent Nail is “on the brink of extinction,” he said.

Glassman said the company might relocate to Mexico, where it could buy the steel without the tariffs — and then export the finished nails back to the United States without tariffs, which only apply to raw materials.

“It’s obviously an option,” said Glassman about moving to Mexico. “It absolutely is something this company does not want to do. It wants to save the jobs in Poplar Bluff, Missouri.”

Glassman called President Donald Trump’s trade policy misguided. He noted that the company had doubled its work force since 2013, and thrived despite increased competition from China.

About 21,000 US companies have filed for tariff exclusions. In a June 20 Senate hearing, Commerce Secretary Wilbur Ross said Mid-Continent had filed a request for an exclusion only two days earlier.

“I’m not belittling their situation at all. But given the importance of it to them, it’s very unfortunate that they waited all these weeks to file the request,” he said. “Under the authority we were granted, there is a process we have to follow.”

The US Chamber of Commerce has estimated that 2.6 million US jobs are at risk because of the Trump administration’s hard-line policies on trade, although that estimate includes the impact of ending NAFTA. A separate analysis by research firm Moody’s Analytics estimates that 2.4 million jobs could be lost by the end of 2019 just from the impact of tariffs.

The area of Missouri where the plant is located voted 80% for President Trump. Glassman said he can’t say whether people in town are still supporting the president.

“They are scared, they are worried about their families. It’s not like there are tons of other manufacturing jobs,” he said. “If I were a Mid-Continent worker, I would be extremely unhappy with what this administration is doing.” ♦

NFDA elects new president, board members for 2018-2019

Kelly Cole of Hayes Bolt & Supply (San Diego, CA) was elected as the 2018-2019 president of the National Fastener Distributors Association (NFDA) at the group's 2018 annual meeting June 5-7 in Chicago. Dan Zehnder of Trinity Logistics Corporation (Waukesha, WI) will serve as vice president; Bruce Hayes of Sems & Specials (Rockford, IL) will serve as associate chair; and Kevin Miller of Bamal Corporation (Charlotte, NC) will remain on the Board as immediate past president.

Four new Board members were elected to serve on the NFDA Board: Adam Derry of Field (Machesney Park, IL), Keven Simmer of Wurth DMB Supply (Des Moines, IA), Scott Somers of Mid-States Bolt & Screw Company (Flint, MI), and Bryan Wheeler of Star Stainless Screw (Wood Dale, IL).

Continuing on the NFDA Board are Rich Megliola of Vertex Distribution (Saint Charles, IL), Doug Ruggles of Martin Fastening Solutions (Florence, AL), and Jun Xu of Brighton-Best International (Santa Fe Springs, CA).

The NFDA 2018 Annual Meeting also included Executive Sales Planning Sessions and an economic update presented by Alan Beaulieu of ITR Economics.

Tribute was paid during the NFDA annual meeting to retiring Board members Kevin Godin of AFC Industries (Fairfield, OH), Adam Pratt of Sherex Fastening Solutions (Tonawanda, NY), Jennifer Ruetz of AIS-All Integrated Solutions (Franksville, WI), and Marc Strandquist of Wurth Industry of North America (Greenwood, IN).

During the annual business meeting, Kelly Cole gave an update on the association's activities during the past year and plans for the coming year, with a message of inclusion and a goal of reducing fragmentation that currently exists among industry associations. ♦

General Manager of Hayes Bolt & Supply (San Diego)

IFI names new managing director

The Industrial Fasteners Institute (IFI) is pleased to announce the appointment of Dan Walker, P.E. as the institute's Managing Director. The IFI Board of Directors announced the selection following a comprehensive search for a leader who understands the invaluable contributions the fastener industry makes to the North American economy, and who can provide strategic direction, motivation and new energy to the mission of IFI.

Walker comes from the Metal Building Manufacturers Association (MBMA), where he served in a number of technical roles over the years prior to being named the group's General Manager. Dan has over 20 years of trade association management experience, having also served as the Executive Director of the Concrete and Masonry Anchor Manufacturers Association (CAMA). Walker earned his Bachelor of Science degree in Civil Engineering from Cleveland State University, and he is a licensed Professional Engineer in the State of Ohio. His considerable association management experience will prove invaluable to IFI as they continue to grow and work on new initiatives set forth in their strategic plan for the benefit of the North American fastener industry. ♦

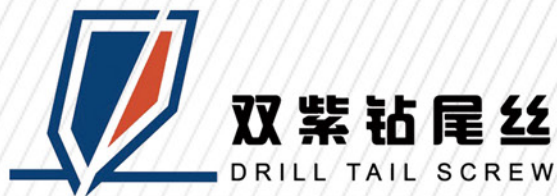

Taicang Chaoyi Fasteners Co., Ltd., founded in August 2001 in Taicang City, Jiangsu Province, is a Taiwan-owned enterprise with total investment of 10 million US dollars and registered capital of 5 million US dollars, covering an area of 15,000 square meters.

We have introduced a full set of advanced multi-station cold forging machines from Taiwan and are equipped with comprehensive testing instruments. We can produce non-standard bolts, nuts and shaft parts in various materials. In May 2015, we passed the TS16949 certification, so that we have rich experience in researching and developing automotive hardware products.

Our products are widely applied in many industries, such as vehicles, top-grade construction, electronics, electrical, power tools, bicycles, sports equipment, etc., supporting numerous well-known enterprises from home and abroad.

Adhering to the philosophy of "quality is our life", we will work hard and strive for a better future. Welcome to visit us!

“WIN EURASIA” 2018, organized by Deutsche Messe’s subsidiary Hannover Fairs Turkey, brought together the leading national and international companies of the sector at Istanbul in between 15th – 18th March. 4 days event, occupied 34,615 net sqm, brought together 1813 exhibitors from 22 countries with 75.368 visitors from 146 countries with an enormous international visitor increase representing 51.2 % compared with the 2017 WIN Eurasia editions. Top 10 visiting countries were from Turkey, Iran, Ukraine, Germany, Bulgaria, Saudi Arabia, Lebanon, Algeria, Egypt, Tunisia.

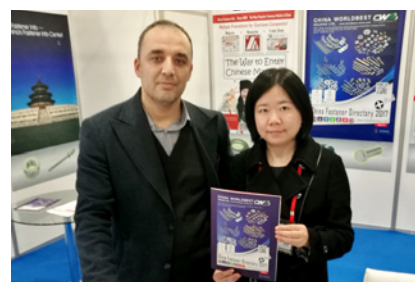

More over, significant visitor increase from Italy, United Kingdom, Poland, Russian Federation, South Africa, U.A.E and U.S.A compared with the previous years were one of the most remarkable record of the “WIN Eurasia”2018. Turkish

and international exhibitors from 22 countries such as Canada, Mainland China, France, Germany, Greece, India, Italy, Japan, Netherlands, Poland, Russia, Spain, South Korea and China Taiwan had the opportunity to introduce their advanced technology products to the whole industry at one stop. Over all halls, the backbone of the future, Industry 4.0, was shown in a huge variety and proofed once again that WIN Eurasia is the only event in Turkey where the future of the industry is to be seen.

The world's industrial giants competed to exhibit their latest technologies at the exhibition with its special areas and new applications offered as part of a new concept focusing on Industry 4.0. International firms exhibited their robot and automation technologies, IT solutions and software as well as network platforms at WIN EURASIA, which gathered all components of 360 degree manufacturing industry.

Technology investments have gained momentum with collaborations realized by Turkish industrialists in the exhibition organized with the concept of Industry 4.0. The visitors of WIN EURASIA had the opportunity to closely experience the technological developments such as automation, digitalization, internet of things, augmented reality and layered production. Over all halls, especially in Hall 14 many exhibitors, showcased Industry 4.0, the industry of tomorrow. For sure, WIN 2019 will show another step into the future.

Save the Date:
14 – 17 March 2019! ♦

The 3rd Manufacturing World Nagoya Sees a Great Success

The 3rd Manufacturing World Nagoya which was held on April 11-13, 2018 at Portmesse Nagoya, saw a great success.

According to the organizer, the show attracted around 1,140 exhibitors and 35,361 professional visitors from all round the world.

The concurrent shows included 3rd Design Engineering & Manufacturing Solutions Expo Nagoya (DMS), 2nd Factory Facilities & Equipment Expo Nagoya (FacTex) and 2nd Aerospace Technology & Component Expo Nagoya (Aero Tech).

China Fastener Info (CFI), as one of the media partners, attended the show with the popular *China Fastener Directory (CFD)* magazines (Hall3, 1-89), kicking off its 106th global trip.

Manufacturing World Nagoya is a

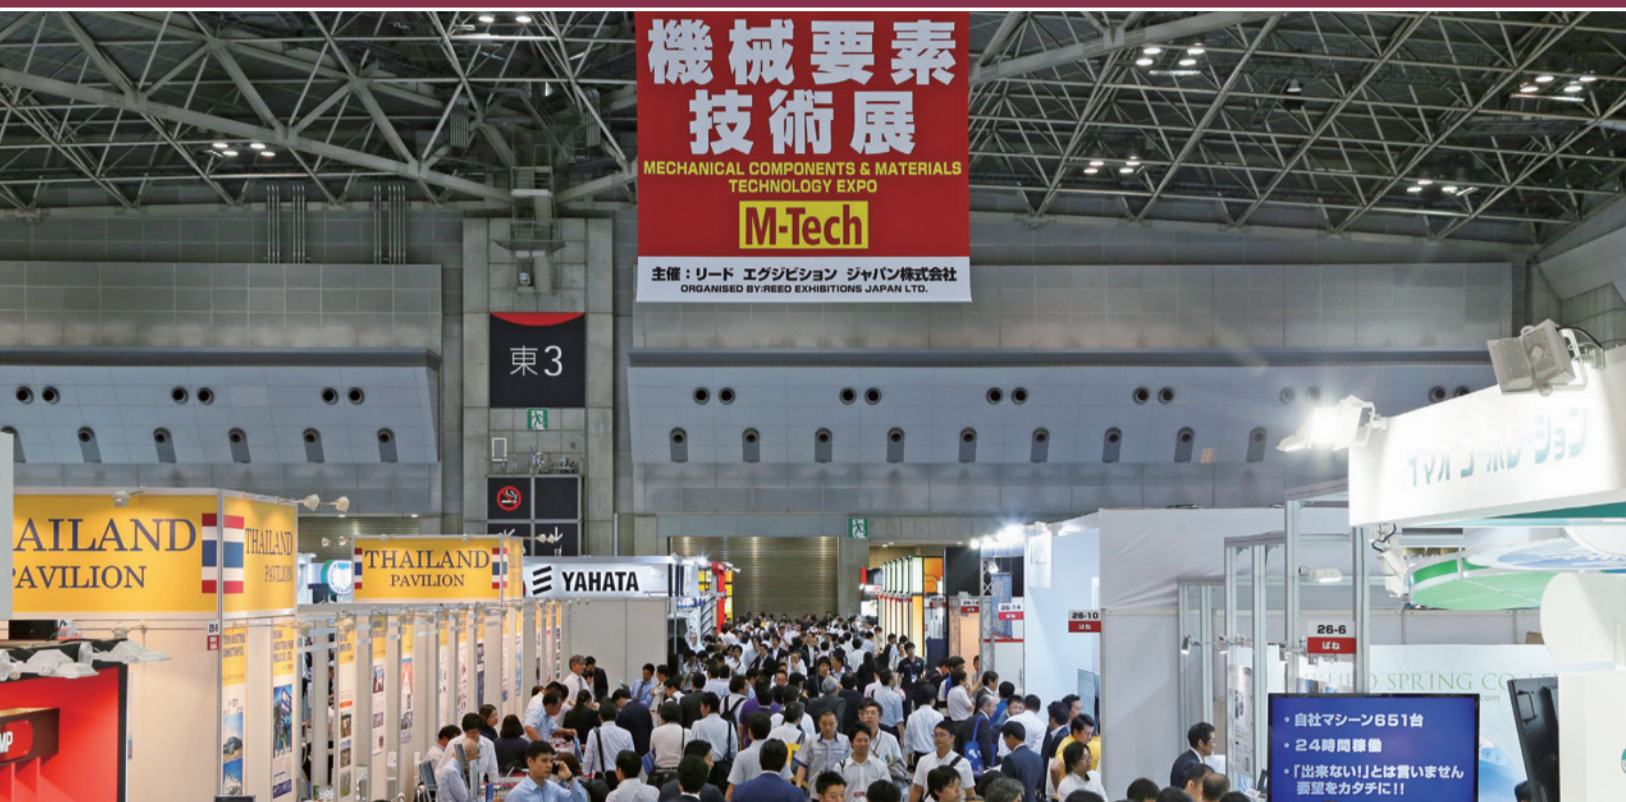

purely business to business trade show in Nagoya, specializing in the products, technologies and solution for manufacturing industry. All kinds of mechanical parts/subcontracting services (fasteners, springs, tube components, etc.), IT services (CAD, CAM, production management system, etc.), products/equipment for factory maintenance (factory facilities/equipment, energy saving products, etc.) and technologies/components for aerospace manufacturing (ultra-precision materials processing, mechanical parts, etc.) are exhibited under one roof. It is held in Nagoya which is one of the central areas of the Japanese manufacturing industry.

As with the decrease of population, labor force of Japan fell year by year which as a result lays a huge burden on companies for the increasing cost. To deal with the problem, Japan is eager to introduce the new philosophy

of “the fourth industrial revolution”. The government encourage companies to develop towards the high-end and intelligence. Thus most the exhibitors showed to visitors how their products were high level and intelligent. ♦

Following two successful days, the inaugural Fastener Fair USA, came to a triumphant close at the Huntington Convention Center in Cleveland, OH, USA on April 12, 2018.

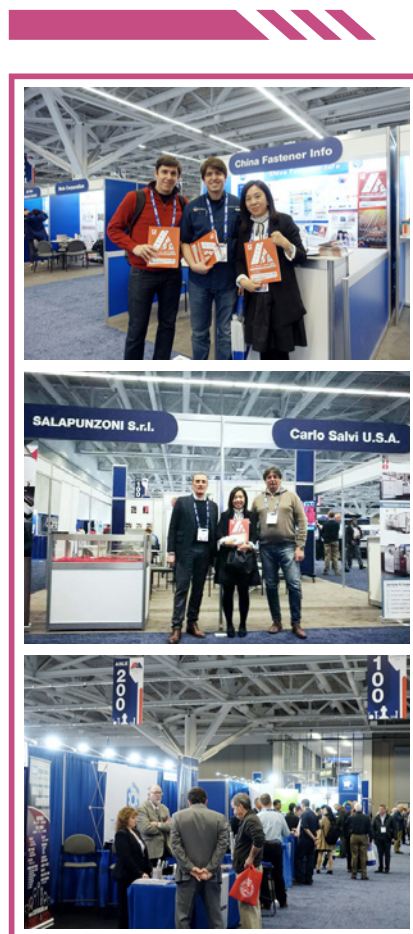

More than 2,000 registrants attended the show representing professionals from the entire supply chain, exceeding the expectations of the show organizer, Mack Brook Exhibitions, Inc.

There were over 250 exhibitors from 20 countries looking to connect with customers in the heart of the Midwest manufacturing region representing a variety of industries like distribution, automotive, aerospace, energy, civil engineering, and construction.

Fastener Fair USA focused on creating a premier event to bring together manufacturers, distributors, suppliers and end users in this fastener and joining technology exhibition.

"The feedback we have received from exhibitors and attendees has been overwhelmingly positive," said Jessica Boweak, Exhibition Manager for Fastener Fair USA. "The exhibitors were connecting with the people they wanted to meet and the education sessions offered unique value not seen at other fastener events. Many exhibitors are already planning their participation in 2019, with nearly 20% of the floor already reserved."

The next Fastener Fair USA will be held in Detroit, MI at the Cobo Center on May 22-23, 2019. ♦

JOINING THE INDUSTRY WITH **INNOVATION**

Make your next business connection at America's leading exhibition for the full industrial fastener supply chain. Get face-to-face with suppliers, distributors, manufacturers and engineers. wire 2018 and Tube 2018: order intake at wire, cable and tube trade fairs as good as in years

Investment has gone up worldwide – in infrastructure, the automotive sector, the electrical industry, regenerative energy projects and in oil and gas pipelines. And the upstream supplies industries wire, cable and pipes have substantially benefited from this development at the international No.1 trade fairs wire and Tube in Düsseldorf from 16 to 20 April 2018.

Across Germany steel and metal processing counts among the ten mayor sectors of industry. These sectors are strongly characterized by SMEs, by traditional growth and innovation. But even major groups of companies are now re-aligning their operations, following digital optimization processes and reorganizing their distribution channels, both nationally and internationally.

“As trade fair organizers we have

once again succeeded in offering the wire, cable and pipe industries a global platform in Düsseldorf as a Basis for Business,” delighted Joachim Schäfer, Managing Director at Messe Düsseldorf GmbH, after five successful days at the trade fair.

Orders for capital goods like machinery, plants and vehicles are very high and the German economy is very much benefiting from the positive global business climate. More than 71,500 trade visitors (compared to 69,500 in 2016) from 134 countries came to Düsseldorf over the five days to find out about industry innovations and conclude business deals at the world’s No. 1 trade fairs wire, the international wire and cable fair, and Tube, the international pipe and tube fair.

A total of 2,683 companies from 67 countries presented their technology highlights in 16 exhibition halls on

more than 117,000 square meters – some 7,000 square meters of space more than at the previous events in 2016!

Being the internationally leading communication and business platforms for their respective sectors participation in these two international top trade fairs is a must for all industry players. The steel and NF metal industries have always been reliable early indicators for all other industries – if things go well here, the economy as a whole will benefit.

wire 2018

Wire and cable machines, wire and cable production, trade with these materials as well as fibre glass technologies, mesh welding machinery, spring making, fastener technologies and the China Pavilion meet china’s expertise were presented in exhibition halls 9 to 16. A total

of 1,442 exhibitors from 53 countries showcased their innovations on space exceeding 65,000 square meters.

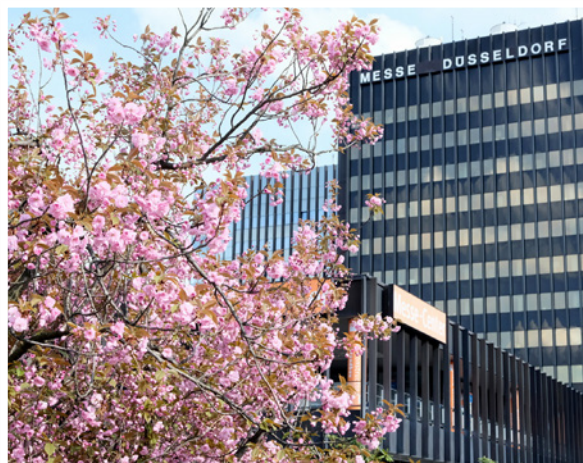

Most wire exhibitors came from the major producer countries Italy, Germany, Turkey, Great Britain, France, Spain, Austria, the Netherlands and Switzerland. From overseas many exhibitors from the USA, India, China Taiwan, South Korea and Mainland China travelled to the exhibition halls on the Rhine.

Tube 2018

The ranges at Tube 2018 encompassed pipe and tube materials, manufacturing, finishing, processing, pipe and tube accessories, trade and forming technology including profiles, plastic tubes, machinery and plants as well as the China Pavilion meet china's expertise. Tube was held in Halls 3 to 7a, 7.0 and 16 to 18 occupying in excess of 52,000 square meters of exhibition space. 1,241 companies from 57 countries were presented.

At Tube most exhibitors hailed from Italy, Germany, Turkey, Spain, the Netherlands, Great Britain, Switzerland, Austria and France. Most overseas exhibitors travelled from the USA, Mainland China, India, South Korea and China Taiwan to Düsseldorf.

30 March to 3 April 2020 will see wire and Tube held again together at the Düsseldorf exhibition centre. For current information on both trade fairs visit the internet portals at www.wire.de and wwwTube.de. ♦

2018 Taiwan International Fastener Show Successfully Opens

The 5th Taiwan International Fastener Show (FASTENER TAIWAN) was unveiled at Kaohsiung Exhibition Center on April 10-12, 2018.

FASTENER TAIWAN is the only international B2B fastener show in Taiwan, serving as a trading platform for sourcing and procurement, drawing more than 410 exhibitors using 1,100 booths to showcase their latest products with innovative and integrated strengths.

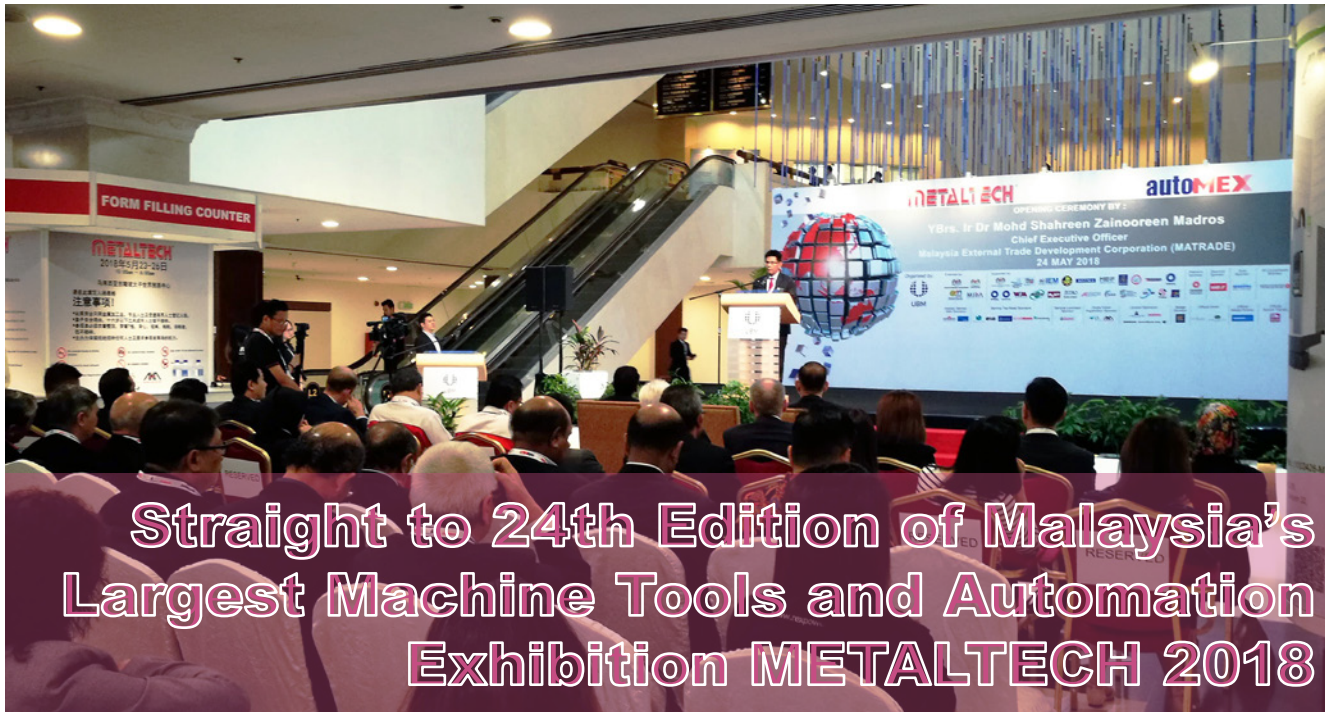

China Fastener Info (CFI) as one of the media partners attended the show. The all English-version magazine, China Fastener Directory (CFD) was quite popular onsite.

Taiwan is renowned for its 60-plus years of fastener manufacturing history and has always been a stable supplier in the fastener industry, earning the global reputation as “the kingdom of screws.”

The unique industrial clusters that synergize every facet of fastener related supply chains allow these products gain great popularity throughout the world for their prompt delivery, excellent quality and competitive utility.

In addition to its well-rounded exhibits, FASTENER TAIWAN was packed with abundant activities, including Global Fastener Summit, VIP Dinner, 1-on-1 Procurement Meetings, and Talent matchmaking. All served as networking hubs for buyers, exhibitors and industry players to interact, explore future business opportunities and share market trends. ♦

Straight to 24th Edition of Malaysia's Largest Machine Tools and Automation Exhibition METALTECH 2018

The 24th edition of METALTECH, Malaysia's leading metalworking and machine tools exhibition, and the 11th installment of AUTOMEX, the pioneering automation technology showcase, were successfully held during 23-26 May 2018 at the Putra World Trade Centre in Kuala Lumpur. China Fastener Info participated the show as media partner (Hall 1, 1405).

Newly acquired by global B2B event organizer UBM, METALTECH took a big step forward this year in joining UBM's Machine Tools Series of events across Southeast Asia, which includes the like of Manufacturing Indonesia, MTA Vietnam, Intermach Thailand and MTA in Singapore. Future synergies across the five regional trade fairs is set to open doors to exciting new opportunities for exhibitors and visitors alike.

METALTECH's sister exhibition AUTOMEX was once again a key exhibition highlight, as it showcased a gamut of the latest technologies related to robotics innovations, automation and more. AUTOMEX ran in Hall 6 with additional pavilions in Hall 4.

METALTECH and AUTOMEX have also premiered their biggest ever live demonstrations and product showcases at this year's event.

METALTECH debuted its first live manufacturing process setup entitled 'End-to-End Solutions in Smartphone Manufacturing Processes' in Hall 4, which aimed to highlight how Precision Engineering, Collaborative Robots, and Artificial Intelligence (AI) have enabled breakthroughs in smartphone manufacturing. The setup features ten companies collaborating to form the manufacturing process.

Meanwhile, AUTOMEX featured its own groundbreaking product showcase entitled 'Innovative Robotics Display' at Hall 6, which highlighted an impressive array of innovations from three highly progressive companies.

The next edition will be held during May 15-18, 2019 at new venue Malaysia International Trade and Exhibition Centre (MITEC), Kuala Lumpur, Malaysia. ♦

New Concept of the Smart Factory at “Vietnam Manufacturing Expo 2018”

The 2018 edition of **Vietnam Manufacturing Expo** closed its curtain on August 10, 2018 with over 7,933 industrialists and part makers who came to find the right technologies for their smart factories and utilize them to further upgrade the productivity and capacity of Vietnam’s manufacturing and supporting industries. China Fastener Info, embarked on its 111th global trip by exhibiting at the exhibition as media partner (Booth No. M06).

According to the statistics from China customs, China exported 62,814 tons of fasteners to Vietnam in 2017, accounting for 2.2% of the total export volume. In terms of export value, the fasteners that China exported to Vietnam valued 134,173,981 US dollars, taking up 2.7% of the total export value. Vietnam has become the 8th biggest export market for China’s fasteners, ranking the first among the ASEAN countries.

According to Capgemini’s Digital Transformation Institute, in the next five years, smart factories may contribute as much as \$500 billion in added value to the global economy. Smart technologies offer a significant competitive advantage for manufacturers, such as increasing output, quality, and consistency. But they’re not easy to implement. **Mr. Suttisak Wilanan, Deputy Managing Director of Reed Tradex** said that “76% of manufacturers have an ongoing smart factory initiative or are working towards one, only 14% are satisfied with their level of success. However, manufacturers should not feel overwhelmed, especially

for an early stage of manufacturing development’s country like Vietnam and those embarking on their journey should not change too much too soon or do so without the proper counsel”.

For this reason, this year, from **8 – 10 August**, “**Vietnam Manufacturing Expo 2018**” with over 200 leading brands and experts in the industry from over 20 countries, 4 international pavilions from Japan, Singapore, Thailand and China Taiwan, concentrated to provide the technologies, solutions as well as the practical experiences about smart factory to support Vietnam manufacturers to overcome early-adoption challenges of Industry 4.0.

Universal Robots which is the world’s first company create commercial Collaborative robot (or cobot) successfully, joined “**Vietnam Manufacturing Expo 2018**” with the vision to introduce a robot that could serve as a tool for factory workers. **Mrs. Shermine Gotfredsen – General Manager, Universal Robots in Southeast Asia and Oceania** shared,

“Some manufacturers have had mechanical systems in place for over 50 years. In the recent competitive industry, it is important that manufacturers take advantage and replace outdated machinery effectively, not just upgrade it. For this reason, we decided to cooperate with Reed Tradex to hold 'Cobot Showcase' at Vietnam Manufacturing Expo 2018 to help Vietnam manufacturers have a best understanding about Cobot, its capacities and how to apply it in the production chain in the most efficient, economical and safely way.”

Beside of Universal Robots, there were the presentative of leading brands in robotics and automation such as Hiwin, Kuka (Vieweg), ABB (Weldcom) and OTC (New century)...

Metrology technology was another critical technology which was showcased to support for the concept of smart factory at “Vietnam Manufacturing Expo 2018”. **Mr. Nguyen Thanh Dat, Sales Leader of Keyence Viet Nam Co., Ltd** shared that it's time for Vietnam - one of the most promising markets in ASEAN for manufacturing and industrial works – needs to prepare to meet the ever-changing demands in the market. “There is a need for more new requirements for human capital in the wake of Industry 4.0. A nurtured and invested tech-savvy population will be equipped to operate IoT technologies or smart factories that are deployed in various business operations.”

Nikon and Hexagon were another metrology technology providers who also joined “**Vietnam Manufacturing Expo 2018**” to share about the new innovations and applications to ensure that a machining process is within specification and that the resulting part meets the design requirements of fit, form and function.

At “**Vietnam Manufacturing Expo 2018**”, special activities with a wealth of knowledge and skill trainings was available. The organizer provided “**Shows in Show**” activity which was guided tour for all participants to easily access to state-of-the-art technologies, machinery, and solutions whether it be parts, components, inspection, welding, robotic technologies and much more at the exhibition. The “**Welding Competition**” came back again, continued to encourage Vietnamese welders to develop their welding skills, as well as update new trends in market.

“**Vietnam Manufacturing Expo 2018**” coordinated with local experts and association such as Vietnam Electronic Industries Association (VEIA) and Vietnam-German Technology Transfer and Training Center (HwC) to organize the VME Forum. Many subjects was discussed, such as “Market development and industrial products commercialization in the context of integration”, “Situation and prospects of production and export of electronic products and components in Vietnam”, and many more. Over 300 delegates attended to plan and adapt these new knowledge to benefit their business efficiency in the future.

Next year, **Vietnam Manufacturing Expo** will take the return from **14 - 16 August, 2019**, again at Hanoi International Center For Exhibition (I.C.E). More information can be found at: <https://www.vietnammanufacturingexpo.com/> ♦

Manufacturing Expo 2018: the Industry is now on fast track to Thailand 4.0

Manufacturing Expo 2018 was successfully held at BITEC, Bangkok, Thailand during June 20-23, 2018. The expo was consisted of 6 specialized shows, namely InterPlas Thailand 2018, InterMold Thailand 2018, AUTOMOTIVE MANUFACTURING 2018, SURFACE & COATINGS 2018, ASSEMBLY AND AUTOMATION 2018, and ROBOT X ME.

Once again, “Manufacturing Expo” as ASEAN’s leading machinery and technology event for manufacturing and supporting industries, delivered unique technology demonstration experiences, which continued to create an incredible buzz for 90,769 industrialists in Thailand and Southeast Asian countries. Diverse world-class technologies gathered to unveil solutions to achieve productivity with speed, efficiency and durability for the age of Industry 4.0. Knowledge was abundant as seen from visitors participating in seminar sessions and activities.

DINGTOUR

海盐鼎拓五金有限公司

HAIYAN DINGTOUR HARDWARE CO.,LTD.

DINGTOUR Hardware is a manufacturer & exporter of various machine parts. It's located in Haiyan county of China. We have excellent capability and ability to produce standard and complicated products with advanced equipment and technology. Our team has over 8 years exporting experience in the hardware industry, so we could manufacture fasteners according to customers' requirements.

We provide many kinds of threaded parts by forging machines, and most products are applied to hydraulic system, automobile industry, machinery and other fields. Our products are well sold all over the world.

WIN-WIN is DINGTOUR's business philosophy, we are planning to build an integrated supply chain with various factories. Vast manufacturing capability, advanced information system, strict quality management and humanistic solution are our advantages.

Welcome to visit us!

As a professional manufacturer of parts, we focus on improving quality+price+service

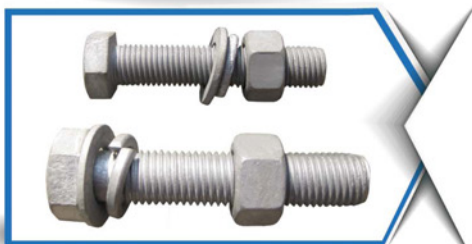

NO.83 DAMAJIN, WUYUAN TOWN, HAIYAN, CHINA 314300

TEL: +86-573-86059446

FAX: +86-573-86059448

Handan Ruiqiang Fasteners Manufacturing Co., Ltd.

Our main products are hexagon bolts. Meanwhile, we also offer customized products including bolts with reduced shank, tower bolts, carriage bolts, threaded rods, studs, galvanized bolts, HDG bolts, DIN (931, 933, 934), and matched nuts, which can meet DIN, BS, ANSI, JIS standards. We can also produce a variety of special-shaped bolts.

Taiwan's Fastener Exports Set Record High in H1

Taiwan fastener exports did well in the first half of this year, setting new records in export volume, price and value.

The export volume of fasteners in the first six months of 2018 totaled 83,0299 tons, up 5.65% from the previous period. The average export price was USD 2.866 per kilogram, up 10.63%, and the export value was USD 2.379 billion, a significant increase of 16.89%.

Since last year, the growth of the American and European economy, coupled with increased demand from overseas markets and raised steel prices, led to China Steel Corp raising the price of wire rods, which provides the drive for Taiwan's fastener export to hit new records. The annual performance of Taiwan's fastener exports for the full year is likely to set new high record again.

Main Exporting Destinations of Taiwan's Top 10 Fastener Products (Including Steel Nails) in the First Half of 2018

Country	Volume (KG)			Value (USD)			Average Price	YOY Change

Japan's Fastener Import & Export Analysis during 2013-2017

By Sharareh Shahidi Hamedani

Japan as the most famous industrialized country in Asia imported 870 million USD worth of fasteners from different countries and the value of its exported fasteners was about 2.87 billion USD in 2017. Based on these statistics, the value of Japan's exported fasteners is more than 300% higher than that of its imported fasteners. Japan is thus called a self-sufficient country in the fastener industry.

Values are in thousand USD

	2013	2014	2015	2016	2017
Imported Fasteners to Japan	930,771	916,336	822,642	804,834	870,525
Growth Rate		-1.6%	-10.2%	-2.2%	8.2%
Exported Fasteners from Japan	3,056,492	2,843,732	2,475,374	2,677,178	2,870,817
Growth Rate		-7.0%	-13.0%	8.2%	7.2%

It seems that between 2013 and 2015 Japan reduced its fastener prices (This decision could be related to its reducing GDP during the years). Statistics show that this strategy was not successful.

The value of imported fasteners decreased by more than 10% and the value of exported fasteners dropped by 13.0% in the period of price reduction. Japanese suppliers could recover their market in 2016 again, when they left this strategy.

In terms of fastener import, the main partners of Japan are Mainland China, China Taiwan and USA. These 3 regions have represented about 77% of Japan's fastener import market. Mainland China's market share is more than 35%; China Taiwan supports more than 26% of the fastener users in Japan and USA is ranked in the 3rd place. US fastener producers support more than 16% of Japan's fastener import market. Other countries altogether support 22.9% of Japan's fastener import market.

In terms of fastener export, Mainland China is the first market for Japanese fastener producers, while USA and Thailand are respectively ranked the 2nd and the 3rd market. These 3 countries bought about 60% of Japanese total fastener export. Statistics show that the average price of Japanese exported fasteners is between 8 to 9 USD per kilogram. ♦

Poland's Fastener Market in a Big Growth

Dr. Marek Langalis, Editor-in-Chief of Polish Fastener Magazine

One of the former Polish prime ministers, a dozen or so years ago, said that in Poland large global manufactures are setting up only assembly plant. For the fastener business you cannot expect better news. The biggest number of fasteners is being used during the assembly process.

Business in Poland

Today fastener business in Poland is on one of the most impressive growth in Europe. Thanks to good industry result demand of bolts, screws and nuts is growing year by year. In 2017 year industrial manufacturing had a growth of +7,3% (construction was even better with +12,1%) and in 2016 it was +4,2%. In February this year Poland was chosen by the U.S. News as the 3rd best country to invest in the world (1st was Philippines and 2nd Indonesia). Poland's GDP is growing every year since 1992 with yearly average 4,1% (and 4,7% in 2017 yr). Thanks to that GDP per capita now is at the level of 29 thousand USD and in 1992 it was only 6 thousand USD. Such a stunning success was achieved thanks to the huge entrepreneurship of millions of Poles. In a country where 16,5 million people work (out of 38 million of all inhabitants), 1,5 million active enterprises operate. It is these hard-working people that led the country, in just one generation, to a situation where young people from other countries (mainly from Belarus and Ukraine) are coming to Poland more and more willingly to work (unemployment rate in Poland is below 5%). Small and medium-sized enterprises employ 70% of employees from all companies. Thanks to that economy of Poland is flexible, independent and capable of defending against external crises (when the whole world suffered in 2009, the Polish economy grew at a rate of 2,8%). What is very important - Poland has its own currency, the Polish zloty (PLN), which allows it to pursue an independent monetary policy to the European Union. During the financial crisis of 2008-2010, the Polish zloty weakened by up to 40%, stimulating the increase in profitability of export.

Fastener Industry

According to mine calculation in Poland there are 1500 companies working in the fastener business. There are dozens of small trading companies (below 6 employees) working in their region. But there are also a big producers with export all over the Europe. Production of fasteners in Poland is shown in table 1 (1 EUR = 4,2 PLN; 1 TYR = 0,85 PLN). Since 2003 Polish production has almost triple. Main production is being made for the metal screws, bolts, special products and screws for wood and window.

Table 1: Production of fasteners in Poland in 2003-2016 (PLN million)

2003	2004	2005	2006	2007	2008	2009
595	792	890	859	910	946	795
2010	2011	2012	2013	2014	2015	2016
1076	1521	1456	1355	1421	1370	1520

Polish production of fasteners cannot fill the domestic consumption. Therefore import is very developed. From 2003 to 2016, Polish import has increased almost threefold (look at table 2). The largest import was recorded in 2016, it has already exceeded the value of PLN 2,8 billion. Import is growing almost the same as domestic demand.

Table 2: Import of fasteners to Poland in 2003-2016 (PLN million)

2003	2004	2005	2006	2007	2008	2009
893	1167	1163	1482	1647	1693	1581
2010	2011	2012	2013	2014	2015	2016
1889	2298	2163	2189	2434	2588	2836

Biggest source of import comes from Germany. Almost 30% of all fasteners to Poland are coming from the western neighbor. Next is China Taiwan, Italy and Mainland China. Especially import from Mainland China is growing year by year. For the 2016 year Turkey was on the 16th place. It means that international trade with Poland is at a low level, and Turkish companies do not properly use the potential of the Polish market.

Table 3: Import of fasteners by country to Poland in 2015-2016 (PLN million)

Country/Region	2015	2016	Together	% of the Poland's import
Germany	752,2	861,7	1 613,9	29,8%
China Taiwan	300,8	298,6	599,4	11,1%
Italy	246,1	278,0	524,1	9,7%
Mainland China	247,0	263,3	510,3	9,4%
USA	117,7	154,8	272,5	5,0%
France	86,1	91,8	177,9	3,3%
Japan	82,0	91,6	173,6	3,2%
Vietnam	89,8	74,5	164,3	3,0%
Czech Republic	51,7	78,3	130,0	2,4%
Sweden	75,1	52,9	128,0	2,4%
South Korea	57,7	67,3	125,0	2,3%
Slovakia	62,5	61,2	123,7	2,3%
United Kingdom	56,6	56,6	113,2	2,1%
Spain	49,1	61,1	110,2	2,0%
India	41,5	46,0	87,5	1,6%
Turkey	N/A	32,9	—	—

Poland is a very important distribution center on the Central and Eastern European fastener market. Since 2003, export has increased four times, reaching a record 1,4 billion PLN in 2016 (table 4). What is worth it noted, Poland is still gaining more markets. Biggest growth was just after the introduction of anti-dumping duties by the European Commission for Chinese fasteners. From 2009 to 2011, Polish exports increased as much as 73%, which in a way can confirm the thesis that many companies in Europe have shifted purchases to Poland.

Table 4: Export of fasteners from Poland in 2003-2016 (PLN million)

2003	2004	2005	2006	2007	2008	2009	2010	2011	2012	2013	2014	2015	2016
359	513	546	594	700	725	617	829	1073	1057	986	1159	1336	1409

The largest clients of Polish fasteners are Germany and the United Kingdom (table 5). What is important, by gaining access to Polish distributors, You can also gain access to smaller markets, such as the Czech Republic, Slovakia, Romania and Hungary, which traditionally source in Poland. Polish companies are already large enough and well organized to import good amounts from Asian markets and buy from specialized producers in Europe.

Table 5: Export of fasteners by country from Poland in 2015-2016 (PLN million)

Country/Region	2015	2016	Together	% of the Poland's export
Germany	480,1	555,7	1 035,8	37,7%
United Kingdom	103,0	116,5	219,5	8,0%
Czech Republic	80,1	77,1	157,2	5,7%
France	68,6	80,9	149,5	5,4%
Sweden	71,2	67,4	138,6	5,0%
Slovakia	37,2	51,9	89,1	3,2%
Russia	42,3	46,6	88,9	3,2%
Romania	35,9	43,5	79,4	2,9%
Hungary	37,1	38,9	76,0	2,8%
Belgium	32,9	38,5	71,4	2,6%
Norway	30,7	30,7	61,4	2,2%
Netherlands	25,6	28,7	54,3	2,0%
USA	27,5	20,7	48,2	1,8%

Quality - What the companies in Poland particularly pay attention to is, of course, quality. On the construction market, it is important to have the CE mark or the Polish construction sign B. Without this, it is impossible to handle large investments. The certificate required by the automotive ISO / TS 16949 in Poland has about 500 companies TIER-1 and TIER-2. In addition to quality, the price-availability - lead time relationship is also important. What is a big advantage of Turkish manufacturers for Poland is the time and cost of delivery. Also - there are no customs duty on most fasteners between Turkey and Poland.

The culture of doing business in Poland makes face-to-face contact the most important. We have a saying in Poland, 'No matter what you know but important who you know'. This is why – if you want to have a business in Poland – You have to meet right people at the right place. ♦

Brazilian Fastener Import Growth of 9.2% in 2018

Fastener import: Monthly average	Value	On tonnes
2017	US\$49,63 million	9.349,36 t
2018	US\$56,57 million	10.212,28 t

Of course the effects caused by the transports sector strike that occurred last May, are not being consider, however, the activities in Brazil continue oscillating, but continue growing. Whoever disagrees, should consult our source, the Ministry of Industry, Foreign Trade and Services (MDIC).

As it produces more, the country consumes more, which expands activities for all including the consumption of fasteners, whether produced domestically or imported.

The monthly average of fasteners imported (by tons) in 2018 exceeds those imported in 2017 by 9.2%, and the same is happening in monetary values, with 13.98% of purchases in US dollars.

Dividing the total registered by the MDIC, in the year 2017, a little more than US\$595.55 million or some US\$49.6 million/month was destined for this importation segment, which corresponds to some 112,192 tons or 9349 tons/month.

From January to May 2018, the MDIC recorded US\$282.85 million (US\$56.57 million/month), corresponding to 51,061,192 tons (10,212 tons/month).

The upcoming audits will show how much the transport strike has rocked the market. Historically, the year's second half economy in Brazil is better than the first half, and if this scenario is maintained, the second half will be good, especially if we compare the clouded and recent times.
