ZCCF TUNGSTEN CARBIDE

**LEADING TECHNOLOGY
TOP QUALITY**

Changshu ZCCF Tungsten Carbide Science&Technology Co., Ltd. was established in 2010 and now has a 20000-square-meter workshop. It is located at No.4 Xiaoshanjiang Road, Zhitang Town, Changshu, Jiangsu Province, China. ZCCF Tungsten Carbide is a high-tech enterprise dedicated to researching, producing, and marketing of various tungsten carbide mold products such as cold heading dies, warm heading dies, hot heading dies, powder metallurgy, precision forging dies, extrusion dies, stamping dies, stretching dies, tube drawing dies, and various tungsten carbide mold materials which are used in various mold industries.

Over the past decade, ZCCF Tungsten Carbide has assembled an excellent technical team with 20 years of experience in the cemented carbide industry. Adopting the mature production technology from Japan and introducing the most advanced production equipment and testing instruments from home and abroad, we have focused on technological innovation and obtained several national invention patents. Through technological innovation and optimisation of product performance, our company has gradually become a modern enterprise with leading technology, top quality, and exceptional competitiveness. Our products are widely used in industries such as aviation, aerospace, automobile, national defense, engineering, and mining machinery. Due to their high stability and cost-effectiveness, ZCCF Tungsten Carbide has become a strong competitor in the field of domestic and foreign cemented carbide mold materials.

Yuyao Yuxin Fastener Systems Co., Ltd.

Guarantee High Quality with Expertise

Located in Yuyao City, northeast of Zhejiang Province, Yuyao Yuxin Fastener Systems Co., Ltd. enjoys geographical advantages due to its proximity to Shanghai and Ningbo.

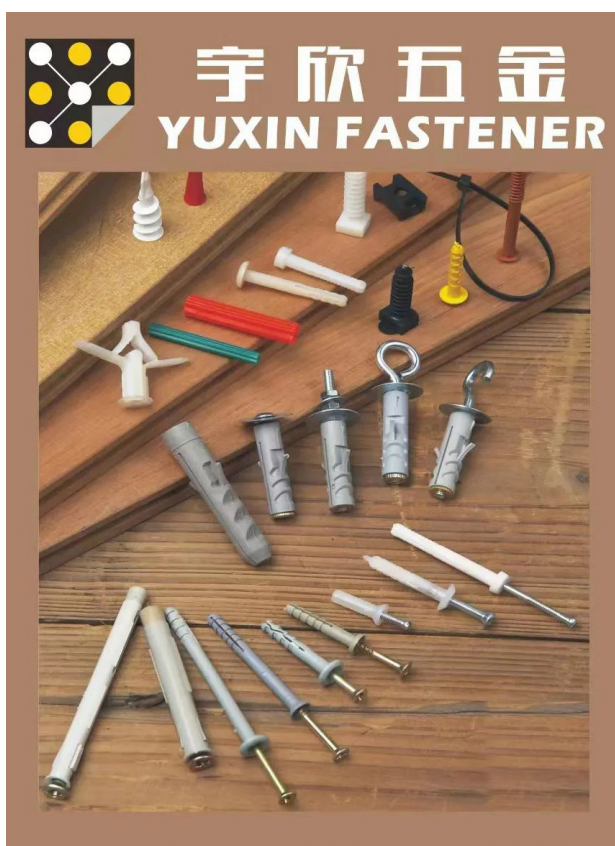

Since its establishment, Yuxin Fastener has been dedicating itself to the development of professional products and excellent services in the fields of anchor and fastener.

For years, Yuxin Fastener has attached great importance to superior product quality, prompt delivery and competitive pricing, which enables its customers to keep ahead in the fierce competition, laying a solid foundation for the company to explore market.

Today, Yuxin Fastener has gained a high reputation around the world, especially in the markets of Europe, America and Asia.

Equipped with advanced automation equipment and sophisticated production lines, Yuxin Fastener has strong scientific and technological strength. Moreover, its implementation of ISO 9001 (TüV) certification and 5S management systems also helps ensure the stability and excellence of product quality.

Main Products

Sleeve anchors, wedge anchors, drop in anchors, chemical anchors, hex coupling nuts, round coupling nuts, brass anchors, stud anchors, hollow wall anchors, hollow wall anchor toolings, shield anchors, heavy duty anchors, spring toggles, gravity toggles, strut nuts, spring nuts, concrete screws, metal hit anchors, split drive anchors, bolt anchors, heavy duty steel sleeve anchors, metal frame anchors, saw anchors, christmas tree anchors, express nail anchors, key anchors, ceiling anchors, safety nail anchors, nylon window anchors, nylon hammer drive anchors, nylon frame anchors, hammer drive plastic anchors, nylon wall plugs, nylon nail anchors, plastic toggle anchors, nylon anchors, plastic anchors, nylon drive anchors, hollow wall plugs, nylon universal plugs, nylon hammer anchors body only, nylon plugs, steel plugs, nylon cable tie holders, nylon washers, plastic washers, plastic trees, cut anchors, hammer drive anchors, zinc alloy hit anchors, lag screw shield anchors, easy drive anchors zinc alloy, lead wood screw anchors, double expansion anchors, single expansion anchors, machine screw anchors, eye screws, U-bolts, pig tails. ♦

Aerospace Fasteners Market to Garner US\$11.31 Billion by 2030

The Brainy Insights predicts the global aerospace fasteners market is to grow from USD 6.17 billion in 2021 to USD 11.31 billion by 2030, at a CAGR of 6.96% during the forecast period 2022-2030. The increasing aircraft modernization projects in various nations and growing passenger willingness to fly by air are anticipated to boost demand for aerospace fasteners.

The increasing aircraft modernization projects in various nations and growing passenger willingness to fly by air are anticipated to boost demand for aerospace fasteners.

Moreover, the growing import & export operations have resulted in higher air traffic, and the adoption of 3D & robotics technology supports the market's growth during the forecast period.

Further, the increase in demand for aerospace fasteners for defense systems in military helicopters and fighter jets is also anticipated to boost the growth of the aerospace fastener market. ♦

Hand Tools Market to Grow by USD 2.11 Billion from 2021 to 2026

The hand tools market is expected to grow by USD 2.11 billion from 2021 to 2026, according to market research firm Technavio. The market will progress at a CAGR of 3.96%. The introduction of ergonomically designed hand tools is a major trend supporting the global hand tools market share growth.

There have been several innovations in the design and features of hand tools.

Vendors are focusing on designing hand tools that improve the operational efficiency of commercial and industrial facilities. Several vendors are also focusing on improving the ergonomics of their hand tools to prevent accidents, which are common in industrial and commercial facilities while using hand tools. To reduce the number of accidents, organizations such as the OSHA and the ANSI have implemented regulations that specify the design and features of hand tools. Such regulations also improve the ergonomics of hand tools. Essentially, such innovations in the design of hand tools will drive the growth of the global hand tools market.

From now on, China can fully guarantee the supply of aluminum for various fasteners required in the manufacture of aerospace vehicles. It is reported that there are more than 700,000 rivets used in the C919 aircraft, and more than 1.05 million rivets used in the CRJ929 aircraft. ♦

China's Auto Production, Sales Post Steady Growth

China auto production and sales rose 7.4 percent and 7.9 percent year-on-year, respectively, in the first seven months of this year, posting steady growth, according to an official from the Ministry of Industry and Information Technology.

MIIT official Wang Weiming said China is striving to increase its annual automobile sales by 3 percent to 27 million in 2023.

Wang added that it is necessary to strengthen departmental coordination and create policy synergy to stabilize and expand the consumption of new energy vehicles and petrol vehicles.

However, growth challenges persist in the auto industry, with mounting global uncertainties and the continued triple pressure of domestic demand contraction, supply shocks and weakening expectations, the official noted, adding that the task of stabilizing the growth of the industry is arduous.

China's industrial authorities unveiled a plan to maintain stable growth of the country's machinery industry in 2023-24. The plan, jointly released by the MIIT and six other government departments, mainly focuses on 11 sectors, including machine tools, agricultural machinery and construction machinery.

China expects the industry's operating revenue to reach 8.1 trillion yuan (\$1.13 trillion) by 2024, according to the plan.

Efforts will be made to expand demand, promote the intelligent transformation of manufacturing, improve the quality of supply and make policy implementation more targeted, the plan stated. ♦

China's NEV Sales Rise 31.9% in July

Retail sales of new energy vehicles (NEVs) in China jumped 31.9 percent year-on-year in July, data from the China Passenger Car Association (CPCA) showed.

A total of 641,000 NEVs were sold in China in July, according to the CPCA. However, the figure represented a month-on-month decline of 3.6 percent.

China's new energy vehicle market continued to see substantial expansion as the total retail sales of NEVs rose 36.3 percent year-on-year to 3.73 million units since the beginning of the year, data showed.

Data indicates that retail sales of passenger vehicles reached 1.78 million units in July, marking the second-highest level in history. ♦

Taiwan Fasteners Exports for January to July 2023

Chinese Taiwan exported about 760,000 tons of fasteners to the world in January-July 2023, a decrease of 25.13% from the same period in 2022. In terms of value, Taiwan exported about 2.91 million tons of fasteners to the world in January-July 2023, a decrease of 24.79% compared with the same period in the previous year.

However, the average unit price (USD/kg) increased slightly by 0.5% to USD 3.827. Nearly 80% of the exports went to Europe, the United States and the United Kingdom. Exports to Europe and the United States, the ASEAN countries, Japan, S. Korea and India all showed a decline of more than 20% in volume or value compared with the same period in 2022, but the average unit price of exports to the EU27 (including the United Kingdom) grew against the trend by 5.5% to reach US\$3.726.

In terms of weight, the top 5 fasteners exported from Taiwan to the world in the first 7 months of 2023 were other screws and bolts, nuts, self-tapping screws, wood screws and steel nails (others) and the export volumes of these categories were 375,000 tons, 132,000 tons, 130,000 tons, 65,000 tons and 22,000 tons, respectively. Compared with the same period in 2022, these categories all show a downward trend. ♦

Machinery Makers Eye Equipment Replacement Business Opportunity from Upcoming EU Carbon Tax

With the impending imposition of carbon tax by the European Union, customers in the automotive, aerospace, and other industries are gearing up for the challenge. From product design, production processes to use of equipment, carbon footprint in every aspect must be reduced, which will bring new business opportunities for the precision machinery companies. They can start with the construction of green power or applying for EU's ISO-14064 certification, as well as the reduction of emissions from the production process in order to facilitate the competition for customer orders.

Furthermore, they can go from the design of new products and improvement of the production process to enhance energy saving and the inclusion of a function to collect carbon footprint data, through which they can expect to seize the business opportunities of equipment retirement and replacement.

Looking ahead, the less the carbon footprint is, the more favorable it will be for manufacturers to compete for international orders. Many major Taiwanese manufacturers have already started with greenhouse gas inventories, building green power or applying for the EU ISO-14064 certification, and reducing emissions in production processes. Meanwhile, machinery manufacturers launch Industry 4.0, smart manufacturing, adding collection of carbon emissions information to their equipment products, or build a rooftop solar power plant, offsetting carbon footprint generated from equipment production process through selling green power.

From this, if Taiwan's fastener manufacturing machinery manufacturers start to develop machines that can support net-zero emission, on the one hand, they can seize the business opportunity of replacing the old with the new, and on the other hand, they can also help fastener enterprises to overcome the challenge of the EU carbon tax. This could be a good opportunity to kill two birds with one stone. ♦

Japanese Yamashina Launches Welded Bolts Requiring No Heat Treatment

Welded bolts for high-strength steel plates have been in high demand. High-strength materials require the use of high-strength welded bolts, so conventional welded bolts are made of heat-treated high-strength steel. The manufacturing of welded screws calls for high carbon content in the material to increase bolt strength. However, the high carbon content results in poor weldability and sometimes reduces weld strength.

On the contrary, Yamashina Corporation's welded bolts are made of metal materials that do not require heat treatment, which saves heat treatment costs and improves quality. Due to the use of high strength materials, machinability is less

desirable and advanced technology is required for its manufacture. Yamashina overcame this problem and began selling its welded bolt.

The characteristics of this product are as follows:

-Using high tensile strength materials

High-strength materials with a tensile strength of about 800 MPa. No need to harden the bolts by heat treatment.

-Achieving high-strength welding

Low carbon content in the material carbon makes for good weldability and enables safe and high-strength welding. To use Yamashina's welded bolts, weld it to a steel plate and stand it up. ♦

Japanese Ikeda Metal Industrial Develops Oxidation Colored Stainless Steel Screws

池田金属工業株式会社

Ikeda Metal Industrial has developed stainless steel screws colored blue, yellow or red by oxidation coloring treatment. These screws are designed to help operators detect foreign substance contamination at the food production site at an early stage and to prevent shipment in a contaminated state. Stainless steel screws are commonly used in the assembly of food manufacturing machinery because of their corrosion resistance, but they can be difficult to locate if they become loose and fall off and get mixed with milk, mayonnaise or other white colored foods. In fact, there have been cases where packaging has been mixed with screws and shipped unknowingly.

To solve this problem, Ikeda Metal Industrial designed a special surface treatment called "stainless steel

oxidation coloring" for coloring stainless steel screws to comply with the Food Sanitation Law. By easily identifying the color of the screws, even if it is mixed with food, it is possible to detect foreign substance contamination at an early stage and prevent shipment in a mixed state. ♦

Japanese Torq Installs Fastener Pick-up Locker at Taisho Distribution Center and Sets up an AI Innovation Company

In June, the Osaka fastener trader Torq installed a fastener pick-up locker at its logistics center in Taisho-ku, Osaka, to allow customers to pick up the products they order. Through this locker, Torq is targeting the demand for screws in the early morning hours before work and other time periods so that customers can pick up goods outside of business hours.

In addition, it also announced in an April 27 press release that it was planning to establish a subsidiary named "AI Innovations, Inc." in May. This subsidiary is part of Torq's growth strategy to invest in the AI industry. The subsidiary is currently recruiting collaborative partners. This AI company founded by a major Japanese fastener trader marks Japanese fastener industry's attention to AI technology and the chains of action that it leads to. How this subsidiary will be incorporated into Torq's business roadmap, and whether Torq will lead fastener companies into the AI market, or whether AI may be introduced into fastener production and logistics in the near future, are something worth keeping in mind. ♦

Japan Heiwa Kaken Successfully Develops Yellow Trivalent Chromate Plating

At present, trivalent chromates include chromates, unichromates and black variant (chromates are silver white), but they have never appeared yellow like hexavalent chromates. In the past, hexavalent chromium plating was mostly used for yellow colored products. However, in light of the global environmental issues, Heiwa Kaken has developed a surface treatment technology that can give a yellow or red color like hexavalent chromate does, even on trivalent products.

Characteristics of Trivalent Yellow:

- Giving a yellow or red interference color as does hexavalent chromate!
- Corrosion resistance is equivalent to trivalent chromate: 72 hours without white rust, 120 hours without red rust!

No hexavalent dissolution will be detected!

- If used together with trivalent chromate, it can be used to distinguish minor differences in size and threads. ♦

The following India fastener news is provided by Abhijat Sanghvi, President of Fasteners Association of India.

India Implements Mandatory Norms for Nuts, Bolts, and Fasteners

The Indian Government has implemented mandatory quality norms for nuts, bolts, and fasteners to elevate local manufacturing and shield consumers from sub-par goods. The Department for Promotion of Industry and Internal Trade (DPIIT) issued a notification on July 21, announcing the Bolts, Nuts, and Fasteners (Quality Control) Order, 2023. This order places a firm requirement: unless they bear the Bureau of Indian Standards (BIS) mark, these products can't be manufactured, sold, traded, imported, or even stocked, and non-compliance with BIS certification is no light matter; it could mean imprisonment and hefty fines.

The Quality Control Order, 2023 is set to be effective six months from the date of publication of the notification and aims to fortify India's quality ecosystem, prioritize consumer health and safety, and stimulate the growth of domestic micro and small industries. The order accommodates certain relaxations to ensure a smooth transition and uphold the ease of doing business in the country. Exemptions have been granted for domestically manufactured goods meant for export, items imported as part of finished products or components, and imports by domestic manufacturers for producing goods intended for export.

In a meaningful partnership, DPIIT and BIS together developed 64 new Quality Control Orders (QCOs), encompassing 317 product standards. ♦

LPD Bossard Supplies Nuts and Bolts for Chandrayaan-3

LPD Bossard Pvt Ltd, based in Rohtak, provided customized and about two to five lakh special nuts and bolts for the Chandrayaan-3 Lunar Mission, which was successfully launched by the Indian Space Research Organization (ISRO) on July 14, 2023. This significant endeavor is part of India's aspiration to elevate its space exploration prowess while unraveling the moon's geology, mineralogy, and surface composition, placing the country in an exclusive club alongside the United States, China, and the former Soviet Union.

It's not the first time LPD Bossard has teamed up with ISRO, as it has been consistently supplying nuts and bolts, contributing to the success of multiple missions. ♦

Nedschroef Machinery Selects Kriti Tools as Distributor in India

Nedschroef Machinery, a leading provider of cold and warm forming multi-stage horizontal metal presses and services, chose Kriti Tools Pvt Ltd due to its broad experience in the metal forming industry.

The distributor agreement with Kriti Tools is for Nedschroef Machinery products and services and will commence immediately. With after-sales service an essential component for customers, Kriti Group personnel are being trained to handle customer service related to spare parts and field service throughout May and June.

Field service and spare parts fulfillment will be initiated by Kriti Group after training has been successfully completed.

Kriti Group will store Nedschroef Machinery spare parts inventory in Delhi to provide timely services to customers. In this backdrop Sadeesh Premananth, Managing Director, Kriti Group, shared, "We see good opportunities to co-operate and team up to offer the best service possible to our customers." To this added, Cees Sijstermans, Managing Director, Nedschroef Machinery, "We believe that with a local presence, we can get closer to our customers and respond quickly to their needs, satisfying them and engaging them over the long term." ♦

Sundram Fasteners Achieves 47 Percent Returns

Sundram Fasteners Ltd (SFL), a key player in manufacturing components for various sectors, has showcased a remarkable performance, outperforming the Nifty50 index with a striking 47 percent year-on-year return. Analysts are now pointing towards a potential 10-22 percent upside for the stock, supported by a consensus view from most brokerages.

Producing a diverse range of critical components, including fasteners, powertrain components, and more, the company boasts a well-rounded revenue mix of domestic OEMs, aftermarket, and exports at 52 percent, 13 percent, and 35 percent, respectively.

With a positive outlook from both technical and fundamental viewpoints, the momentum for Sundram Fasteners stock seems to be riding high, capturing the attention of investors and analysts alike. ♦

Indian Aerospace Suppliers Eye Growth in Parts-Making

Indian aerospace suppliers are poised to benefit from a surge in orders for jets placed by major carriers Air India and IndiGo, boosting domestic parts manufacturing and aircraft repairs. The increasing air traffic, efforts to diversify sourcing away from China, and substantial orders for almost 1,000 jets have solidified India's significance in the aerospace market.

Small and medium suppliers are attempting to capitalize on the demand for locally supplied parts, but they urge that the government provide more help to boost manufacturing.

The expansion of India's civil aviation industry is predicted to boost maintenance and overhaul activity. Deloitte expects the industry to grow from US\$ 1.7 billion in 2021 to US\$ 4 billion in 2031. While the civil aviation ministry acknowledges the positive impact of these orders on aerospace manufacturing, local production requirements cannot be mandated as they are in defense deals.

The growing fleet of aircraft in India underscores the need for enhanced maintenance services, prompting suppliers to seek proximity to customers. Indian companies like PTC Industries aim to meet global demand for alternate sources of Russian-made titanium and Chinese production. ♦

JSW Steel Expects 8 Percent Demand Growth in FY24

Despite global trends, India's steel consumption is projected to rise by 7-8 percent, buoyed by government infrastructure spending and renewed private sector investments. Jayant Acharya, Joint Managing Director, and Chief Executive Officer, JSW Steel, emphasized the positive impact of government spending on infrastructure and increased private capex, particularly in sectors like manufacturing, automotive, and construction.

The strong demand growth of 13.3 percent in India for FY23 showcased the resilience of the industry in the country. The government's push for infrastructure development and efforts to improve capacity utilization are driving this optimistic outlook.

The demand growth has led to a positive performance for JSW Steel, achieving record-high production and sales volumes. The company's strategy focuses on adding capacity and improving product mix through downstream expansion,

anticipating 8 percent demand growth in FY24. Acharya believes that India's demand will drive consumption, contributing to an additional 10 MT of steel products.

Acharya also noted that JSW Steel's export strategy remained focused on the domestic market, despite rising exports. In the last quarter, 85 percent of the company's contributions came from domestic markets and 15 percent from exports. JSW Steel plans to increase to 37 million tones by FY24 after completing various projects.

He envisions JSW Steel becoming one of the world's largest steel producers with a capacity of 50 million tonnes by the end of the decade. The company is committed to responsible expansion, sustainability, decarbonization, and innovation, aiming to deliver superior returns to shareholders through prudent financial management. ♦

Thailand's Auto Exports up Over 12 pct in May

Thailand's auto exports continued to expand in May due to last year's low comparative base and higher shipments to most foreign markets, data showed.

The country's finished car exports increased 12.25 percent from a year earlier in May to 86,358 units, following a leap of 43.53 percent year-on-year in April, according to the Federation of Thai Industries (FTI).

Auto manufacturers produced 150,532 vehicles in the country in May, up 16.48 percent from a year earlier due to higher production for exports and domestic sales, according to Surapong Paisitpattanapong, the FTI's automotive industry club vice president and spokesperson.

In the first five months of the year, car production expanded 6.72 percent from a year earlier to 775,955 units, indicating that the expected year-end car production target of 1.95 million units is achievable, Surapong told a news conference.

Domestic auto sales edged up 0.55 percent from a year earlier in May to 65,088 units after a 6.14 percent drop in April, according to Surapong. ♦

Experts: EU Probe into Chinese EV Imports Baseless

The European Union's decision to launch an investigation into Chinese electric vehicle imports will harm both sides, disrupting normal China-EU industrial and supply chain cooperation in the sector, said experts and industry insiders.

The investigation is groundless, unilateral and unfair, and the EV industry — along with China's manufacturing sector in general — must prepare for "a hard fight" against more possible containment moves by Western countries in the near future, they said.

China's EV industry will continue to

boom and gain a stronger overseas presence, thanks to the country's competitive edge in the EV value chain, especially in batteries, they added.

Their comments came after Ursula von der Leyen, president of the European Commission, the bloc's executive branch, told EU lawmakers in Strasbourg, France, recently that the EU is launching an investigation into "huge subsidies" that China allegedly provides to its electric vehicle makers.

"The Chinese EV industry's success has its roots in China's significant edge in the EV industrial chain, which has been built up over the years under sufficient market competition, not because of the so-called 'subsidies,'" said Cui Dongshu, secretary-general of the China Passenger Car Association.

"The EU should hold an objective view on the development of China's EV industry, rather than using unilateral economic and trade tools to obstruct the sector's development or increase operating costs for Chinese carmakers," Cui said.

In a statement, the Ministry of Commerce expressed serious concerns and strong dissatisfaction over the EU's probe announcement.

This is a blatant act of protectionism under the guise of "fair competition", which will severely disrupt and distort the global automotive industrial and supply chains, including that of the EU, the ministry said, adding that it will also have a negative impact on China-EU economic and trade relations.

Yang Jing, director of China Corporate Research at Fitch Ratings, said that the key competitiveness of Chinese EV brands originates from their understanding of what buyers need and their capability to deliver such products or upgrades in a very short period of time, as well as competitive prices, which are backed by the complete, efficient and cost-effective Chinese auto supply chain.

Zhang Yansheng, chief researcher at the China Center for International Economic Exchanges, pointed out that the EU has acted purely out of "trade protectionism".

Underscoring that external pressures will only motivate China to forge a stronger domestic manufacturing industry, Zhang warned that the investigation might be just the start of a series of containment moves by the EU — and the United States —

to hamper the development of the Chinese EV industry.

Yang, from Fitch Ratings, said the dominance of Chinese companies across the global EV value chain is set to be challenged by regulatory hurdles in the overseas market.

Europe and Southeast Asia are two major export destinations for Chinese new energy vehicle makers, according to the China Association of Automobile Manufacturers.

In the first eight months of this year, a total of 727,000 NEVs were shipped overseas from China, up 110 percent year-on-year. However, data from the International Energy Agency showed that Chinese EV exports only accounted for 16 percent of those sold in Europe in 2022.

Moreover, most electric vehicles that China exported to the EU last year were cars of US and European brands made in China, while Chinese brands accounted for 40 percent of the exports, according to a report by Fitch Ratings.

The China Chamber of Commerce to the EU said in a statement that manufacturing each electric vehicle involves the collaborative efforts of tens of thousands of suppliers from around the world.

The EU's commitment to market openness must be translated into tangible measures, ensuring a fair, impartial and nondiscriminatory business environment for foreign companies, according to the statement. Efforts to restrict products solely based on their country of origin will run counter to the EU's commitments to the World Trade Organization, it added.

Volkswagen AG, the largest carmaker in Europe, said strong competition gives consumers positive signals.

"When you have strong competition, you have to improve yourself; you can't rest on what you have achieved," Oliver Blume, chairman of Volkswagen's board of management, told China Daily.

"I am a supporter of worldwide trade, because that is a big advantage for all countries to bring wealth, to improve the economic situation of each country. That is, at the end, a benefit for all people. Therefore, competition is welcomed from my point of view." ♦

EU Economy to Grow Slower Than Expected: Commission

The European Commission cut the European Union's (EU) and the eurozone's 2023 economic growth forecast recently.

"While (the EU) avoided a recession last winter, the multiple headwinds facing the EU economy this year have led to somewhat weaker growth momentum than we projected in the spring," Paolo Gentiloni, European commissioner for economy, said as he presented the EU's "Summer 2023 Economic Forecast".

The Commission has revised its spring growth forecast downwards. It now expects the EU's gross domestic product (GDP) to increase by 0.8 percent in 2023 (1 percent in spring estimates), and by 1.4 percent in 2024 (1.7 percent in spring).

The projected growth of the eurozone has also been revised to 0.8 percent in 2023 from 1.1 percent; and to 1.3 percent in 2024 from 1.6 percent.

Headline inflation should continue to decline. The average inflation rate in the EU for 2023 should reach 6.5 percent, instead of the 6.7 percent foreseen in spring. The rate should go down to 3.2 percent next year (3.1 projected in spring).

Eurozone inflation in 2023 is projected to reach 5.6 percent, compared with 5.8 percent projected in spring; and 2.9 percent in 2024 instead of 2.8 percent forecast in spring.

The EU's economic activity was subdued in the first half of 2023. "Weakness in domestic demand, in particular consumption, shows that high and still increasing consumer prices for most goods and services are taking a heavier toll than expected in the Spring Forecast," the report said.

Indicators now point to slowing economic activity in the summer and the months ahead, with continued weakness in industry and fading momentum in services, despite a strong tourism season in many parts of Europe.

Overall, the weaker growth momentum in the EU is expected to extend to 2024, and the impact of tight monetary policy is

set to continue to restrain economic activity. However, a mild rebound in growth is projected for next year, as inflation keeps easing, the labor market remains robust and real incomes gradually recover.

"The very high inflation rate has taken its toll, although it is now receding. After a period of weakness, growth is expected to rebound mildly next year, underpinned by a strong labor market, record low unemployment and easing price pressures," Valdis Dombrovskis, the Commission's executive vice president for an economy that works for people, said.

"While our economy remains on a path of growth, uncertainty remains high and we need to monitor risks closely," Dombrovskis said.

According to Gentiloni, "the effective implementation of national recovery and resilience plans remains a key priority. Prudent, investment-friendly fiscal policies should be pursued, in sync with the ongoing efforts of our central banks to tame inflation."

"Lastly, we must work with determination to conclude an agreement on the reform of our fiscal rules by the end of the year," said Gentiloni. ♦

Bossard (Shanghai) Introduces a Simulated Assembly Workstation to Increase Test Torque to 350 Nm

This assembly simulation system is equipped with a robotic arm that simulates actual assembly conditions to obtain the torque and angle relationships of the assembly setup, thus verifying the accuracy of the assembly process.

"The accuracy of the high torque assembly process is important for critical applications in industries such as rail transportation and automotive. The introduction of the simulated assembly workstation means that we are in a position to help these customers solve the problems they may encounter in high torque threaded connection applications by helping them to find and validate suitable solutions," said the engineering department of Bossard Fastening Solutions (Shanghai).

In addition, when coupled with ultrasonic equipment, the simulated assembly system can also obtain fastening parameters such as torque, angle, axis force, coefficient of friction, coefficient of torque, and a variety of assembly parameter curves of the threaded connection during the fastening process, which is conducive to a more detailed analysis of threaded connection. ♦

Altenloh, Brinck & Co. Celebrates 200 Year Anniversary

ALTENLOH, BRINCK & Co (ABC) is celebrating an unbelievable milestone of two centuries of existence! Founded in 1823 in the town now known as Ennepetal, Germany, ABC was the first in that country to produce screws on an industrial scale and looks back on a long tradition dedicated to innovative progress.

The most well-known product manufactured by the global, family-run company is the SPAX screw, which revolutionized the fastener sector and continues to be one of the most innovative fasteners in the marketplace today. ♦

Einhell Germany AG: Further Growth Through Acquisition in Thailand

On June 1st Einhell Germany AG, the leading manufacturer of cutting-edge DIY tools, took the next major step in pursuit of its long-term growth strategy with the acquisition of a 66.67 percent stake in Thai company Surazinsano Co. Ltd.

Einhell has completed its entry into the Thai do-it-yourself market, which is the largest in Southeast Asia with a turnover of EUR 3.8 billion in the region. The acquisition gives the Einhell Group access to the Thai market and its local specialty retailers and DIY stores.

Alongside the existing brands, Einhell will focus on driving both the introduction of the Power X-Change battery platform and the development of the e-commerce sales channel. ♦

Hilti Plans Acquisition of 4PS Group to Expand Its Software Portfolio

The Hilti Group is taking the next strategic step to further expand its software business and plans to acquire 4PS Group, which specializes

in providing business management (ERP) solutions for the construction industry. Together, Hilti and the 4PS Group can strengthen their position to drive the digital transformation of the construction industry.

Founded in 2000 in the Netherlands, 4PS is a leading player in its domestic market and has expanded its presence to include the UK, Belgium and Germany. With over 70,000 daily users in the building construction, civil engineering and installation sectors 4PS has gained a strong reputation for the breadth of its industry expertise.

Both parties have signed the acquisition agreements, subject to approval by oversight authorities. Hilti is committed to retaining the more than 350 team members, including management, in their current roles, where they will continue to

develop new solutions. The shareholders of the company, Wim Jansen, André Overeem and Martin Westerink, will remain on the Board of Directors to support the integration in the coming years.

4PS Construct software, offers construction-specific functionalities that enable companies to manage the entire construction project life cycle. This allows construction companies to take control of their profitability by monitoring margins, forecasting results, controlling resources and planning effectively. ♦

Bulten Enters into Agreement to Acquire Exim & Mfr Holdings Pte Ltd

Bulten has entered into an agreement to acquire all shares in Exim & Mfr Holdings Pte Ltd "Exim", an Asian, Singapore-based distributor of fasteners and other components, for a purchase sum of approximately SGD 66.3 million (SEK 530 million) on a cash-free and debt-free basis. The acquisition affords Bulten a good platform to grow in new sectors, where the distribution stage is a pivotal sales channel.

The acquisition is expected to contribute to Bulten's development and earnings, and to increase earnings per share. Exim gives Bulten access to a large, broad customer base in growth sectors in a dynamic region. The acquisition is an important part of Bulten's strategy, which aims for growth outside of the company's primary customer group of automotive, and to improve risk diversification, as well as margins.

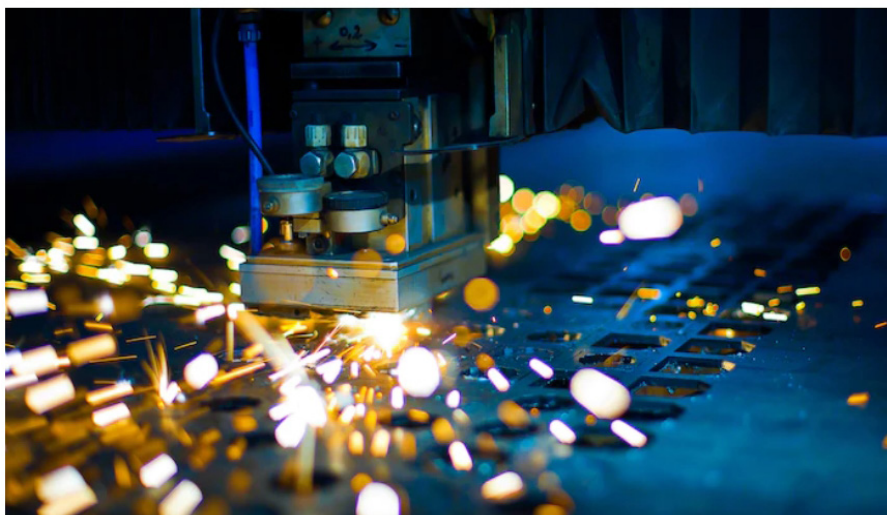

Anders Nyström, President and CEO of Bulten Group, comments: "Our strategy sets out a clear focus on balancing our sales through growth in customer groups beyond the automotive industry. The aim is for these to account for at least 20% of sales by 2025. The acquisition of Exim takes us into the distribution stage, which is a key to profitable growth in new sectors. Exim is a well-managed company with an international customer base and developed processes for distribution and Vendor Managed Inventory (VMI), which is suitable for industries with completely different purchasing patterns than Bulten has historically been used to. Exim's base in Singapore is also highly attractive. It enables Us to take advantage of the strong growth in that region, and we also see potential in using Exim's sales network to increase sales for our factories in China and Taiwan. Exim will, together with Bulten's rapidly growing business to consumer electronics customers, constitute the beginning of a new industrial segment." ♦

US Initiates Circumvention Inquiries on Carbon and Alloy Steel Threaded Rods from China

On July 12, 2023, in response to a request from Vulcan Threaded Products Inc. (Vulcan), the U.S. Department of Commerce (Commerce) initiated country-wide circumvention inquiries to determine whether steel threaded rod, made from alloy steel, that is produced in the United States from unthreaded pins imported from the People's Republic of China (China) is circumventing the antidumping duty (AD) order on alloy and certain carbon steel threaded rod from China and the countervailing duty (CVD) order on carbon and alloy steel threaded rod from China. ♦

US Cutting Tool Orders Up More than 17% in 1st Half of the Year

June 2023 U.S. cutting tool consumption totaled \$217.3 million, according to the U.S. Cutting Tool Institute and AMT-The Association For Manufacturing Technology.

This total, as reported by companies participating in the Cutting Tool Market Report collaboration, was up 3.2% from May's \$210.6 million and up 23.5% when compared with the \$175.9 million reported for June 2022. With a year-to-date total of \$1.24 billion, 2023 is up 17.4% when compared to the same time period in 2022.

These numbers and all data in this report are based on the totals reported by the companies participating in the CTMR program. The totals here represent the majority of the U.S. market for cutting tools.

"U.S. cutting tool orders continue to rise after rebounding from a soft April. Second quarter sales were strong versus 2022 sales for the same time period," said Jeff Major, president of USCTI. He added, "Hiring pressures appear to have eased, which aids in the reduction in backlogs and drives business. There is optimism that the remainder of the year will remain positive."

"The cutting tool industry continues to record strong sales growth compared to 2022," said Bret Tayne, president of Evered Tool Co. "Much of this may be attributable to certain durable goods sectors, such as transportation and defense, that are core drivers of cutting tool consumption. If some of the critical customer categories are outperforming the overall economy, the cutting tool industry may enjoy better-than-anticipated growth." ♦

Albolt Manufacturing Opens New Facility

Albolt Manufacturing, a producer of specialty fasteners, has relocated operations from Addison, Illinois, to a new facility at 5055 26th Ave. in Rockford.

"The new location provides a larger, more efficiently designed facility," said Albolt General Manager Jeremy Rubens. "With a larger footprint and more efficiently designed floorplan, Albolt now has greater capacity to produce the unique specialty fasteners that our customers need, more quickly."

Products produced in the new facility will include specialty hex bolts, sockets, studs, nuts and pins with a variety of secondary operations and additional services — all focused on producing a limitless variety of specialty fasteners that are manufactured for a specific industry, job or material. ♦

Fastener Supply Company Acquires General Machinery

North Carolina distributor Fastener Supply Company on Tuesday announced its acquisition of Kansas hardware and fastener provider General Machinery.

Under the merger, General Machinery's Pittsburgh, Kansas, location will operate as a branch of Fastener Supply under its existing name. Michelle Hampton, the company's manager, will continue as branch manager.

"This merger represents a powerful opportunity for General Machinery to accelerate growth and reach new heights," Hampton said in a statement. "By combining forces with

Fastener Supply, we can leverage our collective strengths to better serve our customers and achieve even greater success in the fastener industry."

FSC officials said the company's customers would see a broader range of products and services under the combined operations, and that the deal would enable synergies benefiting customers, employees and shareholders alike. The Charlotte-based company, which operates four additional branches across North and South Carolina, added that the move would solidify its position as "a dominant player in the fastener industry."

"General Machinery brings exceptional expertise, a talented team, and a strong customer base, all of which will complement and strengthen our operations," said FSC President Donnie Shrum.

Terms of the deal were not disclosed. ♦

Fastenal Says August Sales Rose 3.6%

Fastenal reported yet another monthly sales increase during which sales to manufacturers offset a drop in non-residential construction.

That pattern has held in every month of 2023 so far, according to the Minnesota distributor's monthly sales disclosures.

Fastenal in August posted net sales of more than \$668,000, up 3.6% from last August despite a 3.8% decline in fastener sales. Sales of safety products rose by 9.5%, and all other product categories were up by nearly 7%." ♦

Grainger Announces Plans for New Oregon Distribution Center

Grainger, the leading broad line distributor of maintenance, repair and operating (MRO) products serving businesses and institutions, announced plans to open a 500,000-square-foot distribution center in Gresham, Oregon in 2025. The new Northwest Distribution Center will enhance customer service across the Pacific Northwest, providing the company additional capacity to continue delivering best-in-class, next day complete orders across the United States.

Grainger's Northwest Distribution Center is expected to house more than 135,000 industrial supply items such as hand and power tools, heating, ventilation and air conditioning (HVAC) equipment, fluid power solutions, lighting, power transmission equipment, and motors. The company anticipates the new facility will employ approximately 80 team members when complete and over time employ more than 150 people.

The building will be constructed on a vacant 48-acre parcel of land in an industrial area of Gresham, about 16 miles from Portland. In addition, the company is opening two bulk warehouses in Pennsylvania and Texas in September, plus a third in North Carolina in 2024, to enhance network operations, accommodate a growing product offer and serve more customers.

This new facility is in addition to 10 other DC and branch locations that Grainger currently operates in the U.S. Pacific Northwest states of Oregon, Washington, Idaho and Montana. ♦

Acumed Launches New Acutrak 3 Headless Compression Screw System

Acumed, a medical device company, announced the release of its next generation Acutrak 3 Headless Screw System. Since 1994, this first-of-a-kind screw has been trusted by surgeons over 5 million times, successfully benefitting patients worldwide.

Acutrak compression headless screws embody simplicity, versatility, and ease of use for fracture fixation. Building on Acutrak 2's proven track record, Acutrak 3 advances prior design features with an industry-leading novel thread pitch design to elevate surgical performance to new standards.

The launch of Acutrak 3 now includes a new 2.0 mm diameter Nano screw, and extensions to the current portfolio of Micro, Mini, and Standard screws. These additional size offerings will allow for further surgical options among Acutrak's approved indications. ♦

Commercial Metals Company Acquires EDSCO Fasteners LLC

Commercial Metals Company ("CMC") announced the purchase of EDSCO Fasteners LLC ("EDSCO"), a leading provider of anchoring solutions for the electrical transmission market, from Middle Ground Capital.

EDSCO's custom engineered line of anchor cages, bolts, and fasteners are manufactured principally from rebar and used primarily to secure high voltage electrical transmission poles to concrete foundations. EDSCO serves the North American market from four manufacturing plants located in Texas, Utah, Tennessee, and North Carolina. Since its founding in 1985, the company has grown to become the nation's largest provider of anchor cages for concrete reinforcement and has developed a strong reputation for customer service and reliability.

"This acquisition further advances CMC's leadership position in construction reinforcement and extends our capabilities to new and growing applications," said Barbara R. Smith, Chairman of the Board and Chief Executive Officer. "EDSCO's innovative reinforcement solutions are well-positioned to benefit from the long-term transition to renewable energy, which will require extensive investment in electrical transmission capacity and wind power installations." ♦

Timken Acquires Des-Case

The Timken Company, a global leader in engineered bearings and industrial motion products, has acquired Des-Case Corp., a Nashville, Tennessee-based manufacturer of specialty filtration products for industrial lubricants.

Founded in 1983, the company serves customers across a variety of industrial end markets. Des-Case's revenue for the calendar year 2023 is expected to be around \$40 million.

"Des-Case is a technical leader in branded filtration solutions that sit adjacent to our

automatic lubrication systems," said Christopher Coughlin, Timken executive vice president and president of industrial motion. "Des-Case is known for innovative products and services that improve equipment reliability, increase profitability and provide environmental benefits. By adding new products that complement our existing portfolio, this acquisition provides strong synergy opportunities, including cross-selling and international expansion."

The vast majority of Des-Case products are consumables with a highly repetitive buying cycle that are sold through many of the same distributors that carry Timken's bearings and other products. The company's comprehensive product offering includes breathers, filter elements, condition monitoring, lubrication storage and filter systems that are used throughout the entire lubricant lifecycle. These solutions are critical for enhancing reliability, reducing downtime and extending the useful life of customers' systems.

Des-Case employs approximately 120 people and operates manufacturing facilities in Tennessee and the Netherlands. ♦

Tesla in Talks With Government to Set Up Factory in India

Tesla has started discussions with the Indian government for an investment proposal to set up a car factory in the country, with an annual capacity of as many as 500,000 electric vehicles, the Times of India reported.

The prices for the electric vehicles would start from Rs. 20 lakh, the report added.

Tesla did not immediately respond to Reuters' request for comment.

The billionaire Elon Musk-led company is also looking at using India as an export base as it plans to ship cars to countries in the Indo-Pacific region, the report said, citing government sources.

In a meeting with Musk, Indian Prime Minister Narendra Modi pushed the car maker to make a "significant investment" in the country.

After a meeting with PM Modi in New York, Musk had said in June that the electric carmaker is looking to invest in India "as soon as humanly possible."

"I am confident that Tesla will be in India and will do so as soon as humanly possible," Musk had said when asked by reporters about Tesla's plan to invest in India, adding he intended to visit the country next year.

"India has more promise than any large country in the world. He (PM Modi) really cares about India because he's pushing us to make significant investments in India, which is something we intend to do. We are just trying to figure out the right timing," Musk had added.

Musk, also CEO of SpaceX, had said it hopes to bring Starlink satellite Internet service to India as well.

Executives of Tesla visited India and held talks with Indian bureaucrats and ministers in May on establishing a manufacturing base for cars and batteries in India." ♦

DEWALT Announces New Sealed Head Ratchets

DEWALT announced two new sealed head ratchets: the 20V MAX* XR® 3/8 in. and 1/2 in. (DCF510) as well as the XTREMETM 12V MAX* 1/4 in. & 3/8 in. (DCF500). The ratchets are ideal for automotive, electrical and mechanical as well as maintenance, repair and operations (MRO) professionals.

The new Sealed Head Ratchets are designed with features in mind for our user's most demanding jobs. The innovative sealed head design and glass-filled nylon tool housing helps provide protection against oils and automotive solvents meeting the needs of pros across industries on any jobsite.

The new interchangeable anvil design allows users to quickly switch between square drives in both models in addition to a 1/4 in. quick change hex with the XTREMETM 12V MAX* model to complete a variety of applications. The low-profile head offers accessibility in tight workspaces, while the variable speed trigger and forward/reverse switch allow users to quickly change speed and direction to maximize productivity. The ratchets also feature a trigger lock that helps prevent accidental activation and an onboard LED work light to help illuminate dark areas. ♦

Snap-on Delivers Micro Torque Wrench with Macro Features

The new 1/4" Drive Flex-Head TechAngle Micro Torque Wrench from Snap-on features a 25 percent increase in torque range compared to the previous model.

Designed for precision, the ATECH1FS300 now provides a torque range of 15-300in- lb with an accuracy of $\pm 2\%$ (clockwise) and $\pm 3\%$ (counterclockwise). This compact (11.6" L x 0.90" dia.) tool offers six measurement modes and four alert modes, including LCD, LED, vibratory, and audible alerts for complete torque control. It also features dual progressive LEDs for visualizing active torque and a patented flex-yoke design for better access to fasteners, perfect for tight recesses and close-clearance applications.

With a unique torque-angle mode, this wrench allows users to torque fasteners and switch to angle without removing the tool, offering unparalleled convenience. The textured grip ensures a comfortable, non-slip hold, and a flared end that prevents slipping during high-leverage applications. Weighing in at only 0.93 lb, the ATECH1FS300 operates with a single AA battery and includes a two-year warranty. ♦

Wesco Reports Record Q2 Sales but Earnings Decline

Wesco highlighted a new sales record in its latest fiscal quarter but saw its earnings slide amid what it called “unprecedented supply chain rebalancing” in the electrical industry.

The Pittsburgh-based distribution and supply chain services company said its net sales of \$5.7 billion were up 5% compared to the second quarter of 2022, including a 3% increase in organic sales. The company's late 2022 acquisition of Rahi Systems added 2.7% in net sales, while foreign exchange rates dented the overall number by 0.7%.

The company said its communications and utility divisions, in particular, set new records, which offset a decline in its electrical business. Wesco Chairman, President and CEO John Engel said the electrical segment experienced supply chain turmoil and sluggish construction trends.

The company said its net income fell from \$221 million in last year's second quarter to \$192 million between April and June, which translated to diluted earnings of \$3.41 per share — down from \$3.95 per share last year. Wesco's overall operating

profit dropped nearly 2% over that span to \$364 million.

The company reduced its net sales forecast for the full year from the earlier 6%-9% down to 5%-7%, citing continued “market weakness” in certain segments of its electrical business. Wesco also curbed its adjusted EBITDA and EBITDA margin projections.

Engel said the company took steps in June to slash \$25 million in costs to address the sluggish electrical segment, which would benefit the broader company’s second half of 2023. He also noted that the company reduced inventories and paid down debt during the second quarter, and that lead times for most categories had returned to pre-pandemic levels.

“We remain confident in and focused on the transformational steps we are taking to improve our digital capabilities, capture market share and create value for all our stakeholders,” Engel said in a statement. “We continue to invest in our digital transformation plan, and we are working to deliver digital capabilities to benefit our customers and supplier partners that will be game-changing.” ♦

Metalformers Predict Modest Increase in Economic Activity

Metalforming companies predict a slight uptick in business conditions in the coming months despite a drop in current average daily shipping levels, according to the August Precision Metalforming Association Business Conditions Report.

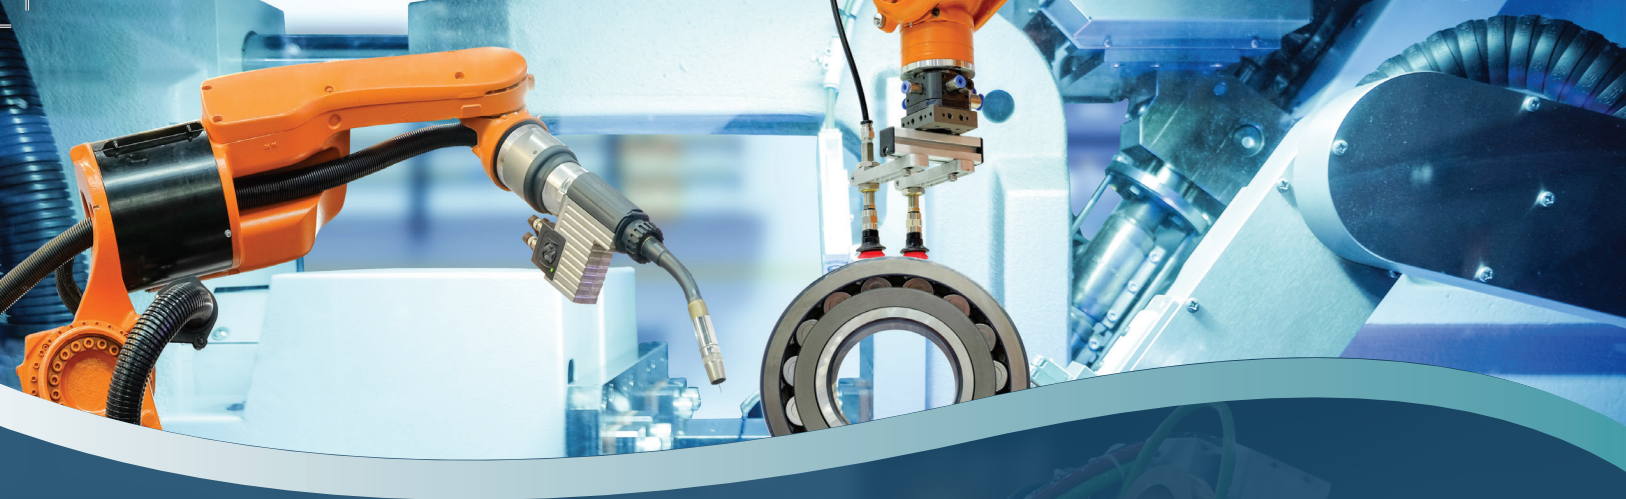

Prepared monthly, PMA’s report provides an economic indicator for the next three months of manufacturing, sampling 110 metalforming companies in the U.S. and Canada.

PMA’s August report shows that 18% of metalforming companies expect an increase in general economic activity in the next three months compared to 11% in July, while 53% predict no change in activity compared to 55% in July; 29% forecast a decrease in activity, down from 34% last month.

Metalformers also anticipate a modest improvement in incoming orders, with 26% of survey respondents expecting an increase in orders during the next three months compared to 18% in July, 46% predicting no change — the same percentage reported last month — and 28% forecasting a decrease in orders compared to 36% in July.

Current average daily shipping levels dipped in August for the second straight month; 42% of responding companies reporting a decrease in shipping levels. up from to 28% in July. Only 16% reported an increase in shipping levels — down from 19% in July — and 42% reported no change compared to 53% last month. ♦

METALTECH & AUTOMEX Concluded with Resounding Success

The 27th edition of METALTECH and AUTOMEX, Malaysia's premier machine tools, metalworking and automation exhibitions, concluded with resounding success following its four-day run at the Malaysia International Trade and Exhibitions Centre (MITEC) from 31 May to 3 June 2023. China Fastener Info took part in the exhibition as media partner and showcased its publication *China Fastener Directory* onsite (Booth No. Hall 8-8230).

With an exceptional turnout, the exhibitions exceeded all expectations to welcome 18,234 visitors from 49 countries and regions, marking a significant 44.8% increase compared to 2022. This overwhelming response once again establishes METALTECH & AUTOMEX as leading industry events in Malaysia that drive the growth and innovation of the sector.

Reporter of China Fastener Info noticed that the fastener exhibitors were mainly from Malaysia, Singapore, Chinese Mainland, Hong Kong SAR of China, whose business types were manufacturers, traders, or agents. The fastener products they exhibited included nuts, rivets, washers, riveted nuts, rivet nuts, studs, lathe parts, cold forging parts and so on.

A total of 812 participating companies from 19 countries and regions showcased cutting-edge technologies and solutions at the event, which included the presence of prestigious regional pavilions from Germany, Chinese Mainland, South Korea, Taiwan Province of China and Singapore. The participation of renowned brands and industry leaders further solidified the events' reputation as a vital annual meeting ground for all professionals from the machinery, metalworking and automation sectors.

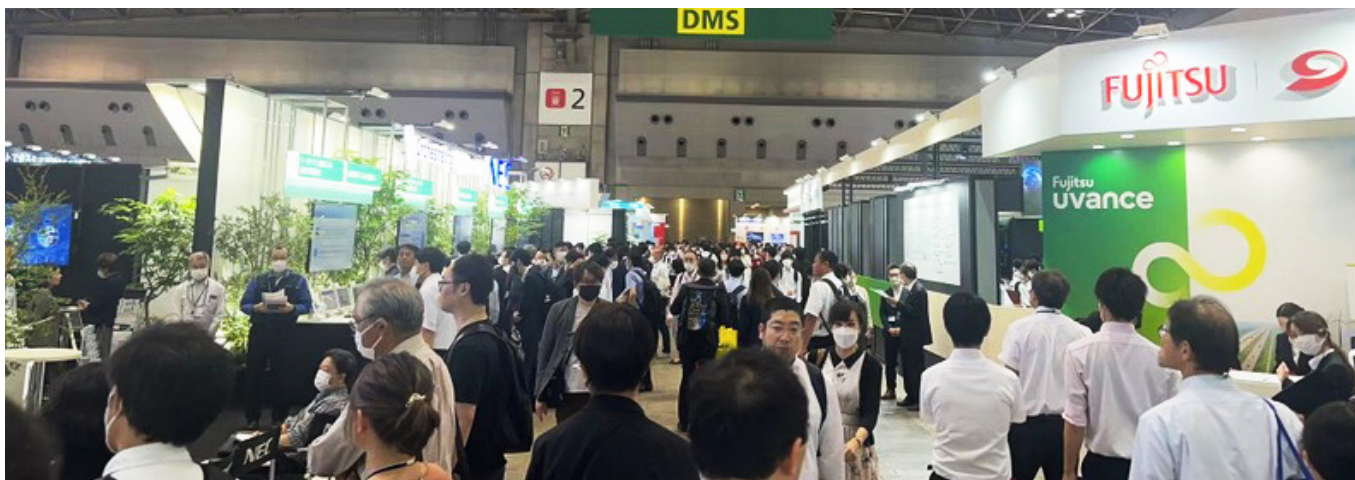

Global brands such as Bosch Rexroth, Mitsubishi Electric, THK, Hiwin, Hsin Huan Lung, Joen Lih, Shin-Yain (SYIC), Syntec, and Tongtai presented their latest advanced innovations to the attendees.

Regular business matching sessions were held during the event, offering both exhibitors and buyers a chance to conduct face-to-face meetings with prospective business partners. Along-side the exhibition activities, METALTECH also featured a series of industry seminars and talks that provided attendees with valuable insights into the latest industry developments.

The next edition of METALTECH & AUTOMEX will be held from 15-18 May 2024 at MITEC Kuala Lumpur. ♦

Manufacturing World Japan 2023 Achieves Unprecedented Success

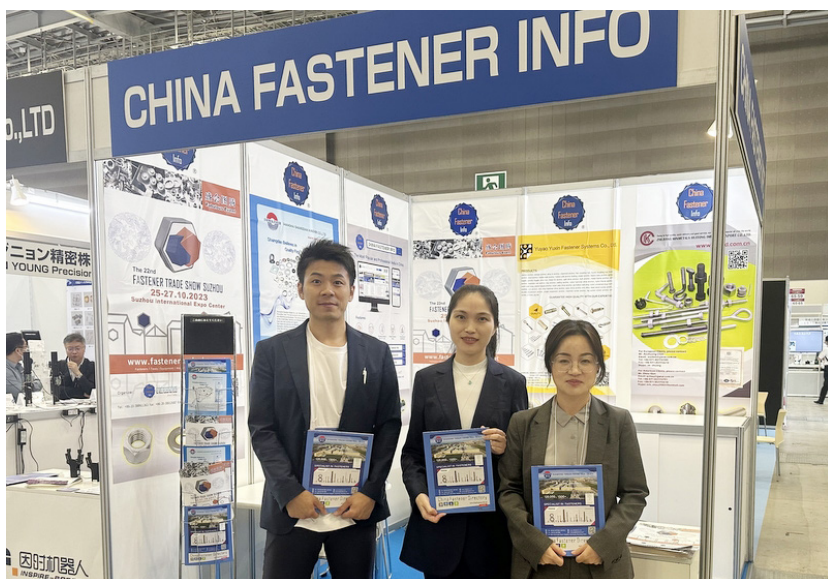

The 35th Manufacturing World Japan, hosted at Tokyo Big Sight from 21-23 June 2023, garnered significant participation from industry members.

China Fastener Info continued to expand its global influence by attending this show and distributing its *China Fastener Directory* onsite (Booth No. 65-55), which marked its 141st global trip.

Manufacturing World Japan is a leading international manufacturing event that brings together industry experts, innovators, and decision-makers to exchange knowledge, showcase technologies, and shape the future of manufacturing.

Manufacturing World Japan 2023 consisted of 10 specialised shows, and focused on digital transformation services for manufacturers, factory automation, additive manufacturing, various mechanical components, measuring products and other factory facilities.

According to the organizer RX Japan Ltd., the 3-day show achieved unprecedented success in terms of visitor attendance and exhibitor participation. It attracted 1,847 exhibiting companies, a 63% increase over 2022.

Reporter of China Fastener Info noticed that Japan fastener companies such as Daimaru Fastener, Nippon Pop Rivets and Fasteners, Takayama, Iwata, etc. were present as exhibitors. In addition, the show also attracted some fastener exhibitors from China, such as Chun Yu, Jinan Star, Wenzhou Junhao, Yichang Hengchang, etc.

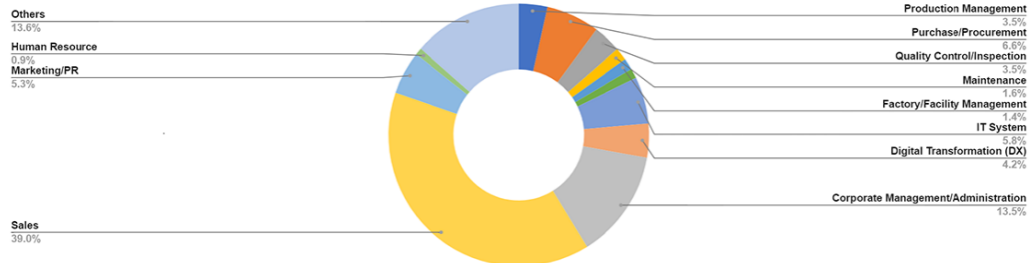

The Tokyo event also saw a significant increase in the number of visitors, with 66,895 attending over the course of three days from Wednesday to Friday, marking a 36% rise compared to the previous year.

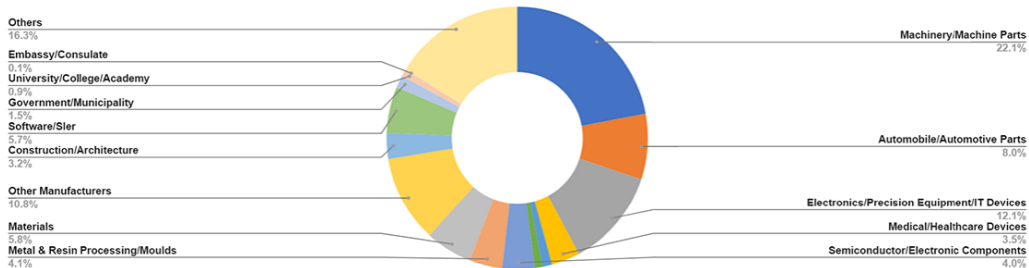

Major visitors were from design, development, production engineering, purchasing and information system divisions of automotive, heavy industry, electric, machinery and precision equipment manufacturers.

Straight to Manufacturing Expo 2023: An 8-in-1 Mega Event Attracts 92,725 Total Attendants

Manufacturing Expo 2023, ASEAN's most comprehensive event for manufacturing and support industries officially opened its doors on 21 June 2023 at BITEC, Bangkok, Thailand.

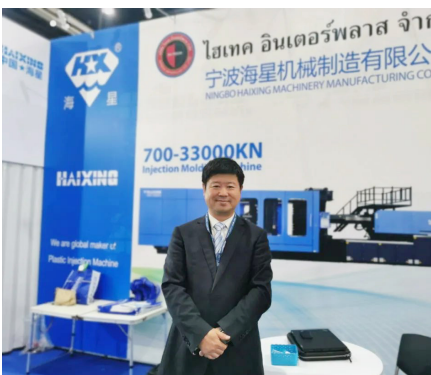

Organized by RX Tradex, the 4-day show consisted of 5 specialized shows, respectively "InterPlas Thailand 2023", "InterMold Thailand 2023", "Automotive Manufacturing 2023", "Surface & Coatings 2023", and "Assembly & Automation Technology 2023". It was co-located with "NEPCON Thailand 2023", "FacTech 2023", and "GFT 2023", which were related to electronics sectors and factory maintenance sectors.

More than 2,000 brands of latest technologies and services from 30 countries and regions showcased themselves all under one roof. China Fastener Info exhibited at Manufacturing Expo 2023 as one of the official media partners again.

According to the statistics from organizer, the 4-day show attracted total attendants of 92,725, creating another groundbreaking chapter of success in 2023.

China Fastener Info observed that Yongnian fastener companies became more and more enthusiastic about exploring business opportunities in Thai market. A Yongnian delegation consisted of around 20 exhibitors demonstrated their products and solutions onsite.

It is reported that the demand for fasteners in Thailand mainly comes from industries such as automobiles and motorcycles, as well as electronic appliances and mechanical equipment. Driven by these end-users, The Thai fastener market shows huge potential. In terms of value, Thailand is the largest exporter and importer of fasteners in ASEAN. According to the recent statistics, the value of imported fasteners in Thailand accounted for approximately 40% of ASEAN, and the volume of imported fasteners accounted for approximately 33%; while the value of exported fasteners took up about 42% of ASEAN, and the volume of exported fasteners took up about 44%. All these facts show that Thailand plays a vital role in the ASEAN fastener market.

The fastener trading business between China and Thailand is frequent. In 2022, China exported 69,958,782 kilograms of fasteners to Thailand, with an export value of 284,968,190 US dollars. In 2022, China imported 1,740,414 kilograms of fasteners from Thailand, with an import value of 18,751,452 US dollars.

The next edition of Manufacturing Expo is scheduled to be held from 19-22 June 2024, at BITEC, Bangkok. ♦

The 22nd Fastener Trade Show Suzhou, Visitor Registration is Now Live!

As a grand festival for global fastener suppliers and buyers, the 22nd Fastener Trade Show Suzhou will open its doors from 25-27 October 2023 at Suzhou International Expo Center (SIEC), Jiangsu Province, China.

The show will occupy halls D1 and E1, with a total exhibition area of 12,000 square meters, featuring more than 400 exhibiting companies (expected). Some 12,000 buyers and visitors from China and the rest of the world are expected to come to the exhibition for annual procurement and negotiation.

Analysis of China Fastener Exports in 2023 H1

Reported by China Fastener Info

According to China Customs statistics, from January to June 2023, the export value of China fasteners was 4.837 billion US dollars, down 5.76% year-on-year; the export quantity was 1.8440 million tons, down 3.35% year-on-year. The average export price was 2,600 US dollars/ton.

| Year | Export Value (USD) | Export Quantity (KG) |
|---------|--------------------|----------------------|
| 2022 H1 | 5,133,105,206 | 1,907,989,204 |
| 2023 H1 | 4,837,624,299↓ | 1,844,047,883↓ |

The top five products in terms of export value were: Other screws and bolts, with tensile strength \geq 800MPa; nuts; other screws and bolts, with tensile strength \geq 800MPa; other threaded articles; self-tapping screws.

Coach screws, and screw hooks and screw rings, whether calculated by export value or export quantity, were two products with fewer exports.

China Fastener Exports by Product in 2023 H1

| HS Code | Product | Export Value (USD) | Export Quantity (KG) |
|--------------|---|----------------------|----------------------|
| 73181100 | Coach screws | 15,995,513 | 9,384,039 |
| 73181200 | Other wood screws | 74,799,579 | 43,660,641 |
| 73181300 | Screw hooks and screw rings | 17,935,431 | 6,588,821 |
| 73181400 | Self-tapping screws | 484,957,956 | 201,864,344 |
| 73181510 | Other screws and bolts, with tensile strength \geq 800MPa | 539,286,816 | 239,680,405 |
| 73181590 | Other screws and bolts, with tensile strength < 800MPa | 1,629,798,602 | 600,903,650 |
| 73181600 | Nuts | 845,494,949 | 310,121,338 |
| 73181900 | Other threaded articles | 513,198,568 | 231,438,078 |
| 73182100 | Spring washers and other lock washers | 39,698,047 | 11,824,431 |
| 73182200 | Other washers | 314,480,280 | 104,545,854 |
| 73182300 | Rivets | 70,049,828 | 16,720,464 |
| 73182400 | Cotter and cotter pins | 170,103,528 | 36,648,274 |
| 73182900 | Other non-threaded articles | 121,825,202 | 30,667,544 |
| Total | | 4,837,624,299 | 1,844,047,883 |

The Top 20 export destinations of China fasteners (calculated by export value) were: The United States (12.48%), South Korea (5.50%), Vietnam (4.79%), Germany (4.77%), Russia (4.47%), UAE (3.93%), India (3.84%), Thailand (3.72%), Japan (3.64%), Mexico (3.11%), Saudi Arabia (2.60%), Malaysia (2.58%), Australia (2.50%), UK (2.49%), Brazil (2.11%), Italy (2.09%), the Philippines (1.83%), Canada (1.62%), Indonesia (1.59%), the Netherlands (1.48%).

Compared with the same period in 2022, the export value showed an increase in South Korea, Vietnam, UAE, India, Thailand, Mexico, Saudi Arabia, and the Philippines. On the other hand, exports to the United States, Germany, Russia, Japan, Malaysia, Australia, UK, Italy, Canada, Indonesia, and the Netherlands declined.

China Fastener Export Destinations Top 20 in 2023 H1

| Rank | Country/ Region | Export Value (USD) in 2023 H1 | Export Value (USD) in 2022 H1 | Export Quantity (kg) in 2023 H1 |
|--------------|--------------------|----------------------------------|----------------------------------|------------------------------------|
| 1 | United States | 603,698,318↓ | 856,782,287 | 241,970,510 |
| 2 | South Korea | 266,184,680↑ | 221,714,948 | 89,226,490 |
| 3 | Vietnam | 231,540,067↑ | 221,939,576 | 54,269,249 |

Updated List of Anti-dumping and Anti-subsidy Cases on Chinese Fasteners

Compiled by China Fastener Info

EU

Enter into force: Starting from February 17, 2022

Products concerned: Certain fasteners of iron or steel, other than of stainless steel, i.e. wood screws (excluding coach screws), self-tapping screws, other screws and bolts with heads (whether or not with their nuts or washers, but excluding screws and bolts for fixing railway track construction material), and washers originating in the People's Republic of China.

HS code: CN codes 7318 12 90, 7318 14 91, 7318 14 99, 7318 15 58, 7318 15 68, 7318 15 82, 7318 15 88, ex 7318 15 95 (TARIC codes 7318159519 and 7318159589), ex 7318 21 00 (TARIC codes 7318210031, 7318210039, 7318210095 and 7318210098) and ex 7318 22 00 (TARIC codes 7318220031, 7318220039, 7318220095 and 7318220098).

Duty:

| Company | Anti-dumping Duty Rate |
|---|------------------------|
| Jiangsu Yongyi Fastener Co., Ltd. | 22.1% |
| Ningbo Jinding Fastening Piece Co., Ltd. | 46.1% |
| Wenzhou Junhao Industry Co., Ltd. | 48.8% |
| Other cooperating companies listed in Annex | 39.6% |
| All other companies | 86.5% |

USA

(1)

Enter into force: April 9, 2020

Products concerned: Carbon and alloy steel threaded rods (steel threaded rods) from the People's Republic of China).

HS code: Steel threaded rod is currently classifiable under subheadings 7318.15.5051, 7318.15.5056, and 7318.15.5090 of the Harmonized Tariff Schedule of the United States (HTSUS). Subject merchandise may also enter under subheading 7318.15.2095 and 7318.19.0000 of the HTSUS.

Duty:**(Anti-dumping duties)**

| Exporter | Estimated Weighted- Average Dumping Margin (Percent) |
|--|--|
| Ningbo Zhongjiang High Strength Bolts Co., Ltd. | 14.16 |
| Zhejiang Junyue Standard Part Co., Ltd. | 4.26 |
| Cooper & Turner (Ningbo) International Trading Co., Ltd. | 11.47 |
| EC International (Nantong) Co., Ltd. | 11.47 |
| IFI & Morgan Ltd. | 11.47 |
| Jiaxing Genteel Import & Export Co., Ltd. | 11.47 |
| Ningbo Dingtuo Imp. & Exp. Co., Ltd. | 11.47 |
| Zhejiang Heiter Mfg & Trade Co., Ltd. | 11.47 |
| Ningbo Jinding Fastening Piece Co., Ltd. | 11.47 |
| Ningbo Qunli Fastener Manufacture Co., Ltd. | 11.47 |
| Nantong Runyou Metal Products Co., Ltd. | 11.47 |
| Ningbo Shareway Import & Export, Co., Ltd. | 11.47 |
| Ningbo Xingsheng Oil Pipe Fittings Manufacture Co., Ltd. | 11.47 |
| Ningbo Zhenghai Yongding Fastener Co., Ltd. | 11.47 |
| RMB Fasteners Ltd. | 11.47 |
| Zhejiang Morgan Brother Technology Co., Ltd. | 11.47 |
| China-Wide Entity | 59.45 |

(Countervailing duties)

| Company | Subsidy rate (percent) |
|---|------------------------|
| Ningbo Zhongjiang High Strength Bolts Co., Ltd. | 31.02 |
| Zhejiang Junyue Standard Part Co., Ltd. | 66.81 |
| All Others | 41.17 |

(2)

Case status: On 12 July 2023, the United States initiated an anti-circumvention investigation on imports of certain alloy and certain carbon steel threaded rods from China.

Products concerned: Steel threaded rods, alloy and certain carbon steel threaded rod from China.

HS code: Classified under HS code subheadings 7318.15.5050, 7318.15.5090, and 7318.15.2095.

Ukraine

Enter into force: Starting from September 29, 2020, valid for 5 years

Products concerned: Steel fasteners (including screws, bolts and nuts) originating in the People's Republic of China.

HS code: Classified by codes 7318156890, 7318158290, 7318158890, 7318159590, 7318169290, and 7318169990.

Duty:

| Company | Anti-dumping Duty Rate |
|---|------------------------|
| Haining Hisener Trade Co., Ltd. Hisener Industrial Co., Ltd. | 32.47% |
| Ningbo Jinding Fastening Piece Co., Ltd. | 38.37% |
| Other suppliers | 67.40% |

Canada

Case status: Measures in force

Products concerned: Certain carbon steel fasteners originating in/or exported from the People's Republic of China, excluding those specifically designed for application in the automotive or aerospace industry.

HS code: The subject goods are usually classified under the following tariff classification numbers: 7318.11.00.00, 7318.12.00.00, 7318.14.00.00, 7318.15.00.10, 7318.15.00.42, 7318.15.00.45.

Duty:

(Anti-dumping duties)

The following table identifies the exporters who currently have been issued normal values:

| Exporter | |
|----------|--|
| China | Haiyan Tianqi Fastener Co., Ltd. |
| | Ningbo Jinding Fastening Piece Co., Ltd. |
| | Robertson (Jiaxing) Inc. |
| | Suzhou Hongly Hardware Co., Ltd. and Suzhou Litto Fastener Co., Ltd. |
| | Zhejiang Yicheng Hardware Corp. |

For importations of subject goods originating in/or exported from China for which the exporter has not been issued its own normal values, the anti-dumping duty is equal to 170% of the export price.

(Countervailing duties)

The following table identifies the exporters who currently have a specific amount of subsidy:

| Exporter | Amount of Subsidy (Chinese Renminbi per Kilogram) |
|--|---|
| Haiyan Tianqi Fastener Co., Ltd. | 0.30 |
| Ningbo Jinding Fastening Piece Co., Ltd. | 0.08 |
| Robertson (Jiaxing) Inc. | 0.01 |
| Suzhou Hongly Hardware Co., Ltd. and Suzhou Litto Fastener Co., Ltd. | 0.02 |
| Zhejiang Yicheng Hardware Corp. | 0.10 |

For importations of subject goods originating in/or exported from China for which the exporter has not been issued its own amount of subsidy, the countervailing duty is equal to 1.25 Renminbi per kilogram.

Mexico

(1)

Case status: On June 6, 2023, the Mexican government through the Ministry of Economy (SE) initiated an antidumping investigation on imports of threaded steel rods originating in China.

Products concerned: Imports of threaded steel rods originating in China. Threaded rods of low, medium carbon or alloy steel without hardening, with a diameter equal to or greater than 6.4 mm ($\frac{1}{4}$ inch), but less than 38.1 mm ($1\frac{1}{2}$ inch), and a length equal to or greater than 152.4 mm (6 inches).

HS code: Tariff sections 7318.15.99 and 7318.19.99 of the General Import and Export Tax Law (TIGIE).

(2)

Enter into force: August 16, 2023 – July 31, 2025

Products concerned: The Mexican government has established temporary import tariffs ranging from 5% to 25% for 392 HS codes. These codes include items such as steel, aluminum, bamboo, rubber, chemical products, oils, soap, paper, cardboard, ceramic products, glass, electrical materials, musical instruments, furniture, and more. Fasteners are also included.

The temporary tariff increase on imports is applicable solely to products originating from and produced in countries that do not have a trade agreement in place with Mexico.

HS code: Classified by codes 7318.11.01, 7318.12.91, 7318.13.01, 7318.14.01, 7318.15.04, 7318.15.99, 7318.16.06, 7318.19.99, 7318.22.91, 7318.23.02, 7318.24.03, 7318.29.99.

Duty: 25%

South Africa

(1)

Enter info force: July 24, 2023 - July 23, 2026

Products concerned: Imported threaded fasteners of iron or steel, bolt ends and screw studs, screw studding, other hexagon nuts (excluding those of stainless steel and those identifiable for aircraft).

HS code: Classifiable in subheadings 7318.15.41, 7318.15.42 and 7318.16.30.

Duty:

| Period | Safeguard Duty |
|-------------------------------|----------------|
| July 24, 2023 – July 23, 2024 | 48.04% |
| July 24, 2024 – July 23, 2025 | 46.04% |
| July 24, 2025 – July 23, 2026 | 44.04% |

(2)

Enter info force: December 10, 2021 – December 9, 2024

Products concerned: Imported bolts with hexagon heads of iron or steel.

HS code: 73181543

Duty:

| Period | Safeguard Duty |
|--------------------------------------|----------------|
| December 10, 2021 – December 9, 2022 | 31.8% |
| December 10, 2022 – December 9, 2023 | 30.8% |
| December 10, 2023 – December 9, 2024 | 29.8% |

Argentina

Enter into force: Starting from September 2021, valid for 5 years

Products concerned: Carbon steel fasteners originating in China (the products involved are standard or super standard thickness carbon steel fasteners manufactured in accordance with ASME b16.9, ASTM a234 and equivalent standards, with an outer diameter greater than or equal to 60.3mm and less than or equal to 323.8mm, excluding 180 degree elbows, reducing elbows and carbon steel tees.

HS code: Classified under Mercosur tax numbers 7307.19.20 and 7307.93.00.

Duty: Set the FOB minimum price of US \$4.67/kg, and for the products involved whose FOB export price is lower than the minimum price, impose anti-dumping duties equivalent to the difference between the minimum price and the export price.◆
